Heritage Of The Sea:

Heritage of the Sea Peter Charles Smith, 1974 *Our Heritage the Sea* Frank Thomas Bullen, 1906 The Heritage of the Sea Sea Bright (N.J.), 1972 **World heritage in the high seas** Freestone, David, Laffoley, Dan, Douvere, Fanny, Badman, Tim, IUCN, 2016-08-08 **International Law of Underwater Cultural Heritage** Kim Browne, Murray Raff, 2023-01-01 This book brings together three distinct areas of International Law namely Environmental Heritage and Ocean Law to address the international legal protection of historically significant wrecks with particular focus on the environmental hazards they may pose The confluence of Heritage Law and the Law of the Sea with International Environmental Law represents an important development in international governance strategies for the twenty first century in particular those legal and administrative regimes that concern the world s oceans and underwater cultural heritage protection Importantly connections between international legal regimes such as the 1982 Law of the Sea and institutions like the International Maritime Organisation IMO and United Nations Education Scientific Cultural Organisation UNESCO can play a crucial part in governance strategies that involve the regulation of marine pollution and historic shipwrecks *The Nature of Cultural Heritage, and the Culture of Natural Heritage* David Lowenthal, Kenneth Olwig, 2013-10-18 The idea that the heritage of nature is fundamentally cultural is provocative to many but it is becoming increasingly accepted in the context of heritage preservation It is argued here that a person s perspective on natural vs cultural heritage as a contested patrimony is to some extent governed by one s intellectual and geographical position In discourses influenced by the natural sciences culture is a heritage of nature whereas in those deriving from the humanities and social sciences nature is defined socio culturally There is also however a geographical dimension to how one looks at the nature culture relation From at least the time of Aristotle the North has been identified with a cultural heritage thought to derive from the northern natural environment It was no longer culture as represented by the architectural monuments of the South but the natural landscape that provided the measure for both natural and cultural heritage as the natural landscape and its ecosystems were put in focus This essay provides a contemporary picture of the long standing contestation between natural and cultural heritage that provided the basis for the northern perspective taken in these essays This book was previously published as a special issue of The International Journal of Heritage Studies **The 1972 World Heritage Convention** , 2023-10-02 Almost fifty years have passed since the adoption of the Convention Concerning the Protection of the World Cultural and Natural Heritage the UNESCO World Heritage Convention With its 194 States Parties it is the most widely ratified convention within the family of UNESCO treaties on the protection of cultural heritage The success of this Convention and its almost universal acceptance by the international community of states is due to the great appeal that recognising certain properties as world heritage has for national governments Since the publication of the first Commentary new problems have arisen in the management of world heritage sites It has become increasingly difficult to properly monitor the conservation of the ever

growing mass of sites inscribed in the World Heritage List and to resolve disputes over the formal designation of contested world heritage properties a problem that has led to the withdrawal of the United States and Israel from UNESCO New frontiers are now being explored for the expansion of the world heritage idea over marine areas beyond national jurisdiction and the monopoly of the State in the identification delineation and presentation of world heritage properties is being increasingly challenged in the name of indigenous peoples rights and by local communities claiming ownership over contested cultural sites At the same time the regime of world heritage protection has infiltrated other areas of international law especially international economic law investment arbitration and the area of international criminal law This second edition critically examines the World Heritage Convention against this dynamic evolution of international heritage law to help academics lawyers diplomats and officials interpret and apply the norms of the Convention after half a century of uninterrupted implementing practice by State Parties and Treaty Bodies

The Palgrave Handbook of Blue Heritage
Rosabelle Boswell, David O'Kane, Jeremy Hills, 2022-06-15 This handbook is unique in its consideration of social and cultural contributions to sustainable oceans management It is also unique in its deconstruction of the hegemonic value attached to the oceans and in its analysis of discourses regarding what national governments in the Global South should prioritise in their oceans management strategy Offering a historical perspective from the start the handbook reflects on the confluence of western scientific discourse and colonialism and the impact of this on indigenous conceptions of the oceans and on social identity With regard to the latter the authors are mindful of the nationalisation of island territories worldwide and the impact of this process on regional collaboration cultural exchange and the valuation of the oceans Focusing on global examples the handbook offers a nuanced region relevant contemporary conceptualisation of blue heritage discussing what will be required to achieve an inclusive oceans economy by 2063 the end goal date of the African Union's Agenda 2063 The analysis will be useful to established academics in the field of ocean studies policymakers and practitioners engaged in research on the ocean economy as well as graduate scholars in the ocean sciences

The Protection of the Underwater Cultural Heritage Roberta Garabello, Tullio Scovazzi, 2021-10-18 The 2001 UNESCO Convention on the Protection of the Underwater Cultural Heritage represents a major step forward in the field of international law New archaeological rules as well as a comprehensive co operation system among the States concerned are set up by the new Convention Despite the negative attitude assumed by few States at the moment of voting for the text of the Convention this new international instrument is welcome by the great majority of States This volume focuses on the main aspects of the Convention It is divided in two parts to describe the situation before and after the adoption and the forthcoming into force of the Convention In the first part the contradictions resulting from the regime established under the 1982 United Nations Convention on the Law of the Sea are analysed together with the undesirable results of the application of the rules of admiralty law of salvage and law of finds to the underwater cultural heritage In the second part the negotiation process is described both in its general aspects the myths

surrounding the draft and in its specific results the drafting of each single provision The Future of the World Heritage Convention for Marine Conservation UNESCO,2016-12-26 England's Coastal Heritage Michael Fulford,Timothy Champion,Antony Long,2013-04-15 England s coastal zone contains an important legacy of historic assets including a complex array of fragile and irreplaceable archaeological remains This report documents the recorded coastal archaeological resource and identifies future themes for survey and investigation *Climate Change and Cultural Heritage* Roger-Alexandre Lefèvre,Cristina Sabbioni,2010

The Concept of the Common Heritage of Mankind in International Law Kemal Baslar,1998 The concept of the common heritage of mankind is one of the most extraordinary developments in recent intellectual history and one of the most revolutionary and radical legal concepts to have emerged in recent decades The year 1997 marks the thirtieth anniversary of the advent of the concept in the domain of public international law Ever since its emergence it has become evident that no other concept notion principle or doctrine has brought as much intensive debate controversy confrontation and speculation as the common heritage phenomenon did This is because it is a philosophical idea that questions the regimes of globally important resources regardless of their situation and requires major changes in the world to apply its provisions In other words the application and enforcement of the common heritage of mankind require a critical reexamination of many well established principles and doctrines of classical international law such as acquisition of territory consent based sources of international law sovereignty equality resource allocation and international personality This book aims to explore the legal theory and implications of the concept of the common heritage of mankind It addresses almost all aspects of the concept in the light of the experience of three decades The author takes into account the elements of the common heritage concept in the fields of jurisprudence outer space law the law of the sea the law of Antarctica international environmental law human rights and general principles of public international law It tries to develop a normative framework through which the concept may offer alternatives for the governance of the global commons Gullah Geechee Heritage in the Golden Isles Amy Lotson Roberts,Patrick J. Fladmark, Thor Heyerdahl, 2015-11-17 Was the shaping of nation states in Northern Europe governed by military might or by Christian and democratic ideals How has trade and cross cultural exchange between Scandinavia and the British Isles shaped our historic identities and what about the impact of global politics and marketing in recent times These are some of the questions explored by the contributors in the context of forces that shape national identities today Their analysis highlights the need for historical awareness when developing future cultural policy brand profiles and marketing strategies Looking back Jesse Byock tells how democracy was first embraced in the north by the early settlers of Iceland Bjorn Myhre delves into the unpredictability of historical interpretation Edward Cowan discusses the role of battles and beddings in relations across the North Sea John Purkis writes about William Morris fascination with Nordic culture Stephen Harrison presents the winning ways of product development and marketing by Manx National Heritage whilst Chris Powell looks at Cool Britannia today and Simon Anholt at national branding strategies This is an inspirational book that sheds new light on old subjects equally relevant for both public and private sector policy makers alike *The Ethics of Cultural Heritage* Tracy Ireland, John Schofield, 2014-11-01 It is widely acknowledged that all archaeological research is embedded within cultural political and economic contexts and that all archaeological research falls under the heading heritage Most archaeologists now work in museums and other cultural institutions government agencies non government organisations and private sector companies and this diversity ensures that debates continue to proliferate about what constitutes appropriate professional ethics within these related and relevant contexts Discussions about the ethics of cultural heritage in the 20th century focused on standards of professionalism stewardship responsibilities to stakeholders and on establishing public trust in the authenticity of the outcomes of the heritage process This volume builds on recent approaches that move away from treating ethics as responsibilities to external domains and to the discipline and which seek to ensure ethics are integral to all heritage theory practice and methods The chapters in this collection chart a departure from the tradition of external heritage ethics towards

a broader approach underpinned by the turn to human rights issues of social justice and the political economy of heritage conceptualising ethical responsibilities not as pertaining to the past but to a future focused domain of social action
