Heredity And Visual Development Cell And Developmental Biology Of The Eye:

Heredity and Visual Development Joel B. Sheffield, S. Robert Hilfer, 2012-12-06 The eye has fascinated scientists from the earliest days of biological investigation. The diversity of its parts and the precision of their interaction make it a favorite model system for a variety of developmental studies. The eye is a particularly valuable experimental system not only because its tissues provide examples of fundamental processes but also because it is a prominent and easily accessible structure at very early embryonic ages. In order to provide an open forum for investigators working on all aspects of ocular development, a series of symposia on ocular and visual development was initiated in 1973. A major objective of the symposia has been to foster communication between the basic research worker and the clinical community. It is our feeling that much can be learned on both sides from this interaction. The idea for an informal meeting allowing maximum exchange of ideas originated with Dr. Leon Candeub, who supplied the necessary driving force that made the series a reality. Each symposium has concentrated on a different aspect of ocular development. Speakers have been selected to approach related topics from different perspectives. **Current Catalog** National Library of Medicine (U.S.), First multi year cumulation covers six years 1965-70

Night Vision R. F. Hess, L. T. Sharpe, K. Nordby, 1990-09-27 This detailed 1990 book describes the light and dark adaptation of receptor and post receptor mechanisms from a number of perspectives. The authors emphasize the importance of the study of achromatopsia, a rare congenital condition in which the visual mechanisms that mediate day vision are absent whilst those that mediate night vision remain intact. *Current Catalog*, 1986 First multi year cumulation covers six years 1965-70 **Investigative Ophthalmology & Visual Science**, 2009 Acta Ophthalmologica Anja Ihalaenen, 1986 **Scientific Directory and Annual Bibliography** National Institutes of Health (U.S.), 1986 **Research**
