Jed Rasula

Hermann Finsterlin:

Architecture after God Kyle Dugdale, 2022-12-19 Architecture after God A vivid retelling of the biblical story of Babel leads from the contested site of Babylon to the soaring towers of the modern metropolis and sets the bright hopes of early modernism against the shadows of gathering war Dealing in structural metaphor utopian aspiration and geopolitical ambition Dugdale exposes the inexorable architectural implications of the event described by Nietzsche as the death of God The Exploring Architecture series makes architectural scholarship accessible introduces the latest research methods and covers a wide range of periods regions and topics Critical reappraisal of early modernism Based on the fable The Emperor and the Architect 1924 by Uriel Birnbaum New volume in the Exploring Architecture series **Pamphlet Entitled 'Gedanken Zur Zeit', by Hermann Finsterlin, Ca. 1972** , The pamphlet is a series of photocopied typed writings mostly in German but some in English written by Finsterlin from 1968 72 Subjects include What is Art and Architecture as Surrealism The final essay entitled Exhibition at Brussels 1970 is written by R L Delevoy Director of the National School of Architecture and Visual Arts Brussels There is a drawing by Finsterlin addressed to Mr James Palmes a postcard of an interior at Schomberg presumably designed by Finsterlin and an unidentified photograph of a museum interior with the pamphlet **Form Follows Nature** Rudolf Finsterwalder, 2015-08-31 No detailed description available for Form Follows Nature *Century of the Child* Juliet Kinchin, Aidan O'Connor, 2012 The book examines individual and collective visions for the material world of children from utopian dreams for the citizens of the future to the dark realities of political conflict and exploitation Surveying more than 100 years of toys clothing playgrounds schools children s hospitals nurseries furniture posters animation and books this richly illustrated catalogue illuminates how progressive design has enhanced the physical intellectual and emotional development of children and conversely how models of children s play have informed experimental aesthetics and imaginative design thinking *The Color of Modernism* Deborah Ascher Barnstone, 2021-12-30 One of the most enduring and pervasive myths about modernist architecture is that it was white pure white walls both inside and out Yet nothing could be further from the truth The Color of Modernism explodes this myth of whiteness by offering a riot of color in modern architectural treatises polemics and buildings Focusing on Germany in the early 20th century one of modernism s most foundational and influential periods it examines the different scientific and artistic color theories which were advanced by members of the German avant garde from Bruno Taut to Walter Gropius to Hans Scharoun German color theory went on to have a profound influence on the modern movement and Germany serves as the key case study for an international phenomenon which encompassed modern architects worldwide from le Corbusier and Alvar Aalto to Berthold Lubetkin and Lina Bo Bardi Supported by accessible introductions to the development of color theory in philosophy science and the arts the book uses the German case to explore the new ways in which color was used in architecture and urban design turning attention to an important yet overlooked aspect of the period Much more than a mere correction to the historical record the

book leads the reader on an adventure into the color filled worlds of psychology the paranormal theories of sensory perception and pleasure showing how each in turn influenced the modern movement The Color of Modernism will fundamentally change the way the early modernist period is seen and discussed *William Lethaby, Symbolism and the Occult* Amandeep Kaur Mann,2022-03-23 This book delves into the life and work of architect William Richard Lethaby 1857 1931 and his relationship with the occult and alchemy in particular Using detailed analysis of Lethaby s drawings and architecture the research uncovers Lethaby s familiarity with occult concepts and ideology during the spiritual revolution of the nineteenth century Throughout this time countless individuals particularly members of the avant garde rejected more traditional religious pathways and sought answers through experimental and mystical alternatives William Lethaby Symbolism and the Occult reveals how the architect was profoundly influenced by the Zeitgeist which was saturated with references to spiritualism mysticism and the occult and explores the impact of occultism on his contemporaries and the wider Arts and Crafts Movement This book is written for upper level students researchers and academics interested in architectural history William Lethaby and nineteenth century culture and society Architect's Drawings Kendra Schank Smith,2006-08-11 The sketch is a window into the architects mind As creative designers architects are interested in how other architects particularly successful ones think through the use of drawings to approach their work Historically designers have sought inspiration for their own work through an insight into the minds and workings of people they often regard as geniuses This collection of sketches aims to provide this insight Here for the first time a wide range of world famous architects sketches from the Renaissance to the present day can be seen in a single volume The sketches have been selected to represent the concepts or philosophies of the key movements in architecture in order to develop an overall picture of the role of the sketch in the development of architecture The book illustrates the work of designers as diverse as Andrea Palladio Erich Mendelsohn Sir Edwin Lutyens Gianlorenzo Bernini Le Corbusier Michelangelo Alvar Aalto Sir John Soane Francesco Borromini Walter Gropius and contemporary architects Tadao Ando Zaha Hadid and Frank Gehry to name but a few Each chronologically placed sketch is accompanied by text providing details about the architect s life a look at the sketch in context and the connection to specific buildings where appropriate Style media and meaning are also discussed developing an explanation of the architect s thinking and intentions As creative designers themselves architects are interested in how other architects particularly successful ones think and draw and approach their work Historically designers have sought inspiration for their own work through an insight into the minds and workings of people they often regard as geniuses This collection of sketches aims to provide this insight Listed chronologically each sketch will be accompanied by a text which provides A short synopsis history of the architect s life a look at the sketch in this context the connection to a specific building where appropriate techniques of the sketch style and media meaning what the sketch shows about the architect s thinking and intentions followed by a select bibliography for each section **Materiality and Architecture** Sandra

Loschke, 2016-03-17 Once regarded a secondary consideration in recent years materiality has emerged as a powerful concept in architectural discourse and practice Prompted in part by developments in digital fabrication and digital science the impact of materiality on design and practice is being widely reassessed and reimagined *Materiality and Architecture* extends architectural thinking beyond the confines of current design literatures to explore conceptions of materiality across the field of architecture Fourteen international contributors use elucidate the problems and possibilities of materiality based approaches in architecture from interdisciplinary perspectives The book includes contributions from the professions of architecture art architectural history theory and philosophy including essays from Gernot Bohme Jonathan Hill and Philip Ursprung Important immaterial aspects such as presentation agency ecology and concept are examined deepening our understanding of materiality's role in architectural processes the production of cultural identities the pursuit of political agendas and the staging of everyday environments and atmospheres In depth illustrated case studies examine works by Herzog de Meuron Zaha Hadid and Lacaton Vassal interspersed with visual essays and interviews with architects such as MVRDV providing a direct connection to practice *Materiality and Architecture* is an important read for researchers and students with an interest in architectural theory and related fields such as art art history or visual and cultural studies

Programs and Manifestoes on 20th-Century Architecture Ulrich Conrads, 1975-11-15 The present volume offers eloquent testimony that many of the master builders of this century have held passionate convictions regarding the philosophic and social basis of their art Nearly every important development in the modern architectural movement began with the proclamation of these convictions in the form of a program or manifesto The most influential of these are collected here in chronological order from 1903 to 1963 Taken together they constitute a subjective history of modern architecture compared with one another their great diversity of style reveals in many cases the basic differences of attitude and temperament that produced a corresponding divergence in architectural style In point of view the book covers the aesthetic spectrum from right to left from programs that rigidly generate designs down to the smallest detail to revolutionary manifestoes that call for anarchy in building form and town plan The documents placed in context by the editor are also international in their range among them are the seminal and prophetic statements of Henry van de Velde Adolf Loos and Bruno Taut from the early years of the century Frank Lloyd Wright's 1910 annunciation of Organic Architecture Gropius's original program for the Bauhaus founded in Weimar in 1919 Towards a New Architecture Guiding Principles by Le Corbusier the formulation by Naum Gabo and Antoine Pevsner of the basic principles of Constructivism and articles by R Buckminster Fuller on universal architecture and the architect as world planner Other pronouncements some in flamboyant style including those of Erich Mendelsohn Hannes Meyer Theo van Doesburg Oskar Schlemmer Ludwig Mies van der Rohe El Lissitzky and Louis I Kahn There are also a number of collective or group statements issued in the name of movements such as CIAM De Stijl ABC the Situationists and GEAM Since the dramatic effectiveness of the manifesto form is usually heightened by brevity and conciseness it has been

possible to reproduce most of the documents in their entirety only a few have been excerpted **New York Magazine**, 1979-02-12 New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country With award winning writing and photography covering everything from politics and food to theater and fashion the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself while celebrating New York as both a place and an idea **The Built, the Unbuilt, and the Unbuildable** Robert Harbison, 1993 Robert Harbison finds meaning in works of architecture that are unnecessary having outlived their physical functions or never having been intended to have any *From Musical Folklore to Twelve-tone Technique* Georg von Albrecht, 2004 His reports of encounters with such composers as Taneyev Glazunov Scriabin Stravinsky Hindemith Frommel and David and his thorough discussion of tonal systems and compositional methods reflect the approach and critical response to many procedures typical of music of the era **Postcards from the Trenches** Allyson Booth, 1996 She links for example the modernist representation of an unstable self to soldiers familiarity with corpses the modernist mistrust for fact to the competing nationalist discourses of August 1914 and the modernist description of buildings as having shaken off the past to a desire to forget the war Booth argues that the dislocations of war often figure centrally in modernist forms even when the war itself seems peripheral to modernist content Expressionism Reassessed Shulamith Behr, David Fanning, Douglas Jarman, 1993 Expressionism reassessed focuses on the multi disciplinary development of Expressionism setting it in a cultural political and historical context The international team of specialists cover painting music theatre sculpture film opera architecture and dance Back cover **Acrobatic Modernism from the Avant-Garde to Prehistory** Jed Rasula, 2020-02-27 This is a book about artistic modernism contending with the historical transfigurations of modernity As a conscientious engagement with modernity's restructuring of the lifeworld the modernist avant garde raised the stakes of this engagement to programmatic explicitness But even beyond the vanguard the global phenomenon of jazz combined somatic assault with sensory tutelage Jazz like the new technologies of modernity re calibrated sensory ratios The criterion of the new as self making also extended to names pseudonyms and heteronyms The protocols of modernism solicited a pragmatic arousal of bodily sensation as artistic resource validating an acrobatic sensibility ranging from slapstick and laughter to the pathos of bereavement Expressivity trumped representation The artwork was a diagram of perception not a mimetic rendering For artists the historical pressures of altered perception provoked new models and Ezra Pound's slogan Make It New became the generic rallying cry of renovation The paradigmatic stance of the avant garde was established by Futurism but the discovery of prehistoric art added another provocation to artists Paleolithic caves validated the spirit of all over composition unframed and dynamic Geometric abstraction Constructivism and Purism and Surrealism were all in quest of a new mythology Making it new yielded a new pathos in the sensation of radical discrepancy between futurist striving and remotest antiquity The Paleolithic cave and the USSR emitted comparable siren calls on behalf of the

remote past and the desired future As such the present was suffused with the pathos of being neither but subject to both

Utopia David Ayers, Benedikt Hjärtarson, Tomi Huttunen, Harri Veivo, 2015-12-14 Utopian hope and dystopian despair are characteristic features of modernism and the avant garde Readings of the avant garde have frequently sought to identify utopian moments coded in its works and activities as optimistic signs of a possible future social life or as the attempt to preserve hope against the closure of an emergent dystopian present The fourth volume of the EAM series European Avant Garde and Modernism Studies casts light on the history theory and actuality of the utopian and dystopian strands which run through European modernism and the avant garde from the late 19th to the 21st century The book's varied and carefully selected contributions written by experts from around 20 countries seek to answer such questions as how have modernism and the avant garde responded to historical circumstance in mapping the form of possible futures for humanity how have avant garde and modernist works presented ideals of living as alternatives to the present how have avant gardists acted with or against the state to remodel human life or to resist the instrumental reduction of life by administration and industrialisation

Drawing Sir Peter Cook, 2014-01-13 Drawing The Motive Force of Architecture Focusing on the creative and inventive significance of drawing for architecture this book by one of its greatest proponents Peter Cook is an established classic It exudes Cook's delight and his wide ranging catholic tastes for the architectural Readers are provided with perceptive insights at every turn The book features some of the greatest and most intriguing drawings by architects ranging from Frank Lloyd Wright William Heath Robinson Le Corbusier and Otto Wagner to Frank Gehry Zaha Hadid Coop Himmelblau Arata Isozaki Eric Owen Moss Bernard Tschumi and Lebbeus Woods as well as key works by Cook and other members of the original Archigram group For this new edition Cook provides a substantial new chapter that charts the speed at which the trajectory of drawing is moving It reflects the increasing sophistication of available software and also the ways in which hand drawing and the digital are being eclipsed by new hybrids injecting drawing with a fresh momentum These crossovers provide a whole new territory as attempts are made to release drawing from the boundaries of a solitary moment a single viewing position or a single referential language Featuring the likes of Toyo Ito Perry Kulper Izaskun Chinchilla Kenny Kinugasa Tsui Ali Rahim John Berglund and Lor ne Faure it leads to fascinating insights into the effect that medium has upon intention and definition of an idea or a place Is a pencil drawing more attuned to a certain architecture than an ink drawing or is a particular colour evocative of a certain atmosphere In a world where a Maya drawing is creatively contributing something different from a Rhinoceros drawing there is much to demand of future techniques

Mars by 1980 David Stubbs, 2018-07-31 Electronic music is now ubiquitous from mainstream pop hits to the furthest reaches of the avant garde But how did we get here In *Mars by 1980* David Stubbs charts the evolution of synthesised tones from the earliest mechanical experiments in the late nineteenth century through the musique concrete of the Futurists and radical composers such as Pierre Schaeffer and Karl Stockhausen to the gradual absorption of electronic instrumentation into the

mainstream be it through the BBC Radiophonic Workshop grandiose prog rock or the DIY approach of electronica house and techno Stubbs tells a tale of mavericks and future dreamers malfunctioning devices and sonic mayhem But above all he describes an essential story of authenticity is this music Mars by 1980 is the definitive account that answers this question

The Story of Follies Celia Fisher,2022-11-28 A beautifully illustrated history of these quirky ornamental buildings in gardens across the globe Are they frivolous or practical Follies are buildings constructed primarily for decoration but they suggest another purpose through their appearance In this visually stunning book Celia Fisher describes follies in their historical and architectural context looks at their social and political significance and highlights their relevance today She explores follies built in protest follies in Oriental and Gothic styles animal related follies waterside follies and grottoes and finally follies in glass and steel Featuring many fine illustrations from historical paintings to contemporary photographs and prints and taking in follies from Great Britain to Ireland throughout Europe and beyond The Story of Follies is an amusing and informative guide to fanciful charming buildings

Modern Architecture Alan Colquhoun,2002-04-25 This new account of international modernism explores the complex motivations behind this revolutionary movement and assesses its triumphs and failures The work of the main architects of the movement such as Frank Lloyd Wright Adolf Loos Le Corbusier and Mies van der Rohe is re examined shedding new light on their roles as acknowledged masters Alan Colquhoun explores the evolution of the movement from Art Nouveau in the 1890s to the megastructures of the 1960s revealing the often contradictory demands of form function social engagement modernity and tradition
