## Gruesome Body:

**Hideous Progeny** Angela Smith, 2012-01-24 Twisted bodies deformed faces aberrant behavior and abnormal desires characterized the hideous creatures of classic Hollywood horror which thrilled audiences with their sheer grotesqueness Most critics have interpreted these traits as symptoms of sexual repression or as metaphors for other kinds of marginalized identities yet Angela M Smith conducts a richer investigation into the period's social and cultural preoccupations She finds instead a fascination with eugenics and physical and cognitive debility in the narrative and spectacle of classic 1930s horror heightened by the viewer's desire for visions of vulnerability and transformation Reading such films as *Dracula* 1931 *Frankenstein* 1931 *Dr Jekyll and Mr Hyde* 1931 *Freaks* 1932 and *Mad Love* 1935 against early twentieth century disability discourse and propaganda on racial and biological purity Smith showcases classic horror's dependence on the narratives of eugenics and physiognomics She also notes the genre's conflicted and often contradictory visualizations Smith ultimately locates an indictment of biological determinism in filmmakers' visceral treatments which take the impossibility of racial improvement and bodily perfection to sensationalistic heights Playing up the artifice and conventions of disabled monsters filmmakers exploited the fears and yearnings of their audience accentuating both the perversity of the medical and scientific gaze and the debilitating experience of watching horror Classic horror films therefore encourage empathy with the disabled monster offering captive viewers an unsettling encounter with their own impairment Smith's work profoundly advances cinema and disability studies in addition to general histories concerning the construction of social and political attitudes toward the Other

Boon,2012-01-01 Ultimately I propose that considering internalization as embodiment is a critical methodological shift in understanding mystical methods in general and especially for probing recollection mysticism in depth The inner man as opposed to the outer man is a Pauline and Lutheran commonplace that is too frequently taken out of context leading historians of the Renaissance in general and of Spanish Renaissance religion in particular to value references to internal or mental methods of spirituality as an improvement over external or bodily rituals This book takes its cue from the recent cognitive turn in medieval studies that complicates studies of the body in religion by focusing on the embodied aspects of cognition claiming a continuum between body and soul rather than a hierarchy I argue that medieval theories of cognition made the divorce of the body from the soul

impossible for a Galenic doctor even one who spoke of the body and the world with contempt and by implication impossible for his Castilian audience Without serious consideration of Laredo s reliance on an embodied soul rather than on a body soul dualism therefore no proper assessment of the unitive stage of recogimiento can be made Introduction p 6 7      *Publication*,1905      *Pirates* Helen Hollick,2017-02-15 Discover the history behind everyone s favourite villain      Gender, Sexuality and Queerness in American Horror Story Harriet E.H.
