**Growing Up Human** Brenna Hassett, 2022-06-30 Brings the science of biological anthropology to bear on understanding how our evolutionary history has shaped a phenomenon everyone has experienced childhood Tracking deep into our evolutionary history anthropological science has begun to unravel one particular feature that sets us apart from the many many animals that came before us our uniquely long childhoods **Growing Up Human** looks at how we have diverged from our ancestral roots to stay forever young or at least what seems like forever and how the evolution of childhood is a critical part of the human story Beginning with a look at the ways animals invest in their offspring the book moves through the many steps of making a baby from pair bonding to hidden ovulation points where our species has repeatedly stepped off the standard primate path From the mystery of monogamy to the minefield of modern parenting advice biological anthropologist Brenna Hassett reveals how differences between humans and our closest cousins lead to our messy mating systems dangerous pregnancies and difficult births and what these tell us about the kind of babies we are trying to build Using observations of our closest primate relatives the tiny relics of childhood that come to us from the archaeological record and the bones and teeth of our ancestors science has started to unravel the evolution of our childhood right down the fossil record In our species investment doesn't stop at birth and as **Growing Up Human** reveals we can compare every aspect of our care and feeding from the chemical composition of our milk to our fondness for formal education from ancient times onwards in order to understand just what we evolved our weird and wonderful childhoods for

**Growing up Human** David S. Gullion LHS, 2015-07-31 Many years ago when one of my daughters was still a little girl I took her to the zoo We saw a gorilla enjoying the warming rays of the sun on a chilly autumn day For one brief moment we three were doing the same thing relaxing together in the welcomed rays of the sun Could I tell her that at one time in the distant past our direct ancestors were no more advanced than the gorilla Would she understand if informed that the gorilla was her relative and that she was even more closely related to a chimpanzee If it were possible to roll back the hands of time under some ideal set of circumstances this would be my story both now then This is how I'd tell her it happened Harry D Ape is biographical It is autobiographical It is about no one in particular and it is about everyone including our relatives It is fact and it is myth It explores who we are Fact and myth describe who we are It is hoped that after reading it the reader will never look at a human a chimp or a great ape in the same way again

Growing Up with Philosophy Matthew Lipman, Ann Margaret Sharp, 1978

Childhood on the Farm Pamela Riney-Kehrberg, 2005 Those personal accounts resurrect the essential experience of children's work play education family relations and coming of age from their own perspectives Steering a middle path between the myth of wholesome farm life and the reality of work that was often extremely dangerous Riney Kehrberg shows both the best and the worst that a rural upbringing had to offer midwestern youth a time before mechanization forever changed the rural scene and radio broke the spell of isolation Down

on the farm truancy was not uncommon and chores were shared across genders Yet farm children managed to indulge in inventive play much of it homemade to supplement store bought toys and to get through the long spells between circuses
