Handbook of Parent-Implemented Interventions for Very Young Children with Autism Michael Siller, Lindee Morgan, 2018-08-09 This handbook offers practical strategies and evidence based parent implemented interventions for very young children with autism spectrum disorder ASD It explores this important

subject within the context of rapidly increasing numbers of toddlers who are diagnosed with ASD during the second year of life. The handbook discusses how parents of young children with ASD can effectively be supported, taught, and coached to implement evidence-based parenting strategies and intervention techniques and describes a broad range of developmentally appropriate programs at the family, community, and service delivery levels. In addition, the handbook examines individual differences in parenting cognitions, emotions, and practices and proposes strategies for supporting the varying capacities of diverse families to meet the needs of young children with ASD. Chapters provide diverse coverage spanning cultural, socio-economic differences as well as differences in family structure, parenting cognitions, emotions, and practices, parental learning styles, and access to social support. Featured topics include: Supporting families of high-risk infants who have an older sibling with ASD; The use of video feedback strategies in parent-mediated early ASD intervention; The Incredible Years (IY) Parent Program for preschool children with ASD and language delays; Self-help for parents of children with ASD; The Family Implemented TEACCH for Toddlers (FITT) support model; Parent-implemented interventions for underserved families in Taiwan; Family and provider-based interventions in South Asia. The Handbook of Parent-Implemented Interventions for Very Young Children with Autism is a must-have resource for researchers, clinicians, professionals, and graduate students in clinical child, school, and developmental psychology, family studies, behavioral therapy, and social work, as well as rehabilitation medicine, therapy, child and adolescent psychiatry, pediatrics, and special education, educational psychology. **NIDA**

Evidence-Based Therapies for Children and Adolescents Ric G. Steele, T. David Elkin, Michael C. Roberts, 2007-12-03. Growing numbers of young people—some 10% to 20% of school-age populations—have mental health problems requiring intervention, and current policy initiatives identify evidence-based therapies as the most effective and relevant forms of treatment. By reviewing evidence-based treatments (EBTs) across a wide spectrum of conditions, the Handbook of Evidence-Based Therapies for Children and Adolescents bridges science and practice, closes the gaps between children's needs and services, as well as those between research, training, and practice. Several EBT options, both proved and promising, are offered for each covered disorder and are bolstered by case examples, tables, and reference lists. Features include chapters on implementation issues such as diversity, family treatment, assessment strategies, and community settings, and step-by-step

guidance for the researcher looking to gather empirical support for therapies With comprehensive coverage provided by numerous leading experts in the field this volume covers the broadest range of disorders over the widest pediatric adolescent age range including Behavioral disorders ADHD aggression bullying Phobias panic disorders school refusal and anxiety Autism and pervasive developmental disorders Depression mood disorders and suicidal behavior Alcohol and drug abuse Eating disorders and obesity PTSD With its emphasis on flexibility and attention to emerging issues the Handbook of Evidence Based Therapies for Children and Adolescents is essential reading for anyone who works to address the mental health needs of children including clinical child school and counseling psychologists clinical social workers and child psychiatrists as well as advanced graduate level students in these and other related fields Handbook of Psychotherapies with Children and Families Sandra W. Russ, Thomas H. Ollendick, 2013-11-11 The aim of this book on psychotherapies with children and families is to present a comprehensive overview of the current array of intervention approaches in the child mental health field There is a focus on the integration of theory research and practice throughout the book The book proceeds from the more global presentations of basic theoretical approaches to applications of these approaches with specific problems and populations It then presents more integrated intervention approaches and overviews of the research literature One of the unique features of this book is its focus on future directions for each approach both in clinical practice and in research A second unique feature is its structured format across diverse approaches with a focus on empirical validation of approaches Another innovation is the presentation of interventions that integrate major components of different theoretical approaches Thus the book reflects the current trends in the field of interventions with specific problems and populations empirical validation of the approach and the integration of treatment approaches There are five major sections in this book Part I consists of four chapters that address a variety of issues related to child psychotherapy Chapter 1 by the editors examines the historical roots of child psychotherapy and explores current trends in the treatment of diverse child disorders It emphasizes the movement to treatments that work and sets the stage for the chapters that follow **The Practice of Child Therapy** Richard J. Morris, Thomas R. Kratochwill, 2008 Consistent with previous editions this book assembles in a single volume summaries of the treatment literature and treatment procedures of the most common childhood behavior disorders facing persons who practice in applied settings clinics schools counseling centers psychiatric hospitals and residential treatment centers Its 16 chapters cover the historical context of child and adolescent therapy obsessive compulsive disorders childhood depression childhood fears phobias and related anxieties attention deficit hyperactivity disorder academic problems conduct disorder somatic disorders autism spectrum disorder intellectual disabilities children medically at risk sexual and other abuse of children child and adolescent psychopharmacotherapy prevention and child therapy and the law Key features include Treatment Orientation Although some chapters include a discussion of theoretical issues the primary emphasis is on intervention techniques and strategies for changing various behavior and learning

problems Case examples are often used to illustrate treatment procedures Empirical Orientation While most authors have adopted a broad based behavioral or cognitive behavioral orientation they were encouraged to review the entire treatment literature and to construct their presentations on the basis of empirically supported treatment techniques and procedures Psychopharmacotherapy Chapter The chapter on child and adolescent psychopharmacotherapy focuses on psychopharmacological interventions rather than on which drugs should be prescribed for specific behavior or learning problems Author Expertise Each chapter is written by experts who are well qualified to discuss treatment practices for the specific topic under discussion This book is intended for individuals who have entered or plan to enter the mental health profession or such related professions as counseling special education nursing and rehabilitation It is especially useful for individuals taking child and adolescent therapy and intervention courses and practicum courses Finally it is suitable for persons who work in applied settings including clinics schools counseling centers psychiatric hospitals and residential treatment centers
