The Threefold Logic of Advanced Architecture Manuel Gausa, Jordi Vivaldi, 2021-04-15 During the last 30 years Advanced Architecture has consolidated an interactive and informational logic that differs from that of Modernity and Postmodernity This logic is threefold it is modulated through three coexisting protocols modes of action whose peaks of intensity occur in three different decades Conformative Protocols 1990 2000 Distributive Protocols 2000 2010 and Expansive Protocols 2010 2020 This work proposes a threefold cultural narrative whose interactive and informational logic differs from that of modernity and postmodernity It positions three different ethos by critically approaching the architectural side of a cultural mutation that has been affecting the Western experimental areas of knowledge and practice since the end of the last century A transformative process constituted by a constellation of transdisciplinary manifestations accelerations turns shortcuts and clusterizations that by no means can be read under one single epistemological umbrella In this sense rather than approaching the practice of architecture focusing on its disciplinary inner specificity this book approaches the research of experimental architecture focusing on its extra disciplinary entanglements It argues that a vast multiplicity of fields of knowledge participates in a cultural endeavour modulated through three protocols forms of action that singularize three decades Conformative Protocols 1990 2000 Distributive Protocols 2000 2010 and Expansive Protocols 2010 2020 These three periods shouldn't be read as three hermetic and concatenated monades but as three different modulations of the same narrative that is as three overlapping and coexisting systems whose peaks of intensity occur in three different decades However the main purpose of this book is not limited to unveiling the ethos of these three conjugations It also aims at using this framework as a time field a narrative map that moves from the classificatory to the cartographical in order to vectorize the last 30 years of experimental architecture In this sense this book argues that this threefold set of protocols represents the progressive attempt to constitute critical interiorities looking for and produced through interactions that are increasingly more intimate and whose agents are increasingly more diverse A tendency oriented towards the consolidation of an intimacy between strangers that highly resonates with the cultural and technological landscape in which experimental architecture operates
