The Lands West of the Lakes Stephen C. Druce,2009-01-01 The period 1200 1600 CE saw a radical transformation from simple chiefdoms to kingdoms in archaeological terminology complex chiefdoms across lowland South Sulawesi a region that lay outside the classical Indicized parts of Southeast Asia The rise of these kingdoms was stimulated and economically supported by trade in prestige goods with other parts of island Southeast Asia yet the development of these kingdoms was determined by indigenous rather than imported political and cultural precepts Starting in the thirteenth century the region experienced a transition from swidden cultivation to wet rice agriculture rice was the major product that the lowland kingdoms of South Sulawesi exchanged with archipelagic traders Stephen Druce demonstrates this progression to political complexity by combining a range of sources and methods including oral textual archaeological linguistic and geographical information and analysis as he explores the rise and development of five South Sulawesi kingdoms known collectively as Ajattappareng the Lands West of the Lakes The author also presents an inquiry into oral traditions of a historical nature in South Sulawesi He examines their functions their processes of transmission and transformation their uses in writing history and their relationship to written texts He shows that any distinction between oral and written traditions of a historical nature is largely irrelevant and that the South Sulawesi chronicles which can be found only for a small number of kingdoms are not characteristic as historians have argued but exceptional in the corpus of indigenous South Sulawesi historical sources The book will be of primary interest to scholars of pre European contact Southeast Asia including
