## Hero Nation:

The Republican Hero Michael Lusztig, 2023-11-01 Politically speaking do heroes matter Are we living in a post heroic age The Republican Hero addresses both these questions The general tenor of modern thinking is that heroes do matter but that the modern age is characterized by a narrowing of moral horizons once illuminated by heroes secular and spiritual Michael Lusztig argues that the modern world is not post heroic He makes the case that the modern age is the most heroic age if measured in terms of the Aristotelian currency of balance and completeness To this end he identifies four main hero types the epic magnanimous Romantic and common Each can rightfully be called a republican hero each contributes to the promotion or protection or provision of republican values Each exemplifies the heroic virtues of their age However taken conjunctively each contributes to what Lusztig conceives as the complete republican hero of the modern age **Daily Report, Foreign Radio Broadcasts** United States. Federal Communications Commission, 1945-05 The language of empire Robert Macdonald, 2017-03-01 The debate about the Empire dealt in idealism and morality and both sides employed the language of feeling and frequently argued their case in dramatic terms This book opposes two sides of the Empire first as it was presented to the public in Britain and second as it was experienced or imagined by its subjects abroad British imperialism was nurtured by such upper middle class institutions as the public schools the wardrooms and officers messes and the conservative press The attitudes of 1916 can best be recovered through a reconstruction of a poetics of popular imperialism The case study of Rhodesia demonstrates the almost instant application of myth and sign to a contemporary imperial crisis Rudyard Kipling was acknowledged throughout the English speaking world not only as a wonderful teller of stories but as the singer of Greater Britain or as the Laureate of Empire In the last two decades of the nineteenth century the Empire gained a beachhead in the classroom particularly in the coupling of geography and history The Island Story underlined that stories of heroic soldiers and fights for the flag were easier for teachers to present to children than lessons in morality or abstractions about liberty and responsible government The Education Act of 1870 had created a need for standard readers in schools readers designed to teach boys and girls to be useful citizens The Indian Mutiny was the supreme test of the imperial conscience a measure of the morality of the master nation **The Nation** , 1925 *Turkey Today* , 1977 Building the Kingdom of God on Earth Martin Erdmann, 2005-03-31 In his book Building the Kingdom of God on Earth Dr Erdmann deals primarily with John Foster Dulles participation in the ecumenical movement from 1919 to 1945 Dulles role in shaping the religious economic and political policies of the Federal Council of Churches in its support of world order and peace especially in his function as chairman of the Commission on a Just and Durable Peace was crowned with success in the founding of the United Nations Organisation in 1945 His personal friends Philip Kerr Lord Lothian and Lionel Curtis the principal leaders of the Round Table Group come into the pictures at various times By and large they pursued the same objectives as those of Dulles The book shows the detailed influence of the Round Table Group and its affiliated organisations

**Patriotism Through Education Series** National Security League, 1918 **Harvey's Weekly** George Brinton McClellan Harvey, 1921 The Weekly George Brinton McClellan Harvey, 1919 **The Historians' History of the World Vol.3 (of 25) (Illustrations)** Henry Smith Williams, The history of Greek civilisation forms the centre of the history of antiquity In the East advanced civilisations with settled states had existed for thousands of years and as the populations of Western Asia and of Egypt gradually came into closer political relations these civilisations in spite of all local differences in customs religion and habits of thought gradually grew together into a uniform sphere of culture This development reached its culmination in the rise of the great Persian universal monarchy the kingdom of the lands i e of the world But from the very beginning these oriental civilisations are so completely dominated by the effort to maintain what has been won that all progress beyond this point is prevented And although we can distinguish an individual active and progressive intellectual movement among many nations as in Egypt among the Iranians and Indians while among the Babylonians and Phoenicians nothing of the sort is thus far known nevertheless the forces that represent tradition are in the end everywhere victorious over it and force it to bow to their yoke Hence all oriental civilisations culminate in the creation of a theological system which governs all the relations and the whole field of thought of man and is everywhere recognised as having existed from all eternity and as being inviolable to all future time With the cessation of political life and the establishment of the universal monarchy the nationality and the distinctive civilisation of the separate districts are restricted to religion which has become

theology The development of oriental civilisation then subsides in the competition of these religions and the unavoidable coalescence consequent thereupon This is true even of that nation which experienced the richest intellectual development and did the most important work of all oriental peoples the Israelites When the great political storms from which the universal monarchy arose have spent their rage Israel the nation has developed into Judaism and under the Persian rule and with the help of the kingdom it organises itself as a church which seeks to put an end to all free individual movement upon which the greatness of ancient Israel rests It was just the same with the ruling nation the Persians however vigorous their entrance into history under Cyrus The Persian kingdom is indeed a civilised state but the civilisations that it includes lack the highest that a civilisation can offer an energetic independent life a combination of the firm institutions and permanent attainments of the past with the free progressive and creative movement of individuality So the East after the Persian period was unable of its own force to create anything new It stagnated and had it not received new elements from without had it been left permanently to itself would perhaps in the course of centuries have altered its external form again and again but would hardly have produced anything new or have progressed a step beyond what had already been attained But when Cyrus and Darius founded the Persian kingdom the East no longer stood alone The nations and kingdoms of the East came into communication with the coast of the Mediterranean very early not later than the beginning of the second millennium B C and under their influence about 1500 B C a civilisation arose among the Greeks bordering the gean We call it the Mycen an and in spite of its formal dependence upon the East it could in the field of art where alone we have an exact knowledge of it take an independent and equal place beside the great civilisations of the East Blackwood's Magazine ,1856 **Strangers in the Land** Eric J Sundquist,2009-06-30 The importance of blacks for Jews and Jews for blacks in conceiving of themselves as Americans when both remained outsiders to the privileges of full citizenship is a matter of voluminous but perplexing record A monumental work of literary criticism and cultural history Strangers in the Land draws upon politics sociology law religion and popular culture to illuminate a vital highly conflicted interethnic partnership over the course of a century

Blackwood's Edinburgh Magazine ,1856 **The Fear and the Freedom** Keith Lowe,2017-10-24 Bestselling historian Keith Lowe s The Fear and the Freedom looks at the astonishing innovations that sprang from WWII and how they changed the world The Fear and the Freedom is Keith Lowe s follow up to Savage Continent While that book painted a picture of Europe in all its horror as WWII was ending The Fear and the Freedom looks at all that has happened since focusing on the changes that were brought about because of WWII simultaneously one of the most catastrophic and most innovative events in history It killed millions and eradicated empires creating the idea of human rights and giving birth to the UN It was because of the war that penicillin was first mass produced computers were developed and rockets first sent to the edge of space The war created new philosophies new ways of living new architecture this was the era of Le Corbusier Simone de Beauvoir and Chairman Mao But amidst the waves of revolution and idealism there were also fears of globalization a dread of the atom

bomb and an unexpressed longing for a past forever gone All of these things and more came about as direct consequences of the war and continue to affect the world that we live in today The Fear and the Freedom is the first book to look at all of the changes brought about because of WWII Based on research from five continents Keith Lowe s The Fear and the Freedom tells the very human story of how the war not only transformed our world but also changed the very way we think about ourselves
