Handbook of Research on Digital Citizenship and Management During Crises Öngün, Erdem, Pembecioğlu, Nilüfer, Gündüz, Uğur, 2021-11-12 Today individuals and societies of the digital age are no longer constrained by conventional contexts, narratives, settings and status; they are surrounded and guided by digital tools and applications, leading to a digital revolution. That digital revolution changed the individual along with living styles and cultural and social relations among people. Moreover, these revolutionary changes and the increasing capabilities of smart devices have brought today's people a new kind of public sphere with questionable freedoms but also restraints in its digital dimensions. Now it is possible to talk about the digital dimension and equivalence of all the concepts that are both individually and socially constructed in a new digital world. The Handbook of Research on Digital Citizenship and Management During Crises covers many different components engaged with digital world responsibilities. The authors assess the position, status and reactions of the new citizen against future catastrophes. Covering topics such as epistemic divide, internet addiction and new media technologies, this text serves as a cutting edge resource for researchers, scholars, lawmakers, trainers, instructional designers, university libraries, professors, students and academicians.
