The artists of the world bio-bibliographical index by profession, 2002 **Encyclopédie universelle des artistes**, 2003

The Bio bibliographical Index by Profession is a unique index of visual artists from all over the world and throughout all ages. It provides the user with access to the Allgemeines Künstlerlexikon (AKL), which on completion will contain more than 500,000 biographies on artists and provide an overview of artistic activity. Several hundred artistic professions are included here from architects to etchers, from sculptors to body artists. The basis for the biographical entries are over 200 major international encyclopedias of artists with a total of some 500 volumes whose data, including source references, are indexed by the Bio bibliographical Index by Profession in a clearly structured manner, providing the user with an overview and easy access. The data has been supplemented with material from the published volumes of AKL Thieme, Becker and Vollmer and with additional details researched by the editorial staff. The index thus represents a biographical reference work in its own right. The index is structured by artistic professional groups in English, within professional groups by country and within countries in chronological order. The Bio bibliographical Index by Profession thus also provides a chronological overview of the history of artists and the development of various art forms in individual countries. Providing up-to-date information, the short entries comprise the artist's name, including name variants and pseudonyms, fields of artistic activity, biographical dates, places of birth and death if not known, place and date of first and/or last mentioned country, classification and at least one bibliographical source reference. For each professional title listed in English, the five-language Glossary of Occupations provides German, French, Italian and Spanish equivalents. User information: the Overview of Professions and their Classification and the Alphabetical List of Countries are also provided in five languages, making this work a genuine treasure trove of information to be used all around the globe.
