From Leninist Discipline to Socialist Legalism

Pitman B. Potter, 2003 This is the first full length study in English of Peng Zhen 1902-97 a revolutionary comrade of Mao Zedong and Deng Xiaoping and an influential legal policymaker in China during both men's regimes As one of the chief architects of PRC law and legal institutions during the 1950s and again in the 1980s Peng left an indelible mark on the present legal system of China This book analyzes the evolution of Peng's legal views from his days as a revolutionary in the 1930s and 1940s through his participation in Communist rule during the 1950s to his conflicts with Mao and his purge in 1966 and finally to his rehabilitation and resumption of legal reform activities in the 1980s and 1990s Initially Peng embraced Leninist notions of law and political authority These ideas gradually evolved so that in the 1980s Peng advocated increased reliance on formal rules and procedures as mechanisms of governance

The Routledge Handbook of Second Language Acquisition and Individual Differences Shaofeng Li, Phil Hiver, Mostafa Papi, 2022-05-30 The Routledge Handbook of Second Language Acquisition and Individual Differences provides a thorough in depth discussion of the theory research and pedagogy pertaining to the role individual difference ID factors play in second language acquisition SLA It goes beyond the traditional repertoire and includes 32 chapters covering a full spectrum of topics on learners cognitive conative affective and demographic sociocultural variation The volume examines IDs from two perspectives one is how each ID variable is associated with learning behaviors processes and outcomes the other is how each domain of SLA such as vocabulary or reading is affected by clusters of ID variables The volume also includes a section on the common methods used in ID research including data elicitation instruments such as surveys interviews and psychometric testing as well as methods of data analysis such as structural equation modeling The book is a must read for any second language researcher or applied linguist interested in investigating the effects of IDs on language learning and for any educator interested in taking account of learners individual differences to maximize the effects of second language instruction

The Revival of China MAO Min, The book is about the revival of China in the 20th century and the first decade of the 21st century It has eight parts 1 The civil revolution in China 2 The countryside bases 3 The Long March of the Red Army 4 The Anti Japanese War 5 Decisive civil

battles before the establishment of the People's Republic of China 6 The Mao Era before the Great Cultural Revolution 7 The Great Cultural Revolution and 8 The Reform and opening up This version of the book is without pictures **Content-based Language Learning in Multilingual Educational Environments** Maria Juan-Garau,Joana Salazar-Noguera,2014-11-17 The spread of English as an international language along with the desire to maintain local languages lead us to consider multilingualism as the norm rather than the exception Consequently bi multilingual education has bloomed over the last decades This volume deals with one such type of education currently in the spotlight as an essentially European strategy to multilingualism CLIL Content and Language Integrated Learning in which curricular content is taught through a foreign language The book contributes new empirical evidence on its effects on linguistic and attitudinal outcomes focusing on bi multilingual learners who acquire English as an additional language Moreover it presents critical analyses of factors influencing multilingual education the effects of CLIL on both language and content learning and the contrast between CLIL and other models of instruction The research presented suggests that CLIL can greatly enhance language acquisition in multilingual settings *Fundamental Approaches to Software Engineering* Reiner Hähnle,Wil van der Aalst,2019-04-03 This book is Open Access under a CC BY licence This book constitutes the proceedings of the 22nd International Conference on Fundamental Approaches to Software Engineering FASE 2019 which took place in Prague Czech Republic in April 2019 held as Part of the European Joint Conferences on Theory and Practice of Software ETAPS 2019 The 24 papers presented in this volume were carefully reviewed and selected from 94 submissions The papers are organized in topical sections named software verification model driven development and model transformation software evolution and requirements engineering specification design and implementation of particular classes of systems and software testing **China's Establishment Intellectuals** Carol Lee Hamrin,Timothy Cheek,2023-07-28 First published in 1987 This book is part of an ongoing intellectual project to understand how a changing Chinese Marxism both reflects and shapes the lives of the intelligentsia in China Advanced Multimedia and Ubiquitous Engineering James J. Park,Laurence T. Yang,Young-Sik Jeong,Fei Hao,2019-08-21 This book presents the combined proceedings of the 13th International Conference on Multimedia and Ubiquitous Engineering MUE 2019 and the 14th International Conference on Future Information Technology Future Tech 2019 both held in Xi an China April 24 26 2019 The aim of these two meetings was to promote discussion and interaction among academics researchers and professionals in the field of ubiquitous computing technologies These proceedings reflect the state of the art in the development of computational methods involving theory algorithms numerical simulation error and uncertainty analysis and novel applications of new processing techniques in engineering science and other disciplines related to ubiquitous computing Explaining Railway Reform in China Linda Tjia Yin-nor,2015-10-14 Having been state owned for decades the railway reform in China confused many people particularly in terms of its ownership and property rights arrangements Western literature always prescribes that the best model for railway reform is privatization China's leadership

has also enunciated the state's determination to re-arrange property rights and rejuvenate corporate governance. But is China's railway reform really a story of convergence and will the Chinese government follow the western model of railway reform? Addressing these questions, this book provides a positive explanation of the reform in China's railway sector between 1978 and the dissolution of the Ministry of Railways. It bridges the socialist reform and transport policy literature and studies the empirical changes of the property rights arrangements in China's railway system. Refuting the convergence theory, it concludes that the cyclical reform policies of decentralization and re-centralization were actually an exploratory and interactive mechanism of assets discovery and assets recovery. This in-depth study is based on 21 face-to-face interviews with railway cadres as well as field trips to collect first-hand information in Guangzhou, Beijing, Shanghai, Tianjin, and Wuhan. As one of the only empirical studies on the reform of the railway sector in China, this book will be of interest to students and scholars of China studies, Transport studies, and Political Economy.

Advanced Computational Methods and Geomechanics Shenghong Chen, 2023-01-01. The aim of this book is intended through parallel expounding to help readers comprehensively grasp the intrinsic features of typical advanced computational methods. These methods are created in recent three decades for the understanding of the post-failure of geo-materials accompanied with discontinuous and finite deformation, dislocation, as well as the violent fluid-structure interaction accompanied with strong distortion of water surface. The strong points and weak points of the formalisms for governing equations, the discretization schemes, the nodal interpolation approximation of field variables, and their connectivity via support domains covers or enriches the basic algorithms etc. are clarified. Being aware of that the differences in these methods are not so large as at the first glance, this book will help readers to select appropriate methods to improve the methods for their specific purpose and to evaluate the reliability/applicability of the outcomes in the hazard evaluation of geotechnical/hydraulic structures beyond extreme work situation. This book may be looked at as an advanced continuation of *Computational Geomechanics and Hydraulic Structures* by the author, 2018. Springer Verlag, ISBN 978-981-10-8134-7, which elaborates the fundamental computational methods in geomechanics for the routine design of geotechnical/hydraulic engineering.
