the Eye Story What Goes Wrong How to Recover Your Sight [Story by Story](#) Thomas Alderson Davis, Robert Arnold Johnson, 2019-07-12 This volume brings together two authors one a psychiatrist one a philosopher to listen to one another's reading of five stories of what it's like to bear a different mental or physical illness The beginning story or anchor for the conversation that unfolds between them is that of a person subject to recurring spells of catatonia the uncanniest of human conditions They discover that truly understanding what an illness is calls for understanding it within the context of who suffers it that to understand illness is to establish the right relation between what is being suffered and who is suffering it This deceptively simple way of talking which is labelled who what talk will prove more practical and more clarifying than will terms like mental and physical Furthermore it has this additional dividend it intrinsically resists a temptation toward medical prejudice the inclination for doctors and other caregivers to lose the who of the sufferer through their focus on the what of her illness [Story World and Photodramatist](#), 1924 [Story Of Interferon, The: The Ups And Downs In The Life Of A Scientist](#) Kari Cantell, 1998-05-21 The Finnish doctor Kari Cantell is one of the scientists to whom the development of the drugs called interferons can be attributed Interferons have achieved an important place in the treatment of cancer viral infections and multiple sclerosis In the 1960s Cantell and his coworkers developed a method for the preparation of interferon in white blood cells During those years most of the global production of interferon took place in Finland and the vast majority of the clinical studies in the world employed Finnish interferon The memoirs of Cantell record interferon's long road from the laboratory to the pharmacy shelf The journey took more than three decades and involved moments of triumph as well as
