Heroes Without Legacy American Airwomen 1912 1944:

The Rhetorical Arts of Women in Aviation, 1911-1970 Sara Hillin, 2019-12-16 This book explores the rhetorical strategies employed by women involved in aviation between 1911 and 1970 It begins with Harriet Quimby who began writing aviation themed articles for Frank Leslie's Weekly in 1911 and ends with Jerrie Cobb who lobbied to include women in the space program *American Women and Flight Since 1940* Deborah G. Douglas, 2004 Kentucky is most commonly associated with horses tobacco fields bourbon and coal mines There is much more to the state though than stories of feuding families and Colonel Sanders famous fried chicken Kentucky has a rich and often compelling history and James C Klotter and Freda C Klotter introduce readers to an exciting story that spans 12 000 years looking at the lives of Kentuckians from Native Americans to astronauts The Klotters examine all aspects of the state's history its geography government social life cultural achievements education and economy A Concise History of Kentucky recounts the events of the deadly frontier wars of the state's early history the divisive Civil War and the shocking assassination of a governor in 1900 The book tells of Kentucky's leaders from Daniel Boone and Henry Clay to Abraham Lincoln Mary Breckinridge and Muhammad Ali The authors also highlight the lives of Kentuckians both famous and ordinary to give a voice to history The Klotters explore Kentuckians accomplishments in government medicine politics and the arts They describe the writing and music that flowered across the state and they profile the individuals who worked to secure equal rights for women and African Americans The book explains what it was like to work in the coal mines and explains the daily routine on a nineteenth century farm The authors bring Kentucky's story to the twenty first century and talk about the state's modern economy where auto manufacturing jobs are replacing traditional agricultural work A collaboration of the state historian and an experienced educator A Concise History of Kentucky is the best single resource for Kentuckians new and old who want to learn more about the past present and future of the Bluegrass State **Ethics and Representation in Feminist Rhetorical Inquiry** Amy Dayton, Jennie

Vaughn, 2021-09-21 The historiography of feminist rhetorical research raises ethical questions about whose stories are told and how Women and other marginalized people have been excluded historically from many formal institutions and researchers in this field often turn to alternative archives to explore how women have used writing and rhetoric to participate in civic life share their lived experiences and effect change Such methods may lead to innovation in documenting practices that took place in local grassroots settings The chapters in this volume present a frank conversation about the ways in which feminist scholars engage in the work of recovering hidden rhetorics and grapple with the ethical challenges raised by this recovery work **The Airplane in American Culture** Dominick Pisano, 2003 A fascinating account of America's relationship with the airplane *From Birdwomen to Skygirls* Fred Erisman, 2009-11-30 Close on the heels of the American public's early enthusiasm over the airplane came aviation stories for the young From 1910 until the early 1960s they exalted flight and painted the airplane as the most modern and adventuresome of machines Most of the books were directed at boys

however a substantial number sought a girls audience Erisman s account of several aviation series and other aviation books for girls fills a gap in the history and criticism of American popular culture It examines the stories of girls who took to the sky of the sources where authors found their inspiration and of the evolution of aviation as an enterprise open to all From the heady days of early aviation through the glory days of commercial air travel girls aviation books trace American women s participation in the field They also reflect changes in women s roles and status in American society as the sex sought greater equality with men As aviation technology improved the birdwomen of the pre World War I era capable and independent minded gave way to individualistic 1930s adventurers patterned on Amelia Earhart Jacqueline Cochran and other feminine notables of the air Their stories lead directly into the coming of commercial air travel Career stories paint the increasingly glamorous world of the 1940s and 1950s airline stewardess the unspoken assumptions lying behind that profession and the inexorable effects of technological and economic change By recovering these largely forgotten books and the social debates surrounding women s flying Erisman makes a substantial contribution to aviation history women s history and the study of juvenile literature This first comprehensive study of a long overlooked topic recalls aviation experiences long past and poses provocative questions about Americans attitudes toward women and how those attitudes were conveyed to the young

Women in British Imperial Airspace Liz Millward, 2007-12-18 The romance of flying the airways that developed above the British empire between the two world wars seduced young women with the promise of independence glamour and adventure *Heroes Without Legacy* Dean Jaros, 1993 Aside from Amelia Earhart America s earliest airwomen and their achievements remain largely unknown to the public While enjoying widespread media attention in the twenties thirties and forties America s female pilots lapsed into obscurity following World War II denying current generations of women a promising cadre of role models This book pays tribute to these spectacular pioneers Katherine Stinson Louise Thaden World War II s Women Airforce Pilots and many others *Heroes Without Legacy* examines basic features of the dramatic and exciting period between 1912 and 1944 when aviation began to mature both technically and commercially and when airwomen were competing head to head with men in record breaking flights During this period women were among the entrepreneurs and innovators They participated in the establishment of transportation routes and the transition from open cockpit biplanes to machines with practical cabins Examining the important role they played in fields as diverse as racing and aerial navigation Dean Jaros probes the reasons why the substantial accomplishments of these women have been so neglected and reflects on whether the airwomen themselves might not have affected their own future in more positive ways Rather than popularize or glorify the airwomen Jaros provides an interpretive assessment of these individuals and the circumstances that influenced their lives Illustrated with eighteen photographs most never before published *Heroes Without Legacy* not only addresses a glaring historical deficiency but documents a recent resurgence of interest in these women aviators BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved **Cartographic**

Fictions Karen Lynnea Piper, 2002 Maps are stories as much about us as about the landscape They reveal changing perceptions of the natural world as well as conflicts over the acquisition of territories Cartographic Fictions looks at maps in relation to journals correspondence advertisements and novels by authors such as Joseph Conrad and Michael Ondaatje In her innovative study Karen Piper follows the history of cartography through three stages the establishment of the prime meridian the development of aerial photography and the emergence of satellite and computer mapping Piper follows the cartographer's impulse to leave the ground as the desire to escape the racialized or gendered subject With the distance that the aerial view provided maps could then be produced objectively that is devoid of problematic native interference Piper attempts to bring back the dialogue of the native informant demonstrating how maps have historically constructed or betrayed anxieties about race The book also attempts to bring back key areas of contact to the map between explorer native and masculine feminine definitions of space *Right Stuff, Wrong Sex* Margaret A. characters hubris and a complex and a vivid portrait of a marriage that shaped the trajectory of an iconic life **Flying for Her Country** Amy Goodpaster Strebe, 2007-08-30 During the Second World War women pilots were given the opportunity to fly military aircraft for the first time In the United States famed aviatrix Jacqueline Cochran formed the Women Airforce Service Pilots program where over one thousand women flyers ferried aircraft from factories to airbases throughout the United States and Canada from 1942 to 1944 The WASP operated from 110 facilities and flew more than 60 million miles in 78 different types of aircraft from the smallest trainers to the fastest fighters and the largest bombers The WASP performed every duty inside the cockpit as their male counterparts except combat and 38 women pilots gave their lives in the service of their country Notwithstanding their outward appearance as official members of the U S Army Air Forces the WASP were considered civil servants during the war Despite a highly publicized attempt to militarize in 1944 the women pilots would not be granted veteran status until 1977 In the Soviet Union Marina Raskova Russia's Amelia Earhart famous for her historic Far East flight in 1938 formed the USSR's first all female aviation regiments that flew combat missions along the Eastern Front A little over one thousand women flew a combined total of more than 30 thousand combat sorties producing at least 30 Heroes of the Soviet Union Included in their ranks were at least two fighter aces More than 50 women pilots were killed in action Sharing both patriotism and a mutual love of aviation these pioneering women flyers faced similar obstacles while challenging assumptions of male supremacy in wartime culture Despite experiencing discrimination from male aircrews during the war these intrepid airwomen ultimately earned their respect The pilots exploits and their courageous story told so convincingly here continue to inspire future generations of women in aviation **The Journal of Military History**, 1995 Includes scholarly articles and book reviews on topics in military history **In Their Own Words** Fred Erisman, 2021-01-15 Amelia Earhart's prominence in American aviation during the 1930s obscures a crucial point she was but one of a closely knit community of women pilots Although the women were well known in the profession and widely publicized in the press at the time they are largely overlooked today Like Earhart they wrote extensively about aviation and women's causes producing an absorbing record of the life of women fliers during the emergence and peak of the Golden Age of Aviation 1925-1940 Earhart and her contemporaries however were only the most recent in a long line of women pilots whose activities reached back to the earliest days of aviation These women too wrote about aviation speaking out for new and progressive technology and its potential for the advancement of the status of women With those of their more recent counterparts their writings form a long sustained text that documents the maturation of the airplane aviation and women's growing desire for equality in American society In Their Own Words takes up the writings of eight women pilots as evidence of the ties between the growth of American aviation and the changing role of women Harriet Quimby 1875-1912 Ruth Law 1887-1970 and the sisters Katherine and Marjorie Stinson 1893-1977 1896-1975 came to prominence in the years between the Wright brothers and World War I Earhart 1897-1937 Louise Thaden 1905-1979 and Ruth Nichols 1901-1960 were the voices of women in aviation during the

Golden Age of Aviation Anne Morrow Lindbergh 1906 2001 the only one of the eight who legitimately can be called an artist bridges the time from her husband s 1927 flight through the World War II years and the coming of the Space Age Each of them confronts issues relating to the developing technology and possibilities of aviation Each speaks to the importance of assimilating aviation into daily life Each details the part that women might and should play in advancing aviation Each talks about how aviation may enhance women s participation in contemporary American society making their works significant documents in the history of American culture *Under Mountain Shadows* William D. Frank, 2024-02-29 From her world famous dude ranch in Washington state s Yakima County Kay Kershaw exerted tremendous influence on conservation efforts in the Pacific Northwest and tangentially on LGBTQ rights in the United States After gaining local renown in sports and aviation she established the ranch at Goose Prairie with her first partner Pat Kane a fraught undertaking in a region closely associated with the John Birch Society Operating under the guise of two spinsters Kershaw and her later life partner Isabelle Lynn guarded their privacy closely but local encroachment by the U S Forest Service and the timber industry forced them into the public arena as environmentalists In partnership with Supreme Court Justice William O Douglas Kershaw and Lynn spearheaded a decades long campaign to save the ancient forests and ecosystem of Washington s Cascade Range In the process Kay and Isabelle s devoted relationship proved a marked contrast to Justice Douglas own turbulent love life perhaps affecting his perception of the law and his precedent setting judicial opinion in *Griswold v Connecticut* 1965 which provided the basis for major LGBTQ Supreme Court decisions in the twenty first century as well as *Roe v Wade* in 1973 **Women Aviators** Karen Bush Gibson, 2013 Profiles the lives and careers of twenty six women who were pioneers in the field of aviation **Reconsidering a Century of Flight** Roger D. Launius, Janet R. Daly Bednarek, 2015-12-01 On December 17 1903 Orville and Wilbur Wright soared into history during a twelve second flight on a secluded North Carolina beach Commemorating the 100th anniversary of the first flight these essays chart the central role that aviation played in twentieth century history and capture the spirit of innovation and adventure that has characterized the history of flight The contributors all leading aerospace historians consider four broad themes relating to the development of flight technology innovation and the technology of flight civil aeronautics and government policy aerial warfare and aviation in the American imagination Through their attention to the political economic military and cultural history of flight the authors establish that the Wrights invention and all that followed in both air and space was one of the most significant technologies of the twentieth century fundamentally reshaping our world Supported by the First Flight Centennial Commission The contributors are Janet R Daly Bednarek Tami Davis Biddle Roger E Birstein Hans Joachim Braun David T Courtwright Anne Collins Goodyear Roger D Launius William M Leary David D Lee W David Lewis John H Morrow Dominick A Pisano and A Timothy Warnock *The Next Crash* Amy L. Fraher, 2014-05-13 If you are one of over 700 million passengers who will fly in America this year you need to read this book *The Next Crash* offers a shocking perspective on the aviation industry by a former United Airlines pilot

Weaving insider knowledge with hundreds of employee interviews Amy L Fraher uncovers the story airline executives and government regulators would rather not tell While the FAA claims that this is the Golden Age of Safety and other aviation researchers assure us the chance of dying in an airline accident is infinitesimal The Next Crash reports that 70 percent of commercial pilots believe a major airline accident will happen soon Who should we believe As one captain explained Everybody wants their 99 ticket but you don't get Captain Sully for ninety nine bucks Drawing parallels between the 2008 financial industry implosion and the post 9 11 airline industry The Next Crash explains how aviation industry risk management processes have not kept pace with a rapidly changing environment To stay safe the system increasingly relies on the experience and professionalism of airline employees who are already stressed fatigued and working more while earning less As one copilot reported employees are so distracted it's almost a miracle that there wasn't bent metal and dead people at his airline Although opinions like this are pervasive for reasons discussed in this book employees' issues do not concern the right people namely airline executives aviation industry regulators politicians watchdog groups or even the flying public in the right way often enough In contrast to popular notions that airliner accidents are a thing of the past Fraher makes clear America is entering a period of unprecedented aviation risk

Rhetoric and Resilience Sara Hillin, 2024-10-08

Rhetoric and Resilience explores discourse produced about and by the women involved in the World War II era Women Airforce Service Pilots program Aviators such as Jacqueline Cochran and Nancy Harkness Love provided the initial rhetorical boost to successfully launch the program while countless other pilots such as Cornelia Fort and Barbara Poole wrote to define the significance of the work the WASP were doing Despite a formidable amount of concrete evidence in her favor Cochran was unsuccessful in having WASP militarized After the program's disbandment in 1944 the women of WASP settled back into civilian life but maintained strong rhetorical bonds which served them greatly in the 1970s campaign for veteran status Using the lenses of both feminist rhetorical theory and classical rhetoric this book seeks to recover these rhetorics The chapters illustrate how the women employed a spectrum of strategies carefully designed to provide a fitting response to those both supportive of and hostile to their labor in the arena of military aviation

Women Daredevils Julie Cummins, 2015-12 The stories of fourteen women during the period from 1880 to 1929 who performed feats of daring from being shot out of a cannon to high diving on horseback
