Kantor, 1993-01-01 This volume contains papers presented at the Workshop on Groups and Computation held in October 1991 The workshop explored interactions among four areas symbolic algebra and computer algebra theoretical computer science group theory and applications of group computation The relationships between implementation and complexity form a recurrent theme though the papers also discuss such topics as parallel algorithms for groups computation in associative algebras asymptotic behavior of permutation groups the study of finite groups using infinite reflection groups combinatorial searching computing with representations and Cayley graphs as models for interconnection networks *Groups and Computation III* William M. Kantor, Ákos Seress, 2001 This series is devoted to the publication of monographs lecture resp seminar notes and other materials arising from programs of the OSU Mathematical Research Institute This includes proceedings of conferences or workshops held at the Institute and other mathematical writings

Groups and Computation II Larry Finkelstein, William M. Kantor, Consists of papers presented at the workshop on Groups and Computation held at DIMACS Groups and Computation II. Larry Finkelstein, 1997 The workshop Groups and Computations took place at the Center for Discrete Mathematics and Theoretical Computer Science DIMACS at Rutgers University in June 1995 This and an earlier workshop see Groups and Computation Finkelstein and Kantor 1993 American Mathematical Society held in October 1991 was aimed at merging theory and practice within the broad area of computation with groups The primary goal of the previous workshop was to foster a dialogue between researchers studying the computational complexity of group algorithms and those engaged in the development of practical software

Groups and Computation III William M. Kantor, Ákos Seress, 2014-01-02 This volume contains contributions by the participants of the conference Groups and Computation which took place at The Ohio State University in Columbus Ohio in June 1999 This conference was the successor of two workshops on Groups and Computation held at DIMACS in 1991 and 1995 There are papers on permutation group algorithms finitely presented groups polycyclic groups and parallel computation providing a representative sample of the breadth of Computational Group Theory On the other hand more than one third of the papers deal with computations in matrix groups giving an in depth treatment of the currently most active area of the field The points of view of the papers range from explicit computations to group theoretic algorithms to group theoretic theorems needed for algorithm development

Finite Geometries, Groups, and Computation Alexander Hulpke, Robert Liebler, Tim Penttila, Ákos Seress, 2008-08-22 This volume is the proceedings of a conference on Finite Geometries Groups and Computation that took place on September 4-9 2004 at Pingree Park Colorado a campus of Colorado State University Not accidentally the conference coincided with the 60th birthday of William Kantor and the topics relate to his major research areas Participants were encouraged to explore the deeper interplay between these fields The survey papers by Kantor O'Brien and Penttila should serve to introduce both students and the broader mathematical community to

these important topics and some of their connections while the volume as a whole gives an overview of current developments in these fields
