created fab labs around the world which in his words can be interpreted to mean a lab for fabrication or simply a fabulous laboratory Using the machines in one of these labs children in inner city Boston have made saleable jewelry from scrap material Villagers in India used their lab to develop devices for monitoring food safety and agricultural engine efficiency Herders in the Lyngen Alps of northern Norway are developing wireless networks and animal tags so that their data can be as nomadic as their animals And students at MIT have made everything from a defensive dress that protects its wearer's personal space to an alarm clock that must be wrestled into silence These experiments are the vanguard of a new science and a new era an era of post digital literacy in which we will be as familiar with digital fabrication as we are with the of information processing In this groundbreaking book the scientist pioneering the revolution in personal fabrication reveals exactly what is being done and how The technology of FAB will allow people to create the objects they desire and the kind of world they want to live in **Wood & Wood Products** ,1985 Waterborne Commerce of the United States, Calender

Open Design and Innovation Leon Cruickshank, 2016-05-13 Open innovation crowd sourcing democratised innovation vernacular design and brand fanaticism are amongst a handful of new approaches to design and innovation that have generated discussion and media coverage in recent years In practice these ideas are often inspiring propositions rather than providing pragmatic strategies Open Design and Innovation develops the argument for a more nuanced acknowledgement and facilitation of non professional forms of creativity drawing on lessons from commercial design practice theoretical analysis and a wider understanding of innovation Specifically this book examines innovation and design the reality and myth of mass creativity and the future of the design profession through a series of case studies of new approaches to open design practices The text draws on academic research practical experience of the author in delivering open design projects and first hand interviews with leaders in the fields The author challenges the notion of the designer as fountain head of innovation and equally the idea of user creativity as a replacement for traditional design and innovation The book offers a critique of the hype surrounding some of the emerging phenomena and a framework to help understand the emerging relationship between citizens and designers It goes on to propose a roadmap for the

development of the design profession welcoming and facilitating new modes of design activity where designers facilitate creative collaborations Cross Stitch Crazy August 2017 Magazines Global, Cross Stitch Crazy August 2017
