Wells,Barry L. Stiefel,2018-09-20 Human Centered Built Environment Heritage Preservation addresses the question of how a human centred conservation approach can and should change practice For the most part there are few answers to this question because professionals in the heritage conservation field do not use social science

research methodologies to manage cultural landscapes assess historical significance and inform the treatment of building and landscape fabric With few exceptions only academic theorists have explored these topics while failing to offer specific usable guidance on how the social sciences can actually be used by heritage professionals In exploring the nature of a human centred heritage conservation practice we explicitly seek a middle ground between the academy and practice theory and application fabric and meanings conventional and civil experts and orthodox and heterodox ideas behind practice and research We do this by positioning this book in a transdisciplinary space between these dichotomies as a way to give voice and respect to multiple perspectives without losing sight of our goal that heritage conservation practice should fundamentally benefit all people We believe that this approach is essential for creating an emancipated built heritage conservation practice that must successfully engage very different ontological and epistemological perspectives

*Like Father, Like Son* Rod Fisher, This study evolved from the author's examination of a series of sketches undertaken by a young Englishman during his sojourn in Brisbane the seat of government of the newly created Colony of Queensland Initial research revealed a somewhat hazy outline of his ancestry and early life until an independent researcher in the UK preparing a photographic study of his subsequent built legacy discovered a key piece of the jigsaw This book is the culmination of the author's subsequent research carried out in three corners of the globe which now shines a definitive light on the lineage of Richard Harding Watt He was a wealthy business man and developer of a number of distinctive heritage listed buildings in Knutsford perhaps best known as the model for Elizabeth Gaskell's novel Cranford

**Becoming Heritage** Maria Fernanda Escallón, 2023-04-13 Since the late twentieth century multicultural reforms to benefit minorities have swept through Latin America however in Colombia ethno racial inequality remains rife *Becoming Heritage* evaluates how heritage policies affected the Afro Colombian community of San Basilio de Palenque after it was proclaimed by UNESCO as Intangible Cultural Heritage of Humanity in 2005 Although the designation partially delivered on its promise of multicultural inclusion it also created ethno racial exclusion and conflict among groups within the Palenquero community The new forms of power knowledge skills and values created to safeguard heritage exacerbated political social symbolic and economic inequalities among Palenqueros and did little to ameliorate the harsh realities of living and dying in Palenque Bringing together broader discussions on race nation and inclusion in Colombia *Becoming Heritage* reveals that inequality in Palenque is not only a result of Black Colombians uneven access to resources it is enforced through heritage politics expertise and governance
