Venet, 2023-09-01 Educators must both respond to the impact of trauma and prevent trauma at school Trauma informed initiatives tend to focus on the challenging behaviors of students and ascribe them to circumstances that students are facing outside of school This approach ignores the reality that inequity itself causes trauma and that schools often heighten inequities when implementing trauma informed practices that are not based in educational equity In this fresh look at trauma informed practice Alex Shevrin Venet urges educators to shift equity to the center as they consider policies and professional development Using a framework of six principles for equity centered trauma informed education Venet offers practical action steps that teachers and school leaders can take from any starting point using the resources and influence at their disposal to make shifts in practice pedagogy and policy Overthrowing inequitable systems is a process not an overnight change But

Intersectionality and "Race" in Education Kalwant Bhopal, John Preston, 2012-01-25 Education is a controversial subject in which difficult and contested discourses are the norm Individuals in education experience multiple inequalities and have diverse identifications that cannot necessarily be captured by one theoretical perspective alone This edited collection draws on empirical and theoretical research to examine the intersections of race gender and class alongside other aspects of personhood within education Contributors from the fields of education and sociology seek to locate the dimensions of difference and identity within recent theoretical discourses such as Critical Race Theory Judith Butler and queer theory post structural approaches and multicultural models as they analyze whiteness and the education experience of

Congress. Senate. Committee on Health, Education, Labor, and Pensions, 2009 Catholic Schools and the Future of the Church Kathleen

Engebretson, 2014-02-27 During the first decade of the 21st century the Catholic Church in the developed world has faced a decline in its moral authority increasing accusations of irrelevance to a secular age and a steep and steady decline in commitment among successive generations from the 1960s on. Despite this Catholic schools have multiplied and grown in popularity and educational achievement. The book sets out a programme for the contribution of Catholic schools to the future of the Church covering such topics as the religious education curriculum in its cognitive and affective aspects, the sacramental life of the school, selection of staff, the issue of staff and Catholic witness and many other topics. Engebretson argues that Catholic schools are a powerful key to the future of the Church and shows how within their diversity Catholic schools can be ecclesial communities which have at their heart the building up of the Church.
