O'Neal,2008-08-26 Sensationism a philosophy that gained momentum in the French Enlightenment as a response to Lockean empiricism was acclaimed by Hippolyte Taine as the doctrine of the most lucid methodical and French minds to have honored France The first major general study in English of eighteenth century French sensationism The Authority of Experience presents the history of a complex set of ideas and explores their important ramifications for literature education and moral theory The study begins by presenting the main ideas of sensationist philosophers Condillac Bonnet and Helv tius who held that all of our ideas come to us through the senses The experience of the body in seeing hearing smelling tasting and touching enabled individuals as John C O Neal points out to challenge the sometimes arbitrary authority of institutions and people in positions of power After a general introduction to sensationism the author develops a theory of sensationist aesthetics that not only reveals the interconnections

of the period's philosophy and literature but also enhances our awareness of the forces at work in the French novel. He goes on to examine the relations between sensationism and eighteenth-century French educational theory, materialism, and ideology. Ultimately, O'Neal opens a discussion of the implications of sensationist thought for issues of particular concern to society today.

Educational Philosophy in the French Enlightenment Natasha Gill, 2016-04-29 Though *Emile* is still considered the central pedagogical text of the French Enlightenment, a myriad of lesser-known thinkers paved the way for Rousseau's masterpiece. Natasha Gill traces the arc of these thinkers as they sought to reveal the correlation between early childhood experiences and the success or failure of social and political relations and set the terms for the modern debate about the influence of nature and nurture in individual growth and collective life. Gill offers a comprehensive analysis of the rich cross-fertilization between educational and philosophical thought in the French Enlightenment. She begins by showing how, in *Some Thoughts Concerning Education*, John Locke set the stage for the French debate by transposing key themes from his philosophy into an educational context. Her treatment of the abbé Claude Fleury, the rector of the University of Paris, Charles Rollin, and Swiss educator Jean Pierre de Crousaz illustrates the extent to which early Enlightenment theorists reevaluated childhood and learning methods on the basis of sensationist psychology. Etienne Gabriel Morelly, usually studied as a marginal thinker in the history of utopian thought, is here revealed as the most important precursor to Rousseau and the first theorist to claim education as the vehicle through which individual liberation, social harmony, and political unity could be achieved. Gill concludes with an analysis of the educational philosophical dispute between Helvétius and Rousseau and traces the influence of pedagogical theory on the political debate surrounding the expulsion of the Jesuits in 1762.

*The Cambridge Companion to Rousseau* Patrick Riley, 2001-08-27 Universally regarded as the greatest French political theorist and philosopher of education of the Enlightenment and probably the greatest French social theorist, Rousseau was an important forerunner of the French Revolution, though his thought was too nuanced and subtle ever to serve as mere ideology. This 2001 volume systematically surveys the full range of Rousseau's activities in politics and education, psychology, anthropology, religion, music, and theater.

*The French Book Trade in Enlightenment Europe II* Simon Burrows, 2018-08-09 This is a rich and path-breaking comparative study of reading tastes in the final years of old-regime Europe. Based on extensive research in the account books of the Swiss publishers the Sociéte Typographique de Neuchâtel (STN) and related archives, it charts the dissemination of literature and reading tastes across Europe in the years leading up to the French Revolution. In the process, it recasts our understanding of late 18th-century print culture and the contours of the Enlightenment. The fruit of a widely acclaimed five-year database project, the STN database, it is also a story of pioneering efforts to apply the latest digital technology and GIS mapping techniques to traditional historical and bibliographic problems. Although written to serve as a standalone study, this book is ideally complemented by its companion volume, Mark Curran's *The French Book Trade in Enlightenment Europe I: Selling Enlightenment*, which offers a radical reinterpretation of the

structure and practices of the European book trade The STN database is now recognised as a cutting edge digital project of global significance Robert Darnton has called it a prodigious accomplishment and a joy to use while Jeremy Popkin adds No one working in the field of French Enlightenment studies can afford to ignore the rich mine of data that Simon Burrows and his collaborators have made accessible in an eminently usable form and the new possibilities it opens up for scholars The French Book Trade in Enlightenment Europe I and II offer a roadmap of that data and what it can show us **The**
