

An anime-style promotional image for 'Heroic Age'. In the background, a large, dark, multi-armed monster with a glowing blue circular emblem on its chest looms over a rocky landscape. A bright yellow beam of light descends from the top left. In the foreground, two characters are shown from the chest up. On the left, a character with long, dark, spiky hair and a serious expression looks directly at the viewer. On the right, a character with long, light-colored hair is shown in profile, looking towards the left. The title 'HEROIC AGE' is written in a stylized, red, outlined font across the center, with a vertical red line passing through it. Above the title, the Japanese text '英雄時代' is visible.

An Empire of Ice Edward J. Larson,2011-05-31 A Pulitzer Prize winning author examines South Pole expeditions wrapping the science in plenty of dangerous drama to keep readers engaged Booklist An Empire of Ice presents a fascinating new take on Antarctic exploration placing the famed voyages of Norwegian explorer Roald Amundsen his British rivals Robert Scott and Ernest Shackleton and others in a larger scientific social and geopolitical context Recounting the Antarctic expeditions of the early twentieth century the author reveals the British efforts for what they actually were massive scientific

enterprises in which reaching the South Pole was but a spectacular sideshow By focusing on the larger purpose of these legendary adventures Edward J Larson deepens our appreciation of the explorers achievements shares little known stories and shows what the Heroic Age of Antarctic discovery was really about Rather than recounting the story of the race to the pole chronologically Larson concentrates on various scientific disciplines like meteorology glaciology and paleontology and elucidates the advances made by the polar explorers Covers a lot of ground science politics history adventure The New York Times Book Review **The New Science** Giambattista Vico,2020-01-07 A fresh translation of The New Science with detailed footnotes that will help both the scholar and the new reader navigate Vico s masterpiece The New Science is the major work of Italian philosopher Giambattista Vico First published in 1725 and revised in 1730 and 1744 it calls for a reinterpretation of human civilization by tracing the stages of historical development shared by all societies Almost unknown during his lifetime the work had a profound influence on later thinkers from Montesquieu and Marx to Joyce and Gadamer This edition offers a fresh translation and detailed annotations which enable the reader to track Vico s multiple allusions to other texts The introduction situates the work firmly within a contemporary context and newly establishes Vico as a thinker of modernity **New Science** Giambattista Vico,1999-04-29 Barely acknowledged in his lifetime the New Science of Giambattista Vico 1668 1744 is an astonishingly perceptive and ambitious attempt to decipher the history mythology and laws of the ancient world Discarding the Renaissance notion of the classical as an idealised model for the modern it argues that the key to true understanding of the past lies in accepting that the customs and emotional lives of ancient Greeks and Romans Egyptians Jews and Babylonians were radically different from our own Along the way Vico explores a huge variety of topics ranging from physics to poetics money to monsters and family structures to the Flood Marking a crucial turning point in humanist thinking New Science has remained deeply influential since the dawn of Romanticism inspiring the work of Karl Marx and even influencing the framework for Joyce s Finnegan s Wake *Giambattista Vico and Anglo-American Science* Marcel Danesi,2011-09-12 No detailed description available for Giambattista Vico and Anglo American Science

Proceedings of the Indian Science Congress Indian Science Congress Association,1928 **The Canadian Journal of Science, Literature and History** ,1878 **The Nay Science** Vishwa Adluri,Joydeep Bagchee,2014-06-03 The Nay Science offers a new perspective on the problem of scientific method in the human sciences Taking German Indological scholarship on the Mahabharata and the Bhagavadgita as their example Adluri and Bagchee develop a critique of the modern valorization of method over truth in the humanities The authors show how from its origins in eighteenth century Neo Protestantism onwards the critical method was used as a way of making theological claims against rival philosophical and or religious traditions Via discussions of German Romanticism the pantheism controversy scientific positivism and empiricism they show how theological concerns dominated German scholarship on the Indian texts Indology functions as a test case for wider concerns the rise of historicism the displacement of philosophical concerns from thinking and the belief in the ability of a

technical method to produce truth Based on the historical evidence of the first part of the book Adluri and Bagchee make a case in the second part for going beyond both the critical pretensions of modern academic scholarship and the objections of its post structuralist or post Orientalist critics By contrasting German Indology with Plato s concern for virtue and Gandhi s focus on praxis the authors argue for a conception of the humanities as a dialogue between the ancients and moderns and between eastern and western cultures Early Medical and Biological Science Robert Theodore Gunther,1926 Early Science in Oxford ... Robert Theodore Gunther,1925 *Forging the Future of Space Science* National Research Council,Division on Engineering and Physical Sciences,Aeronautics and Space Engineering Board,Space Studies Board,2010-03-08 From September 2007 to June 2008 the Space Studies Board conducted an international public seminar series with each monthly talk highlighting a different topic in space and Earth science The principal lectures from the series are compiled in *Forging the Future of Space Science* The topics of these events covered the full spectrum of space and Earth science research from global climate change to the cosmic origins of life to the exploration of the Moon and Mars to the scientific research required to support human spaceflight The prevailing messages throughout the seminar series as demonstrated by the lectures in this book are how much we have accomplished over the past 50 years how profound are our discoveries how much contributions from the space program affect our daily lives and yet how much remains to be done The age of discovery in space and Earth science is just beginning Opportunities abound that will forever alter our destiny
