Helping Adults to Grow Up Michael S. Broder,2022-06-06 This book presents Stage Climbing an innovative seven stage developmental model as a new tool to help practitioners recognize cognitions attitudes and behaviors typical of different life stages and thus levels of maturity in order to select the most effective treatment interventions with adult clients It is the first book to integrate cognitive behavioral CBT concepts into the entire human development spectrum for any area of life that

clients choose to work on It demonstrates how resistance to change can reflect thinking and behavioral patterns that are characteristic of earlier developmental stages It also presents a model of maturity along with treatment strategies and action steps to motivate change as well as reactivate a client's natural and organic maturation process Practitioners at all levels from diverse disciplines and modalities will learn to assess how why and where clients are stuck developmentally This volume offers practitioners who treat individuals couples and or families a psychologically integrated road map that guides clients to take responsibility for living their best life by removing self created obstacles which prevent this from occurring naturally The integration of the most robust aspects of psychodynamics developmental psychology and cognitive behavioral therapy will help the field continue to evolve by providing state of the art interventions to help clients make mature and healthy changes in their lives All mental health practitioners regardless of their therapeutic orientations can use the strategies in this book to assess the underlying core belief patterns of clients at each life stage and apply appropriate interventions to challenge self defeating beliefs and proactively work on agreed upon desired outcomes
