Grammaire Mundang:

Grammaire Mundang Stefan Elders,2000 A Grammar of P évé Erin Shay,2019-10-07 A Grammar of P v is the first full description of the P v language a member of the Chadic branch of the Afro Asiatic language family P v is spoken in parts of the southwestern area of the Republic of Chad and the Northern province of the Republic of Cameroon The grammar will add to information and analyses concerning Afro Asiatic languages and will help P v speakers preserve their language history cultural activities and intercultural relations The goal of the volume is to document and preserve the language for the benefit of generations to come and to make characteristics of the language available for further research in linguistics history anthropology sociology and related fields **A Grammar of Eton** Mark L.O. Van de Velde,2008-08-27 A Grammar of Eton is the first description of the Cameroonian Bantu language Eton It is also one of the few complete descriptions of a North western Bantu language The complex tonology of Eton is carefully analysed and presented in a simple and consistent descriptive framework which permits the reader to keep track of Eton s many tonal morphemes Phonologists will be especially interested in the analysis of stem initial prominence which manifests itself in a number of logically independent phenomena including length of the onset consonant phonotactic skewing and number of tonal attachment sites Typologists and Africanists working on morphosyntax will find useful analyses of among others gender and agreement tense aspect mood and negation and verbal derivation They will encounter many morphosyntactic differences between Eton and the better known Eastern and Southern Bantu languages often due to evolutions shaped by maximality constraints on stems The chapters on clause structure and complex constructions provide data hardly found in sources on the languages of the region including descriptions of non verbal clauses focus quasi auxiliaries and adverbial clauses **Negation Patterns in West African Languages and Beyond** Norbert Cyffer,Erwin Ebermann,Georg Ziegelmeier,2009 This volume deals with issues on negation patterns in languages of West Africa and the adjacent north and east The first aim is to provide data on various aspects of negation in African languages Although the topics addressed here reflect a great diversity of negation patterns the following typological features have been identified to be prominent in our region conflict or even incompatibility between negation and focus use of other indirect means of negating non indicative mood covered under the term Prohibitive different negation patterns in different Tense Aspect Moods e g Imperfective vs Perfective lack of negative indefinites and disjunctive negative marking often referred to as double negation The articles presented here show that areal factors have played a significant role in the development of negation strategies in the languages of West Africa and beyond On the other hand genetic factors seem to be less prominent **The polyfunctionality of 'still' expressions** Bastian Persohn,2024-06-28 Expressions from the semasiological domain of phasal polarity still already etc tend to be highly polyfunctional with their various uses often extending into a wide range of other linguistic domains both time related and non temporal Yet these patterns have hitherto been investigated mostly for individual languages or smaller groups This volume presents the first

ever larger scale survey of the numerous functions of expressions whose meanings include the notion of still making use of a global sample of 76 varieties from 45 distinct phyla It is aimed at semanticists typologists and descriptive grammarians alike

The Origins and Development of African Livestock Roger Blench, Kevin MacDonald, 2006-01-27 Of particular interest to those studying the history of the African continent this book takes its place as a standard reference in the field of livestock studies

Typological Studies Guglielmo Cinque, 2014-02-04 In this book Cinque takes a generative perspective on typological questions relating to word order and to the syntax of relative clauses In particular Cinque looks at the position of the Head vis vis the relative clause in relation to the position of the verb vis vis his object a general cross linguistic analysis of correlatives the need to distinguish a sentence grammar from a discourse grammar type of non restrictives with languages differing as to whether they possess both one the other or neither a selective type of extraction from relative clauses and a tentative sketch of a more ample work in progress on a unified analysis of externally headed internally headed and headless relative clauses

Historical Linguistics 2011 Ritsuko Kikusawa, Lawrence A. Reid, 2013-11-14 This volume of selected papers from the 20th International Conference on Historical Linguistics Osaka Japan July 2011 presents a set of stimulating and ground breaking studies on a wide range of languages and language families As the scope of studies that can be characterized as Historical Linguistics has expanded ICHL conferences have likewise seen a broadening of topics presented and this conference was no exception reflected by the inclusion in this volume of a plenary presentation on the grammaticalization of expressions of negation and gendered kinship in American Sign Language Three other papers propose new views of the role of grammaticalization in English Chinese and Niger Congo languages Four of the papers discuss specific problems that arise in the comparison and reconstruction of linguistic features in a range of languages from Asia Europe and South America The last six studies deal with innovative approaches to the historical development of suppletion in Romance languages possessive classifiers in Austronesian universal quantifiers in Germanic adjectival sequences in English exaptation in Celtic and Early English and drift in Ancient Egyptian

Functional Structure from Top to Toe Peter Svenonius, 2014 This volume consists of nine original chapters on central issues in theoretical syntax all written by distinguished authors who have made major contributions to generative syntax plus an introductory chapter by the editor Dedicated to Tarald Taraldsen the collection reflects the diverse energies that have pushed the cartographic program forward over the last decade The first three papers deal with subject extraction the que qui alternation and relative clause formation Luigi Rizzi presents arguments that subjects are criterial and that subject extraction is highly restricted Hilda Koopman and Dominique Sportiche concur suggesting that what appears to be subject extraction in French has been misanalyzed and involves a relative structure Adriana Belletti shows that children avoid using object relatives preferring subject relatives even when it requires passivization The fourth paper by Ian Roberts analyzes the loss of pro drop in the history of French and Brazilian Portuguese The papers by M Rita Manzini and Richard S Kayne both present novel analyses

of complementizers suggesting that they are essentially nominal rather than verbal. The final three papers address the relationship of morphology to syntax. The first two argue for a syntactic approach to word formation: Guglielmo Cinque's in a typological context and Anders Holmberg's within an analysis of Finnish focus constructions. The final paper by Edwin Williams presents an argument for the limitations of the syntactic approach to word formation.

Universals of Language Today Sergio Scalise, Elisabetta Magni, Antonietta Bisetto, 2008-10-11 This book collects the contributions presented at the international congress held at the University of Bologna in January 2007 where leading scholars of different persuasions and interests offered an up to date overview of the current status of the research on linguistic universals. The papers that make up the volume deal with both theoretical and empirical issues and range over various domains covering not only morphology and syntax which were the major focus of Greenberg's seminal work but also phonology and semantics as well as diachrony and second language acquisition. Diverse perspectives illustrate and discuss a huge number of phenomena from a wide variety of languages not only exploring the way research on universals intersects with different subareas of linguistics but also contributing to the ongoing debate between functional and formal approaches to explaining the universals of language. This stimulating reading for scientists, researchers and postgraduate students in linguistics shows how different but not irreconcilable modes of explanation can complement each other both offering fresh insights into the investigation of unity and diversity in languages and pointing to exciting areas for future research. A fresh and up to date survey of the present state of research on Universals of Language in an international context with original contributions from leading specialists in the field. First hand accounts of substantive findings and theoretical observations in different subareas of linguistics. Huge number of linguistic phenomena and data from different languages analyzed and discussed in detail.

The Oxford Handbook of Language Prosody Carlos Gussenhoven, Aojun Chen, 2021-01-07 This handbook presents detailed accounts of current research in all aspects of language prosody written by leading experts from different disciplines. The volume's comprehensive coverage and multidisciplinary approach will make it an invaluable resource for all researchers, students and practitioners interested in prosody.

Tense and Aspect in Bantu Derek Nurse, 2008-07-03 Derek Nurse looks at variations in the form and function of tense and aspect in Bantu, a branch of Niger-Congo, the world's largest language phylum. Bantu languages are spoken in central, eastern and southern sub-Saharan Africa south of a line between Nigeria and Somalia. By current estimates there are between 250 and 600 of them as yet neither adequately classified nor fully described. Professor Nurse's account is based on data from more than 200 Bantu languages and varieties, a representative sample of which is freely available on the publisher's website. He devotes substantial chapters to the analysis and comparison of the different tense and aspect systems found in Bantu. He also examines the verbal categories with which they interact, including negation and focus. Synchronic and diachronic perspectives are interwoven throughout the book. Following a brief history of Bantu over the last five thousand years, the final two chapters look systematically at the history of tense and aspect in Bantu. The first deals with the

reconstruction of the earlier forms from which contemporary structures morphemes and categories are derived and the second with the processes of change including grammaticalization by means of which older analytical structures and independent lexical items moved as they became incorporated as grammatical inflections and categories

Ideophones
 Erhard Friedrich Karl Voeltz, Christa Kilian-Hatz, 2001-01-01 The present volume represents a selection of papers presented at the International Symposium on Ideophones held in January 1999 in St Augustin Germany They center around the following hypotheses Ideophones are universal and constitute a grammatical category in all languages of the world ideophones and similar words have a special dramaturgic function that differs from all other word classes they simulate an event an emotion a perception through language In addition to this unique function a good number of formal parallels can be observed The languages dealt with here display strikingly similar patterns of derivational processes involving ideophones An equally widespread common feature is the introduction of ideophones via a verbum dicendi or complementizer Another observation concerns the sound symbolic behavior of ideophones Thus the word formation of ideophones differs from other words in their tendency for iconicity and sound symbolism Finally it is made clear that ideophones are part of spoken language the language register where gestures are used rather than written language

Genitives in Early English
 Cynthia L. Allen, 2008-11-13 This book examines the evidence for the development of adnominal genitives the knight s sword the nun s priest s tale etc in English During the Middle English period the genitive inflection es developed into the more clitic like s but how when why and over how long a time are unclear and have been subject to considerable research and discussion Cynthia L Allen draws together her own and others findings in areas such as case marking the nature of syntactic and morphological change and the role of processing and pragmatics in the construction of grammars and grammatical change Using evidence derived from a systematic examination of a wide range of texts Dr Allen reviews the evidence for the nature of the possessive inflection in earlier stages of English and the relationship of the es possessive to the his genitive In doing so she shows that Middle English texts are more reliable witnesses to the grammar of Middle English than has sometimes been assumed The texts may have been conservative but their language the author argues is reasonable reflection of the spoken language and where the written evidence runs counter to typological generalization about syntactic change it may be the latter not the former which is in need of qualification While the book focuses on Middle English it also contains discussions of linguistic change before and since and draws on comparative evidence from other languages particularly Germanic languages such as Swedish and Dutch This ground breaking book will be of great interest to scholars and students of Middle English in particular and the history of English in general

Repertoires and Choices in African Languages
 Friederike Lüpke, Anne Storch, 2013-05-28 Most African languages are spoken by communities as one of several languages present on a daily basis The persistence of multilingualism and the linguistic creativity manifest in the playful use of different languages are striking especially against the backdrop of language death and expanding monolingualism elsewhere in the

world The effortless mastery of several languages is disturbing however for those who take essentialist perspectives that see it as a problem rather than a resource and for the dominating conflictual sociolinguistic model of multilingualism This volume investigates African minority languages in the context of changing patterns of multilingualism and also assesses the status of African languages in terms of existing influential vitality scales An important aspect of multilingual praxis is the speakers agency in making choices their repertoires of registers and the multiplicity of language ideology associated with different ways of speaking The volume represents a new and original contribution to the ethnography of speaking of multilingual practices and the cultural ideas associated with them

Spatial Interrogatives in Europe and Beyond Thomas Stolz,Nataliya Levkovych,Aina Urdze,Julia Nintemann,Maja Robbers,2017-08-07 The extant generalizations about the grammar of space rely heavily on the analyses of declarative sentences There is a need to check whether these generalizations also hold in the domain of interrogation To this end this book analyzes data from some 450 languages including non standard varieties The focus is on paradigms of spatial interrogatives such as English where whither and whence and their internal organization These paradigms are checked for recurrent patterns of morphological mismatches such as syncretism and different degrees of complexity e g the number of segments The data base consists of a large parallel literary corpus Le petit prince and translations thereof which is complemented by further sources of information such as descriptive grammars The data are analyzed from a synchronic perspective However diachronic issues are addressed unsystematically too It is shown that the distribution of phenomena which characterize paradigms of spatial interrogatives are subject to areal linguistic factors This is the first typological study of spatial interrogatives It provides new insights for students of the grammar of space morphological paradigms and language typology

Predicative Possession Leon Stassen,2009-05-07 This pioneering work draws on on data from over 400 languages from a wide range of language families to establish a typology of four basic types of predicative possession It examines their interdependence with other typologies and explores varieties of related grammaticalization processes
