Anatomists of Empire Ross L Jones, 2020-04-17 The 20th century anatomists Grafton Elliot Smith Frederic Wood Jones and Arthur Keith travelled the globe collecting cataloguing and constructing morphologies of the biological world with the aim of weaving these into a new vision of bio ecology that links humans to their deep past as well as their evolutionary niche They dissected human bodies and scrutinised the living explaining for the first time the intricacies of human biology They placed the body in its environment and gave it a history thus creating an ecological synthesis in striking contrast to the model of humanity that they inherited as students Their version of human development and history profoundly influenced public opinion as they wrote prolifically for the press they published bestsellers on human origins and evolution they spoke eloquently at public meetings and on the radio They wanted their anatomical insight to shape public policy And by changing popular views of race and environment they moulded attitudes as to what it meant to be human in a post Darwinian world thus providing a potent critique of racism **Grafton Elliot Smith**, 1974 *Mummies, magic and medicine in ancient Egypt* Campbell Price, Roger Forshaw, Andrew Chamberlain, Paul Nicholson, 2016-06-17 This volume published in honour of Egyptologist Professor Rosalie David OBE presents the latest research on three of the most important aspects of ancient Egyptian civilisation mummies magic and medical practice Drawing on recent archaeological fieldwork new research on human remains reassessments of ancient texts and modern experimental archaeology it attempts to answer some of Egyptology's biggest questions how did Tutankhamun die How were the Pyramids built How were mummies made Leading experts in their fields combine traditional Egyptology and innovative scientific approaches to ancient material The result is a cutting edge overview of the discipline showing how it has developed over the last forty years and yet how many of its big questions remain the same **Who Was Who in Egyptology** Morris L. Bierbrier, 2021-12-31 The civilization of ancient Egypt has been a source of fascination for explorers and scholars for centuries and has occupied a special place in the imagination of the public ever since early travellers descriptions and illustrations of the strange culture of temples tombs and hieroglyphs began to circulate around the world The story of Egyptology from a hobby for the educated and wealthy to a highly formalized academic discipline provides the key to understanding how and why we know what we know about ancient Egypt This biographical dictionary tells the stories of the most important contributors and will be an indispensable reference tool for scholars and enthusiasts alike Who Was Who in Egyptology remains one of the most important reference works for understanding the characters that contributed to the field of Egyptology and Egyptian archaeology from the Napoleonic invasion of Egypt through to the present day The fifth edition bring entries up to 2019 and is expected to be the last volume produced in print **Antiquity Imagined** Robin Derricourt, 2015-06-26 Outsiders have long attributed to the Middle East and especially to ancient Egypt meanings that go way beyond the rational and observable The region has been seen as the source of civilization religion the sciences and the arts but also of mystical knowledge and outlandish theories whether about

the Lost City of Atlantis or visits by alien beings In his exploration of how its past has been creatively interpreted by later ages Robin Derricourt surveys the various claims that have been made for Egypt particularly the idea that it harbours an esoteric wisdom vital to the world's survival He looks at alternative interpretations of the pyramids from maps of space and time to landing markers for UFOs at images of the Egyptian mummy and at the popular mythology of the pharaoh's curse and at imperialist ideas of racial superiority that credited Egypt with spreading innovations and inventions as far as the Americas Australia and China Including arcane ideas about the Lost Ten Tribes of biblical Israel the author enlarges his focus to include the Levant His book is the first to show in depth how ancient Egypt and the surrounding lands have so continuously and seductively tantalised the Western imagination *Views of Ancient Egypt Since Napoleon Bonaparte* David

Jeffreys,2016-06-16 In a combination of case studies and discursive chapters the status of Egypt as an important example of traditional Asian scholarship and as an ancient model of imperialism itself is examined *Creating Prehistory* Adam

Stout,2009-04-22 *Creating Prehistory* deals even handedly and sympathetically with the creation of several different sorts of prehistory during the volatile period between the two World Wars Investigates the origins of professional archaeology in Britain during the inter war period Brings to life many fascinating and controversial personalities and their creeds including the archaeologists O G S Crawford Mortimer Wheeler and Gordon Childe Grafton Elliot Smith and W H R Rivers of Regeneration fame Alfred Watkins and The Old Straight Track and the thunderous George Watson Macgregor Reid who brought the Druids back to Stonehenge Examines the production of archaeological knowledge as a social process and the relationship between personalities institutions ideology and power Addresses the ongoing debates of the significance of sites such as Stonehenge Avebury and Maiden Castle **Ancient Egypt in the Modern Imagination** Eleanor Dobson, Nichola

Tonks,2020-01-23 Ancient Egypt has always been a source of fascination to writers artists and architects in the West This book is the first study to address representations of Ancient Egypt in the modern imagination breaking down conventional disciplinary boundaries between fields such as History Classics Art History Fashion Film Archaeology Egyptology and Literature to further a nuanced understanding of ancient Egypt in cultures stretching from the eighteenth century to the present day emphasising how some of the various meanings of ancient Egypt to modern people have traversed time and media Divided into three themes the chapters scrutinise different aspects of the use of ancient Egypt in a variety of media looking in particular at the ways in which Egyptology as a discipline has influenced representations of Egypt ancient Egypt's associations with death and mysticism as well as connections between ancient Egypt and gendered power The diversity of this study aims to emphasise both the multiplicity and the patterning of popular responses to ancient Egypt as well as the longevity of this phenomenon and its relevance today *Handbook of Forensic Anthropology and Archaeology* ,2009

*Handbook of Forensic Anthropology and Archaeology* Soren Blau, Douglas H. Ubelaker,2016-07-28 With contributions from 70 experienced practitioners from around the world this second edition of the authoritative Handbook of Forensic

Archaeology and Anthropology provides a solid foundation in both the practical and ethical components of forensic work. The book weaves together the discipline's historical development, current field methods for analyzing crime, natural disasters, and human atrocities; an array of laboratory techniques; key case studies involving legal, professional, and ethical issues; and ideas about the future of forensic work, all from a global perspective. This fully revised second edition expands the geographic representation of the first edition by including chapters from practitioners in South Africa and Colombia and adds exciting new chapters on the International Commission on Missing Persons and on forensic work being done to identify victims of the Battle of Fromelles during World War I. The Handbook of Forensic Anthropology and Archaeology provides an updated perspective of the disciplines of forensic archaeology and anthropology.

**The Origins of Chinese Civilization** David N. Keightley, 2023-11-15. The seventeen contributors to this interdisciplinary volume bring to the study of early China the analytical concerns of archaeology, art history, botany, climatology, cultural and physical anthropology, ethnography, epigraphy, linguistics, metallurgy, and political and social history. Readers interested in such topics as the origin of rice or millet, agriculture, the origin of writing, the nature of the tribe, and the processes of state formation will find much value here. They will find too major hypotheses about the cultural importance of ecogeographical zones in China, Neolithic interaction between the east coast and Central Plains, the remarkable homogeneity of early Chinese crania, and the links between the Hsia, Shang, and Chou dynasties. Relying on recently published archaeological evidence and the insights gained from carbon 14 and thermoluminescent datings, the authors provide original and significant interpretations of the nature of Chinese civilization in its formative stage and the processes by which civilizations form. Since there is little doubt that the complex of culture traits which defines Chinese civilization in the second and first millennia B.C. developed from a Chinese Neolithic stage, the origin of the Chinese civilization is worth studying not only in its own right but as an instance of the indigenous development of civilizations in general. This volume will appeal to all who are interested in the genesis of civilization and the transition from the Neolithic to the Bronze Age; it summarizes that state of present knowledge about China and suggests research strategies and hypotheses for the future.

**Black Athena** Martin Bernal,2020-02-14 Winner of the 1990 American Book Award What is classical about Classical civilization In one of the most audacious works of scholarship ever written Martin Bernal challenges the foundation of our thinking about this question Classical civilization he argues has deep roots in Afroasiatic cultures But these Afroasiatic influences have been

systematically ignored denied or suppressed since the eighteenth century chiefly for racist reasons The popular view is that Greek civilization was the result of the conquest of a sophisticated but weak native population by vigorous Indo European speakers Aryans from the North But the Classical Greeks Bernal argues knew nothing of this Aryan model They did not see their institutions as original but as derived from the East and from Egypt in particular In an unprecedented tour de force Bernal links a wide range of areas and disciplines drama poetry myth theological controversy esoteric religion philosophy biography language historical narrative and the emergence of modern scholarship **From Jail to Jail** Tan
