Handbook of Drug'Nutrient Interactions Joseph I. Boullata, Vincent T. Armenti, 2004-04-17 Although there is a great deal of literature regarding drug nutrient interactions DNI there are limited sources of up to date comprehensive information The Handbook of Drug Nutrient Interactions admirably fills this gap The editors Dr Joseph I Boullata and Dr Vincent T Armenti have a wealth of experience in this therapeutic area and have assembled a fine cadre of chapter authors who have individually contributed their high level of expertise As treatment for many diseases becomes increasingly complex with multiple drug therapies scheduled at varying times the need to identify clinically significant DNI is an essential part of medication management This is a shared responsibility between health care professionals to interpret available data and individualize an approach to therapy that is compatible with the patient's disease state life stage and dietary intake Awareness of the significance of drug food interactions is generally lacking Although many texts contain lengthy lists of possible interactions few data are provided for the clinician to gain an understanding of the mechanism of action of the interaction and subsequently apply the information to a particular patient or group of patients For example in the management of patients with HIV/AIDS who are taking complex prescribed drug regimens herbal products and nutritional supplements many of which are affected by dietary intake careful attention to DNI is a critical component of therapy Clinicians need to take account of not only the well documented interactions between drugs and nutrients but also the less obvious effects on drug nutrient disposition and metabolism

use side effects and herbal drug interactions in the pediatric oncology population

Material and methods A comprehensive review of the Medline Embase and Cochrane databases was conducted and the search was defined by the terms u201cherbalu201d u201cprevalenceu201d u201cherbal drug interactionu201d and u201cpediatric oncologyu201d

Inclusion criteria were primary studies involving children younger than the age of 18 years with cancer using herbal drugs as an integrative approach

Exclusion criteria included no pediatric oncology outcomes

Results No data are available in Portugal for herbal products use by children

Prevalence of CAM use by children in Europe was 52%

Induction of drug metabolizing enzymes can be one of the mechanisms behind CAMu2013anticancer drug interactions

Kava kava vitamin E quercetin ginseng garlic u03b2 carotene and echinacea interact with anti cancer drugs

Conclusion Chemotherapeutic drugs have a narrow therapeutic window which increases the risk of clinically relevant herb drug interactions with unexpected toxicities and possible undertreatment seen in cancer children

It is important that pediatricians be aware of this fact and encourage open communication with patients and their parents

More scientific evidence on the subject are imperative to prevent therapeutic failure and toxicity

Evidence-based Anticancer Materia Medica William Cho,2013-04-21

Cancer is one of the leading killers in the world and the incidence is increasing but most cancer patients and cancer survivors suffer much from the disease and its conventional treatments side effects

In the past clinical data showed that some complementary and alternative medicine CAM possessed anticancer abilities but some clinicians and scientists have queried about the scientific validity of CAM due to the lack of scientific evidence

There is great demand in the knowledge gap to explore the scientific and evidence based knowledge of CAM in the anticancer field

With this aim a book series is needed to structurally deliver the knowledge to readers

Recently there have been encouraging results from both laboratory experiments and clinical trials demonstrating the anticancer effects of herbal medicine

There is considerable interest among oncologists and cancer researchers to find anticancer agents in herbal medicine

This volume is a specialised book presenting the up to date scientific evidence for anticancer herbal medicine

This unique book provides an overview of the anticancer herbal medicines and remedies as well as a detailed evidence based evaluation of 18 common anticancer herbal medicines covering their biological and pharmacological properties efficacies herb drug interactions adverse effects pre clinical studies and clinical applications

Gathering international opinion leaders views this volume will contribute great to the cancer academic and clinical community by providing evidence based information on the anticancer efficacy of herbal medicine
