Little, 2024-06-06 In schools a Code Red alert indicates a potential or immediate threat within a building or on a campus and is the signal for a full scale lockdown of all classrooms This book Code Red Conversations and Solutions for an Educational System in Crisis presents a variety of voices from teachers administrators teacher preparation faculty college supervisors and pre-service teacher candidates These voices are crying Code Red because they want a broken system repaired For them the system is bleeding cancerous and in turmoil with the expectation that they work under arduous and often dangerous conditions teachers are underpaid devalued exhausted voiceless and abused They face an environment in which politics has replaced learning students are failing and in extreme circumstances walking away from schools or even

committing suicide The political discourse is wrestling control from teachers in certain states Neurodivergent students are being pushed aside The altruistic profession of teaching is being reduced to factory work in which teachers especially those in their first five years of service are leaving the profession at staggering rates The profession itself is at risk of becoming obsolete The contributors to Code Red believe that the American educational system has entered a moment of crisis Their voices need to be heard and their stories and lived experiences should be recognized The adage is true the answer to any problem resides with those who own the problem We cannot create solutions without owning that these issues exist and all of America owns the education of our children Therefore this book provides a dialogic space where everyone involved in the American educational system can reimagine the possibilities of our system and through this process begin creating positive and sustainable changes to bring our system out of crisis In addition to providing a vivid picture of the current state of public schools the book offers real solutions that can be used to produce healthier more successful classrooms It is an invaluable tool for instructors pre service teachers and Colleges of Education administrators Perfect for courses such as Introductory Education Undergraduate Social and Cultural Foundations of Education Introductory Educational Leadership Introductory Undergraduate Teacher Preparation Graduate Foundations of Education and Introductory MAT Graduate

In the Red Zsofia Barta, 2018-03-06 Why do rich countries flirt with fiscal disaster Between the 1970s and the 2000s during times of peace and prosperity affluent countries like Belgium Greece Italy and Japan accumulated so much debt that they became vulnerable and exposed themselves to the risk of default In the past three decades an extensive scholarly consensus emerged that these problems were created by fiscal indiscipline the lack of sufficient concern for budgetary constraints from policy makers as they try to please voters This approach formed the foundation for the fiscal surveillance system that attempted to bring borrowing in European countries under control via a set of fiscal rules In the Red demonstrates that the problem of sustained large scale debt accumulation is an adjustment issue rather than a governance failure Irrespective of whether the original impetus for borrowing arose from exogenous changes or irresponsible decision making policy makers invariably initiate spending cuts and or tax increases when debt grows at an alarming rate for several years in a row Zs fia Barta argues that explaining why some countries accumulate substantial amounts of debt for decades hinges on understanding the conditions required to allow policy makers to successfully put into
