Nancy Krieger's original ecosocial theory of disease distribution this volume lays new theoretical groundwork about embodiment and health justice through concrete and novel examples involving pathways such as workplace discrimination, relationship abuse, Jim Crow, police violence, pesticides, fracking, green space, and climate change. It offers a crucial counterargument to dominant biomedical and public health narratives attributing causality to either innate biology or decontextualized health behaviors and provides a key step forward towards understanding and addressing the structural drivers of health inequities and health justice. Bridging insights from politics, history, sociology, ecology, biology, and public health, *Ecosocial Theory: Embodied Truths and the People's Health* presents a bold new framework to transform biomedical and population health thinking, practice, and policies and to advance health equity across a deeply threatened planet. **The Science and Politics of Racial Research** William H. Tucker, 1994. Unlike other critiques of the scientific literature on racial difference, *The Science and Politics of Racial Research* argues that there has been no scientific purpose or value to the study of innate differences in ability between groups. William Tucker shows how for more than a century, scientific investigations of supposedly innate differences in ability between races have been used to rationalize social and political inequality as the unavoidable consequence of natural differences. Tucker structures his work chronologically, with each chapter describing how research on genetic difference was used in a particular era to support a particular political agenda. He begins with the use of science to support slavery in the mid-nineteenth century and ends with the effects of Jensenism in the 1970s. Highlights include one chapter describing a little-known but concerted attempt by a group of scientists to overturn the *Brown v. Board of Education* decision on the basis of expert testimony about racial differences, and another that presents a review of the eugenics movement in the twentieth century. The author also considers how to balance the rights and responsibilities of scientists, concluding that one generally neglected method is to strengthen the rights of research subjects. **Inquiries Into Human Faculty and Its Development** Galton, Francis, 1901. *The Life and Legacy of George Leslie Mackay* Clyde R. Forsberg Jr., 2011-10-18. George Leslie Mackay (1844-1901), the famous Canadian Presbyterian missionary who came to northern Formosa (Taiwan) in 1872 and preached specifically with aborigines in mind, is the subject of an interdisciplinary study by seven independent scholars interested in the nineteenth-century imperial project and Christian mission to China. Importantly, Mackay's mission defies such binary opposites as East and West, the missionary as a conduit of an earlier Scottish Canadian spirituality adapted to Taiwan that allowed converts to appropriate the Presbyterian faith on their own terms, the mission field in which he operated a biculture of foreign initiative and aboriginal agency working hand in hand, Mackay's ordination of aboriginal ministers giving us the Northern Synod of the Presbyterian Church of Taiwan (PCT). PCT was a bold departure from the imperial Anglo-Canadian Presbyterian norm. So too his marriage to a Taiwanese slave girl, Chhang-mia, and the arranged interracial marriages that he performed between select Chinese ministers and female Taiwanese graduates, which included his two daughters. Mackay's missionary writing and famous autobiography *From Far Formosa* a fine specimen

of the nineteenth century heroic memoir genre is notable for its defense of both gender and racial equality and despite its unmistakable patriarchal leanings Mackay's repudiation of Darwinism and belief in an early type of creation science therein also locates the so called Barbarian Bible Man opposite such virulent racist theorizing as Social Darwinism and Eugenics He was a dentist not an abortionist A relative unknown to most Western scholars of religion Mackay is Taiwan's most famous native son represented on the national stage in 2008 as a sky god and Taiwanese animistic deity of supernatural power and political influence par excellence Although a product of the colonial times in which he lived post colonial scholars who ignore Mackay his life and legacy clearly do so at some peril
