Be Very Afraid Robert Wuthnow, 2010-04-07 Robert Wuthnow has been praised as one of the country's best social scientists by columnist David Brooks who hails his writing as tremendously valuable The New York Times calls him temperate balanced compassionate adding one can't but admire Mr Wuthnow's views A leading authority on religion he now addresses one of the most profound subjects the end of the world In Be Very Afraid Wuthnow examines the human response to existential threats once a matter for theology but now looming before us in multiple forms Nuclear weapons pandemics global warming each threatens to destroy the planet or at least to annihilate our species Freud he notes famously taught that the standard psychological response to an overwhelming danger is denial In fact Wuthnow writes the opposite is true we seek ways of positively meeting the threat of doing something anything even if it's wasteful and time consuming The atomic era that began with the bombing of Hiroshima sparked a flurry of activity ranging from duck and cover drills basement bomb shelters and marches for a nuclear freeze All were arguably ineffectual yet each sprang from an innate desire to take action It would be one thing if our responses were merely pointless Wuthnow observes but they can actually be harmful Both the public and policymakers tend to model reactions to grave threats on how we met previous ones The response to the terrorist attacks of 9/11 for example echoed the Cold War citizens went out to buy duct tape mimicking 1950s era civil defense measures and the administration launched two costly conflicts overseas Offering insight into our

responses to everything from An Inconvenient Truth to the bird and swine flu epidemics Robert Wuthnow provides a profound new understanding of the human reaction to existential vulnerability *Narrating 9/11* John N. Duvall, Robert P. Marzec, 2015-09-11 Contemporary fiction takes on 9 11 interrogating the global expansion of surveillance based on fantasies of US national security Winner of the CHOICE Outstanding Academic Title of the Choice ACRL Narrating 9 11 challenges the notion that Americans have overcome the national trauma of the terrorist attacks on the World Trade Center and the Pentagon The volume responds to issues of war surveillance and the expanding security state including the Bush Administration s policies on preemptive war extraordinary rendition torture abroad and the suspension of privacy rights and civil liberties at home Building on the work of Giorgio Agamben Slavoj i ek and Donald Pease the contributors focus on the ways in which post 9 11 narratives help make visible the fantasies that attempt to justify the ongoing state of exception and American exceptionalism Narrating 9 11 examines a variety of contemporary narratives as they relate to the cultural construction of the neoliberal nation state a role that mediates the possibilities of ethnic and religious identity as well as the ability to imagine terrorism Touching on some of the mainstays of 9 11 fiction including Jonathan Safran Foer s Extremely Loud Incredibly Close and John Updike s Terrorist the book expands this particular canon by considering the work of such writers as Jess Walter William Gibson Lauren Groff Ken Kalfus Ian McEwan Philip Roth John le Carr Laila Halaby Michael Chabon and Jarett Kobek Narrating 9 11 pushes beyond a critical focus on domestic realism offering chapters that examine speculative and genre fiction postmodernism climate change and the evolving security state as well as the television series Lost and the film Paradise Now *Facts and Fallacies of Climate Change on Our Planet* Herbert A. Hutchinson, 2025-07-06 The climate is changing but is factually proven in the big picture to be caused by astrophysical geophysical and natural regional causes and little by Man created greenhouse gas emissions Environmental scientists use of a one size fits all average global temperature land and oceans surfaces for the planet is factually disproven in this book as being a valid indicator of the climate affecting all regions of the planet Humans must survive seasonal extremes of hot and cold temperature in a region not a benign annual average global temperature The over exaggerations in a hastily created hypothesis that Man burning fossil fuels creates greenhouse gas emissions which are the dominant cause for adverse climate change and at an ominous crisis rate are fear mongering and of devious intent The hypothesis is disproven when credible scientific databases of dynamic factors affecting the climate are factually considered and logically interpreted for their causal effects This book has factually shown that the average global temperature and one size fits all goals of the environmental science groups especially those in the United Nations Intergovernmental Panel on Climate Change IPCC to limit the change in average global temperature to not exceed two degrees Centigrade by 2035 and achieve net zero greenhouse gas emissions by 2050 are baseless Even if fully achieved the present combat of climate change and reduction of greenhouse gas emissions will bring little if any change in the surface temperature or climate in most regions The goal should be to protect human safety health

comfort and safe transportation not to preserve the environment at any cost to the human population **Carbon Criminals, Climate Crimes** Ronald C. Kramer, 2020-04-17 2020 Choice Outstanding Academic Title Carbon Criminals Climate Crimes analyzes the looming threats posed by climate change from a criminological perspective It advances the field of green criminology through a examination of the criminal nature of catastrophic environmental harms resulting from the release of greenhouse gases The book describes and explains what corporations in the fossil fuel industry the U S government and the international political community did or failed to do in relation to global warming Carbon Criminals Climate Crimes integrates research and theory from a wide variety of disciplines to analyze four specific state corporate climate crimes continued extraction of fossil fuels and rising carbon emissions political omission failure related to the mitigation of these emissions socially organized climate change denial and climate crimes of empire which include militaristic forms of adaptation to climate disruption The final chapter reviews policies that could mitigate greenhouse gas emissions adapt to a warming world and achieve climate justice *Convention on Climate Change* Scott Barrett, Organisation for Economic Co-operation and Development, 1992 The reports contained in this volume were prepared under the 1991 Socio economic Aspects of Climate Change activity of the OECD Environment Committee *Religion and Ecological Sustainability in China* James Miller, Dan Smyer Yu, Peter van der Veer, 2014-04-29 This book sheds light on the social imagination of nature and environment in contemporary China It demonstrates how the urgent debate on how to create an ecologically sustainable future for the world s most populous country is shaped by its complex engagement with religious traditions competing visions of modernity and globalization and by engagement with minority nationalities who live in areas of outstanding natural beauty on China s physical and social margins The book develops a comprehensive understanding of contemporary China that goes beyond the tradition modernity dichotomy and illuminates the diversity of narratives and worldviews that inform contemporary Chinese understandings of and engagements with nature and environment *The American Nightmare* Özden Sözüalan, 2011-09-21 The American Nightmare Don DeLillo s Falling Man and Cormac McCarthy s The Road presents an extensive analysis of two novels by the two most prominent contemporary American writers The book searches into the stylistic and linguistic complexities of those two post 9 11 novels and explores the ways in which they respond to the public discourse produced in the aftermath of the event Szalan s reading of the texts offer valuable insights into the inscription of ideology in literary works which simultaneously reinstate and resist its hegemony **Fiscal Year 2001 Climate Change Budget Authorization Request** United States. Congress. House. Committee on Science.
