Helping Parents Help Their Kids A Clinical Guide To Six Child Problem Behaviors:

Helping Parents Help Their Kids Ennio Cipani, 1999 *Helping Parents Help Their Kids* is a guide both for clinicians who help families and for parents who have children with behavior problems. The author provides three ways to address clinical issues: in designing and implementing child behavior management plans, a general behavioral consultation model, a specific behavioral model, and an empirically tested advice package for problems that can occur in different family contexts. Each chapter provides early research on a specific strategy and several forms to use in the clinical environment. Parents will find this book helpful because the information is presented in a user-friendly format. The author explains how parents can learn specific strategies to deal with six common problems. These problems include teaching both children and adolescents to comply with the rules of the house, dealing with disruptive behavior, and addressing problems in school. *Helping Parents Help Their Kids* offers both clinicians and parents effective procedures without the technical jargon many typical behavioral texts use. Instead, the author explains these methods in common sense terms that will be a welcome change for all who want to find solutions for their child's behavioral problems.
