Biometrics such as fingerprint face gait iris voice and signature recognizes one s identity using his her physiological or behavioral characteristics Among these biometric signs fingerprint has been researched the longest period of time and shows the most promising future in real world applications However because of the complex distortions among the different impressions of the same finger fingerprint recognition is still a challenging problem Computational Algorithms for Fingerprint Recognition presents an entire range of novel computational algorithms for fingerprint recognition These include feature extraction indexing matching classification and performance prediction validation methods which have been compared with state of art algorithms and found to be effective and efficient on real world data All the algorithms have been evaluated on NIST 4 database from National Institute of Standards and Technology NIST Specific algorithms addressed include Learned template based minutiae extraction algorithm Triplets of minutiae based fingerprint indexing algorithm Genetic algorithm based fingerprint matching algorithm Genetic programming based feature learning algorithm for fingerprint classification Comparison of classification and indexing based approaches for identification Fundamental fingerprint matching performance prediction analysis and its validation Computational Algorithms for Fingerprint Recognition is designed for a professional audience composed of researchers and practitioners in industry This book is also suitable as a secondary text for graduate level students in computer science and engineering *Pattern Recognition, Machine Intelligence and Biometrics* Patrick S. P. Wang,2012-02-13 Pattern Recognition Machine Intelligence and Biometrics covers the most recent developments in Pattern Recognition and its applications using artificial intelligence technologies within an increasingly critical field It covers topics such as image analysis and fingerprint recognition facial expressions and emotions handwriting and signatures iris recognition hand palm gestures and multimodal based research The applications span many fields from engineering scientific studies and experiments to biomedical and diagnostic applications to personal identification and homeland security In addition computer modeling and simulations of human behaviors are addressed in this collection of 31 chapters by top ranked professionals from all over the world in the field of PR AI Biometrics The book is intended for researchers and graduate students in Computer and Information Science and in Communication and Control Engineering Dr Patrick S P Wang is a Professor Emeritus at the College of Computer and Information Science Northeastern University USA Zijiang Chair of ECNU Shanghai and NSC Visiting Chair Professor of NTUST Taipei **ICCWS 2018 13th International Conference on Cyber Warfare and Security** Dr. Louise Leenen,2018-03-08 These proceedings represent the work of researchers participating in the 13th International Conference on Cyber Warfare and Security ICCWS 2018 which is being hosted this year by the National Defense University in Washington DC USA on 8 9 March 2018

Nanoparticles in Fingerprinting Kumud Kant Awasthi,Mahipal Singh Sankhla,Chandra Shekhar Yadav,Anjali Awasthi,2025-10-21 The toolkit of nanomaterials covered in this new book which ranges from magnetic nanoparticles to

quantum dots offers up new possibilities for the preservation and visualization of latent prints and turns forensic science into an area where the unseen is made strikingly visible This volume acts as a thorough guide through experimental procedures theoretical underpinnings and practical uses of nanoparticle based fingerprinting Additionally it examines the potential challenges future directions and ethical considerations associated with the adoption of nanoparticle based fingerprinting methods The volume investigates fingerprinting techniques that involve titanium dioxide nanoparticles fluorescent nanoparticles gold and silver nanoparticles green synthesis of nanoparticles iron oxide nanoparticles carbon dots CDs and cadmium selenide CdSe nanoparticles and more The multidisciplinary approach taken by this book fosters a comprehensive knowledge of this cutting edge topic by reflecting the joint work of specialists from chemistry forensic science and nanoscience Contributions from leading experts in the fields of nanotechnology and forensic science enrich this volume with diverse perspectives and practical insights Whether you are a seasoned forensic professional a researcher in materials science or a student exploring the intersections of nanotechnology and criminalistics this book aims to serve as a definitive resource on the transformative role of nanoparticles in advancing fingerprint analysis
