Multiculturalism and Learning Style Rita Dunn, Shirley A. Griggs, 1998-08-20 This text synthesizes the research on the learning style characteristics of five culturally diverse groups Native Americans Hispanic Americans African Americans Asian Americans and European Americans Although each of these groups has distinguishing features and differs from other groups on some of the 22 elements that constitute learning style there are broad within group variations that preclude generalizations Dunn and Griggs identify a multidimensional model of learning style describe a comprehensive assessment instrument for identifying an individual's learning style and provide a variety of educational interventions that accommodate diverse learning style preferences *Universitas* Thomas E. Believing that current educational policies and practices in American institutions of higher learning contribute to an incoherent disjunctive and wasteful four year experience for many undergraduates the author provides a sense of new direction to aid in the restructuring and reform of undergraduate education in America The primary question of the work is How can the years of undergraduate education empower the student with the knowledge and integrated set of skills needed for a lifetime of learning and productive work Boudreau focuses on the primary responsibility of all institutions of higher learning to provide a superior undergraduate education All other functions of a university should be secondary to this commitment Unfortunately this basic premise seems lost today This work argues that universities must undergo significant reform and renewal especially at the undergraduate level if they are to prepare students successfully for the future *The Cumulative Book Index*, 1992 A world list of books in the English language *The Gatekeepers* Jacques

Steinberg, 2003-07-29 In the fall of 1999 New York Times education reporter Jacques Steinberg was given an unprecedented opportunity to observe the admissions process at prestigious Wesleyan University Over the course of nearly a year Steinberg accompanied admissions officer Ralph Figueroa on a tour to assess and recruit the most promising students in the country The Gatekeepers follows a diverse group of prospective students as they compete for places in the nation's most elite colleges The first book to reveal the college admission process in such behind the scenes detail The Gatekeepers will be required reading for every parent of a high school age child and for every student facing the arduous and anxious task of applying to college The Gatekeepers provides the deep insight that is missing from the myriad how to books on admissions that try to identify the formula for getting into the best colleges I really didn't want the book to end The New York Times

Sanders,2013-06-17 This book examines historical approaches and current research and practice related to the education of adolescents placed at risk of school failure as a result of social and economic conditions One major goal is to expand the intellectual exchange among researchers policymakers practitioners and concerned citizens on factors influencing the achievement of poor and minority youth specifically students in middle and high schools Another is to encourage increased dialogue about policies and practices that can make a difference in educational opportunities and outcomes for these students Although the chapters in this volume are not exhaustive they represent an array of theoretical and methodological approaches that provide readers with new and diverse ways to think about issues of educational equality and opportunity in the United States A premise that runs through each chapter is that school success is possible for poor and minority adolescents if adequate support from the school family and community is available The conceptual approach Section I places the research and practice on students placed at risk in a historical context and sets the stage for an important reframing of current definitions research policies and practices aimed at this population Multiple research methodologies Sections II and III allow for comparisons across racial and ethnic groups as well as within groups and contribute to different and complementary insights Section III Focus on African American Students specifically addresses gender and social class differences among African American adolescents Current reform strategies presently being implemented in schools throughout the United States are presented and discussed Part IV These strategies or programs highlight how schools families and communities can apply research findings like the ones this book presents thus bridging the often wide gap between social science research and educational practice Kliatt Young Adult Paperback Book Guide ,1991 *What's Wrong with Sociology?* Stephen Cole,2018-04-17 Since the 1950s sociology has experienced a decline in prestige when compared with the other social sciences In some highly publicized cases some universities have retrenched their sociology departments others are contemplating either retrenchment or downsizing of their departments Although there are some practitioners of the discipline who believe that it has never been in better shape many sociologists have come to believe that there are very serious problems both in the cognitive and social organization of the discipline This book contains sixteen essays by sociologists who believe that their discipline faces very serious problems which must be overcome if the discipline is to survive and prosper The contributors were selected to represent diverse views and thus there is substantial

disagreement among them over what the problems are that sociology faces and how they may be remedied In this highly provocative book readers is likely to find some essays they agree with and others they disagree with but all the essays present important problems faced by the discipline which must be addressed Although the authors of the sixteen essays do not agree on what is wrong with the discipline there are some themes which appear frequently In his introduction Cole summarizes and comments on these themes His introduction centers on the question of whether sociology is entirely socially constructed Is what we believe to be true about society constrained by empirical evidence or is it a result of our ideology power authority and other social processes One theme which appears in many of the essays is that sociology has become too ideological and as a result has lost credibility among university administrators politicians and the general public Many of the essays also stress the view that there are very low levels of consensus in sociology and that it is hard to see evidence of progress Others criticize the discipline for not dealing with the really important social issues and see much of the work published as being parochial and trivial Questions are also raised about why the use of causal models has failed to generate solutions to most of the problems the discipline addresses Some authors believe that the discipline adheres to an overly rational model of human behavior and has failed to keep up with some of the advances introduced by post modernist theories This highly readable set of essays should be of interest to all those are concerned about the current state of sociology They will also be useful in introducing graduate students to some of the most important issues currently being debated in the field Stephen Cole is currently professor of sociology at the State University of New York at Stony Brook and professor of sociology at the University of Queensland Australia He is the author of *Making Science Between Nature and Society* and with Jonathan R Cole *Social Stratification in Science* *Guide to Reference Books for School Media Centers* Margaret Irby Nichols,1992 This updated edition is a comprehensive guide to current reference materials for school media centres The 54 subject categories include recommended reference resources in all curricular areas and for many extracurricular interests
