Birch, Susan M. Wachter, 2011-09-02 Nineteenth century landscape architect Frederick Law Olmsted described his most famous project the design of New York's Central Park as a democratic development of highest significance Over the years the significance of green in civic life has grown In twenty first century America not only open space but also other issues of sustainability such as potable water and carbon footprints have become crucial elements in the quality of life in the city and surrounding environment Confronted by a U S population that is more than 70 percent urban growing concern about global warming rising energy prices and unabated globalization today's decision makers must find

ways to bring urban life into balance with the Earth in order to sustain the natural economic and political environment of the modern city In *Growing Greener Cities* a collection of essays on urban sustainability and environmental issues edited by Eugenie L Birch and Susan M Wachter scholars and practitioners alike promote activities that recognize and conserve nature's ability to sustain urban life These essays demonstrate how partnerships across professional organizations businesses advocacy groups governments and individuals themselves can bring green solutions to cities from London to Seattle Beyond park and recreational spaces initiatives that fall under the green umbrella range from public transit and infrastructure improvement to aquifer protection and urban agriculture *Growing Greener Cities* offers an overview of the urban green movement case studies in effective policy implementation and tools for measuring and managing success Thoroughly illustrated with color graphs maps and photographs *Growing Greener Cities* provides a panoramic view of urban sustainability and environmental issues for green minded city planners policy makers and citizens *Storms Over the Urban Forest* Lisa L.
