Government Liability and Disaster Mitigation James L. Huffman, 1985 Government Liability and Disaster Mitigation James Huffman, 1986-04-11 Examines the liability laws of China Japan New Zealand Peru the Soviet Union and the United States in the context of disaster mitigation Compares and contrasts the laws of these respective countries and proposes a theoretical framework for the analysis of government liability policy **Government Liability and Disaster Mitigation** James Huffman, James L. Huffman, 1986-04-25 Examines the liability laws of China Japan New Zealand Peru the Soviet Union and the United States in the context of disaster mitigation Compares and contrasts the laws of these respective countries and proposes a theoretical framework for the analysis of government liability policy *Earthquake Hazards Reduction Series*, 1986 **Ibss: Political Science: 1987** British Library of Political and Economic Science, 1991 IBSS is the essential tool for librarians university departments research institutions and any public or private institutions whose work requires access to up to date and comprehensive knowledge of the social sciences **Planning for Seismic Rehabilitation**, 1998 Special Publication, 1990 PAIS Bulletin, 1987 *Public Health Crisis Management and Criminal Liability of Governments* Michael Bohlander, Gerhard Kemp, Mark Webster, 2023-06-15 This book addresses potential avenues of criminal liability for public health crisis management in the context of the COVID 19 pandemic under national and international criminal law especially for causing death and bodily harm The national case studies are geographically representative and follow a common research grid Each national case study is prefaced by an overview of the detection and subsequent spread of the pandemic in the country concerned The relevant legal and constitutional frameworks that governed the government and corporate conduct in the face of the pandemic are also discussed followed by the consideration of forms of criminal liability Government responses to the COVID 19 pandemic differed vastly in terms of both the choice of strategies adopted herd immunity test and trace lockdown etc and the quality and speed of government implementation of those strategies and associated interventions Both factors impacted the number of infections and casualties It is therefore appropriate to consider forms of criminal liability for failure of individual members of government including specific public authorities to act to the best of their abilities as timely as possible and in accordance with expert advice Planning for Seismic Rehabilitation Eugene Zeller, 1999-11 Acquaints users with typical problems unrelated to design and construction processes that might arise when planning or engaging in seismic rehab projects and programs Alerts readers to the difficulties inherent in implementing seismic rehab recommendations Emphasizes 2 basic user oriented concepts The first is a process that outlines a set of decision points so the user can determine whether seismic rehab efforts are needed if so their potential scope The 2nd offers a simple escalation ladder to help users understand the degree of conflict inherent in and the implications of choosing what if any seismic rehab strategies to follow **Tort Theory** Kenneth D. Cooper-Stephenson, 1993 **Encyclopedia of Disaster Relief** K. Bradley Penuel, Matt Statler, 2010-12-29 This encyclopedia covers response to

disasters around the world from governments to NGOs from charities to politics from refugees to health and from economics to international relations covering issues in both historical and contemporary context The volumes include information relevant to students of sociology national security economics health sciences political science emergency preparedness history agriculture and many other subjects The goal is to help readers appreciate the importance of the effects responsibilities and ethics of disaster relief and to initiate educational discussion brought forth by the specific cultural scientific and topical articles contained within the work Including 425 signed entries in a two volume set presented in A to Z format and drawing contributors from varied academic disciplines this encyclopedia also features a preface by Thomas H Kean and Lee H Hamilton of the 9 11 Commission This reference resource examines disaster response and relief in a manner that is authoritative yet accessible jargon free and balanced to help readers better understand issues from varied perspectives Key Themes Geography Government and International Agencies History Human induced Disasters Infrastructure Local Response Major Disasters Relief Case Studies Medicine and Psychology Methods and Practices Mitigation Natural Disasters Overviews Politics and Funding Preparedness Recovery Response Science and Prediction Sociology U S Geographical Response

Natural Disasters D.E. Alexander,1993-09-30 Here is a comprehensive overview of the geophysical technological and social aspects of natural disasters This book systematically reviews the agents of natural catastrophes earthquakes volcanoes floods drought hurricanes erosion fires etc in terms of their geophysical processes and effects The human impact and response is examined from various perspectives including damage and the urban environment the logistics of planning and emergency action medical emergencies and the epidemiology of disasters the Third World and socio economic consequences The author s unique interdisciplinary perspective helps the reader to achieve a clear perspective on natural disasters and possible strategies against them *Natural Disasters* David C. Alexander,1993-07-29 As a well balanced and fully illustrated introductory text this book provides a comprehensive overview of the physical technological and social components of natural disaster The main disaster producing agents are reviewed systematically in terms of geophysical processes and effects monitoring mitigation and warning The relationship between disasters and society is examined with respect to a wide variety of themes including damage assessment and prevention hazard mapping emergency preparedness the provision of shelter and the nature of reconstruction Medical emergencies and the epidemiology of disasters are described and refugee management and aid to the Third World are discussed A chapter is devoted to the sociology psychology economics and history of disasters In many parts of the world the toll of death injury damage and deprivation caused by natural disasters is becoming increasingly serious Major earthquakes volcanic eruptions droughts floods and other similar catastrophes are often followed by large relief operations characterized by substantial involvement of the international community The years 1990 2000 have therefore been designated by the United Nations as the International Decade for Natural Disaster Reduction The book goes beyond mere description and elevates the field of

natural catastrophes to a serious academic level The author's insights and perspectives are also informed by his practical experience of being a disaster victim and survivor and hence the unique perspective of a participant observer Only by surmounting the boundaries between disciplines can natural catastrophe be understood and mitigation efforts made effective Thus this book is perhaps the first completely interdisciplinary fully comprehensive survey of natural hazards and disasters It has a clear theoretical basis and it recognizes the importance of six fundamental approaches to the field which it blends carefully in the text in order to avoid the partiality of previous works It covers the earth and social sciences as well as engineering architecture and development studies This breadth is made possible by virtue of a strong emphasis on simple principles of the interaction of geophysical agents with human vulnerability and response All students of environmental sciences studies and geography should find this book useful It is an introductory text which treats this dramatic subject area as something demanding serious academic treatment and not just as an assemblage of horror stories This book is intended for undergraduate students in geography and environmental studies sciences The book should also appeal to any professional or researcher concerned with man environment relations whether in social science or natural science or engineering

Earthquake Mitigation Claire B. Rubin, 1992 **International Journal of Mass Emergencies and Disasters**, 1983

Human System Responses to Disaster Thomas E. Drabek, 2012-12-06 This series is dedicated to serving the growing community of scholars and practitioners concerned with the principles and applications of environmental management Each volume is a thorough treatment of a specific topic of importance for proper management practices A fundamental objective of these books is to help the reader discern and implement man's stewardship of our environment and the world's renewable resources For we must strive to understand the relationship between man and nature act to bring harmony to it and nurture an environment that is both stable and productive These objectives have often eluded us because the pursuit of other individual and societal goals has diverted us from a course of living in balance with the environment At times therefore the environmental manager may have to exert restrictive control which is usually best applied to man not nature Attempts to alter or harness nature have often failed or backfired as exemplified by the results of imprudent use of herbicides fertilizers water and other agents Each book in this series will shed light on the fundamental and applied aspects of environmental management It is hoped that each will help solve a practical and serious environmental problem Robert S DeSanto East Lyme Connecticut Acknowledgments Compilation of the materials reviewed in this inventory was facilitated greatly by several staff members of the Disaster Research Center University of Delaware formerly at The Ohio State University and the Natural Hazards Research and Applications Information Center University of Colorado FYI, 1983 **Long-Term Consequences of Disasters** Robert Geipel, 2012-12-06 This series is dedicated to serving the growing community of scholars and practitioners concerned with the principles and applications of environmental management Each volume is a thorough treatment of a specific topic of importance for proper management practices A fundamental objective of these books is to help the reader

discern and implement man's stewardship of our environment and the world's renewable resources. For we must act to bring harmony to it and nurture an environment that is both stable and productive. These objectives have often eluded us because the pursuit of other individual and societal goals has diverted us from a course of living in balance with the environment. At times therefore the environmental manager may have to exert restrictive control which is usually best applied to man not nature. Attempts to alter or harness nature have often failed or backfired as exemplified by the results or imprudent use of herbicides, fertilizers, water and other agents. Each book in this series will shed light on the fundamental and applied aspects of environmental management. It is hoped that each will help solve a practical and serious environmental problem.

Asia-Pacific Disaster Management Simon Butt, Hitoshi Nasu, Luke Nottage, 2013-10-29. The book outlines the regulatory environment for disaster prevention and management in broad social, economic and political context. The first half of the book focuses mainly on Japan especially the 3.11 events: the earthquake and tsunami that devastated the Tohoku area on 11 March 2011 and the Fukushima Daiichi nuclear power plant radiation leaks. The second half focuses on the USA, the only other Asia-Pacific country to have experienced a serious nuclear emergency. Indonesia, China, New Zealand, Australia and international law. One question explored is whether socio-legal norms play different roles in preventing and managing responses to natural disasters compared to man-made disasters. Another is how disaster law interacts with society across very diverse societies in the disaster-prone Asia-Pacific region. The book also addresses the increasingly important roles played by international law and regional regimes for cross-border cooperation in disaster prevention and relief, including the functions played by military forces. Erudite, pragmatic and charged with detailed substantive knowledge of an astonishing range of contexts and research fields, this timely collection of important essays on the law and society of disaster management stands as an exemplary international academic response to the disasters of 11 March 2011.
