**Connectivity of nature in the Nordic countries (CONNOR)** ,2007 The Explorer's Roadmap to National-Socialism Sarah K. Danielsson,2016-03-16 Whilst terms such as Lebensraum are commonly associated with National Socialist ideology of the 1930s and 40s ideas of racial living space were in fact generated in the previous decades by an international geographic community of explorers and academics Focusing on one of the most influential figures within this group Sven Hedin this is the first study that systematically connects the geographic community to the intellectual history of the development of National Socialist ideology and genocidal practices The book demonstrates how colonial racial and nationalistic policies were often spearheaded by explorers and geographers such as Hedin In Germany Britain France and

Russia their positions as publicly recognized authors and reputable academics made them highly influential with politicians. Whilst this influence was to become most visible within Hitler's Germany the debates were not by any means restricted to or even originated in Germany. Germany was the home of some of the most prominent geographers but this scientific community had a tradition of international debate and exchange with especially British, French and Russian geographic societies and institutions. Many issues that were later discussed and championed by National Socialist ideology were aired and debated in this international setting raising important questions about the international character and impact of National Socialism. Tracing the intellectual history of the international geographic community and its relationship to National Socialism this study provides an assessment of Hedin's close involvement with the Nazi elite as a culmination of decades of political and scientific work. In so doing the book uncovers a long ignored or overlooked important connection between exploration geographers and genocide.

*Monitoring Food Waste and Loss in the Nordic region: Definitions, methods and measures for prevention* Hanssen, Ole Jørgen, Östergren, Karin, Hartikainen, Hanna, Andersson, Tova, 2021-03-26 Available online <https://pub.norden.org/temanord2021/504> The background for the project is that EU Commission has introduced new regulations and policies for food waste prevention and monitoring. Sweden and Denmark link their reporting closely to the waste framework directive while Finland and Norway base their most data collection on voluntary reporting. Norway and Finland report on a detailed level and estimate impact like costs and GHG emissions. All Nordic countries have necessary detail in data that are measured to fulfil the requirements set by the purpose of food waste monitoring program. Halving food waste by 2030 calls for radical changes in the food chain. These radical changes require four dimensions: technology push, societal pull, market pull and regulatory push. Based on these four dimensions we have classified measures to reduce food waste into four topics: Policy instruments, changing social norms, nudging and changing practices, and intelligent technology and new products/business models.

**Tourism, nature and sustainability** Høgne Øian, Peter Fredman, Klas Sandell, Anna Dóra Sæþórsdóttir, Liisa Tyrväinen, Frank Søndergaard Jensen, 2018-05-24 Recently the Nordic countries have experienced a rapid growth in numbers of visitors. At some popular nature attractions this has resulted in crowding, environmental damage, costly rescue operations and overload on public infrastructure. Implementation of economic policy instruments have hence been suggested to secure a more sustainable development. While the applicability of e.g. entrance fees is restricted by the public rights of access, economic instruments tend to represent short-sighted solutions. Sustainable development requires holistic policies which take environmental, social and economic aspects into consideration in a long-term perspective. To achieve a more sustainable development of tourism it is suggested that a limited use of economic instrument should take place in combination with adaptive management strategies and available legal and administrative instruments.
