Fire- and Smoke-Resistant Interior Materials for Commercial Transport Aircraft National Research Council,Division on Engineering and Physical Sciences,National Materials Advisory Board,Commission on Engineering and Technical Systems,Committee on Fire and Smoke Resistant Materials for Commercial Aircraft Interiors,1996-01-19 The two principal objectives of this book were 1 to identify promising materials technologies design issues both overall and for individual components and fire

performance parameters both full scale and for individual components that if properly optimized would lead to improved fire and smoke resistance of materials and components used in aircraft interiors and 2 to identify long range research directions that hold the most promise for producing predictive modeling capability new advanced materials and the required product development to achieve totally fire resistant interiors in future aircrafts The emphasis of the study is on long term innovation leading to impacts on fire worthiness of aircraft interiors ten to twenty years hence
