Five Centuries of Map Printing David Woodward, 1975 **Five Centuries of Map Printing** Newberry Library, David Woodward, 1973 *A History of the World in 12 Maps* Jerry Brotton, 2014-10-28 A New York Times Bestseller Maps allow the armchair traveler to roam the world the diplomat to argue his points the ruler to administer his country the warrior to plan his campaigns and the propagandist to boost his cause rich and beautiful Wall Street Journal Throughout history maps have been fundamental in shaping our view of the world and our place in it But far from being purely scientific objects maps of the world are unavoidably ideological and subjective intimately bound up with the systems of power and authority of particular times and places Mapmakers do not simply represent the world they construct it out of the ideas of their age In this scintillating book Jerry Brotton examines the significance of 12 maps from the almost mystical representations of ancient history to the satellite derived imagery of today He vividly recreates the environments and circumstances in which each of the maps was made showing how each conveys a highly individual view of the world Brotton shows how each of his maps both influenced and reflected contemporary events and how by considering it in all its nuances and omissions we can better understand the world that produced it Although the way we map our surroundings is more precise than ever before Brotton argues that maps today are no more definitive or objective than they have ever been Readers of this beautifully illustrated and masterfully argued book will never look at a map in quite the same way again A fascinating and panoramic new history of the cartographer's art The Guardian The intellectual background to these images is conveyed with beguiling erudition There is nothing more subversive than a map The Spectator A mesmerizing and beautifully illustrated book The Telegraph **The Golden Age of Data Visualization** Kim Marriott, 2024-09-04 We are living in the Golden Age of Data Visualization The COVID 19 pandemic has demonstrated how we increasingly use data visualizations to make sense of the world Business analysts fill their presentations with charts journalists use infographics to engage their readers we rely on the dials and gauges on our household appliances and we use mapping apps on our smartphones to find our way This book explains how and why this has happened It details the evolution of information graphics the kinds of graphics at the core of data visualization maps diagrams charts scientific and medical images from prehistory to the present day It explains how the cultural context production and presentation technologies and data availability have shaped the history of data visualization It considers the perceptual and cognitive reasons why data visualization is so effective and explores the little known world of tactile graphics raised line drawings used by people who are blind The book also investigates the way visualization has shaped our modern world The European Renaissance and the Scientific Revolution relied on maps and technical and scientific drawings and graphics influence how we think about abstract concepts like time and social connection This book is written for data visualization researchers and professionals and anyone interested in data visualization and the way we use

graphics to understand and think about the world

The Social Life of Maps in America, 1750-1860 Martin

Brückner, 2017-10-26 In the age of MapQuest and GPS we take cartographic literacy for granted We should not the ability to find meaning in maps is the fruit of a long process of exposure and instruction A carto coded America a nation in which maps are pervasive and meaningful had to be created The Social Life of Maps tracks American cartography s spectacular rise to its unprecedented cultural influence Between 1750 and 1860 maps did more than communicate geographic information and political pretensions They became affordable and intelligible to ordinary American men and women looking for their place in the world School maps quickly entered classrooms where they shaped reading and other cognitive exercises giant maps drew attention in public spaces miniature maps helped Americans chart personal experiences In short maps were uniquely social objects whose visual and material expressions affected commercial practices and graphic arts theatrical performances and the communication of emotions This lavishly illustrated study follows popular maps from their points of creation to shops and galleries schoolrooms and coat pockets parlors and bookbindings Between the decades leading up to the Revolutionary War and the Civil War early Americans bonded with maps Martin Br ckner s comprehensive history of quotidian cartographic encounters is the first to show us how

Mapping an Atlantic World, circa 1500 Alida C. Metcalf, 2020-10-13

How did intricately detailed sixteenth century maps reveal the start of the Atlantic World Beginning around 1500 in the decades following Columbus s voyages the Atlantic Ocean moved from the periphery to the center on European world maps This brief but highly significant moment in early modern European history marks not only a paradigm shift in how the world was mapped but also the opening of what historians call the Atlantic World But how did sixteenth century chartmakers and mapmakers begin to conceptualize and present to the public an interconnected Atlantic World that was open and navigable in comparison to the mysterious ocean that had blocked off the Western hemisphere before Columbus s exploration In Mapping an Atlantic World circa 1500 Alida C Metcalf argues that the earliest surviving maps from this era which depict trade colonization evangelism and the movement of peoples reveal powerful and persuasive arguments about the possibility of an interconnected Atlantic World Blending scholarship from two fields historical cartography and Atlantic history Metcalf explains why Renaissance cosmographers first incorporated sailing charts into their maps and began to reject classical models for mapping the world Combined with the new placement of the Atlantic the visual imagery on Atlantic maps which featured decorative compass roses animals landscapes and native peoples communicated the accessibility of distant places with valuable commodities Even though individual maps became outdated quickly Metcalf reveals new mapmakers copied their imagery which then repeated on map after map Individual maps might fall out of date be lost discarded or forgotten but their geographic and visual design promoted a new way of seeing the world with an interconnected Atlantic World at its center Describing the negotiation that took place between a small cadre of explorers and a wider class of cartographers chartmakers cosmographers and artists Metcalf shows how exploration informed mapmaking and vice versa Recognizing

early modern cartographers as significant agents in the intellectual history of the Atlantic Mapping an Atlantic World circa 1500 includes around 50 beautiful and illuminating historical maps

The Cosmographia of Sebastian Münster Matthew McLean, 2016-03-23 Sebastian Münster's Cosmographia was an immensely influential book that attempted to describe the entire world across all of human history and analyse its constituent elements of geography history ethnography zoology and botany First published in 1544 it went through thirty five editions and was published in five languages making it one of the most important books of the Reformation period Beginning with a biographical study of Sebastian Münster his life and the range of his scholarly work this book then moves on to discuss the genre of cosmography The bulk of the book however deals with the Cosmographia itself offering a close reading of the 1550 Latin edition the last and definitive edition worked upon by Münster By analysing the contents of the Cosmographia it attempts to recreate how the world of the sixteenth century appeared to a scholar living in Basel and understand what he saw and heard Through this examination of Münster his publications and scholarly networks the conflicts and continuities between medieval scholarly traditions and the widening horizons of the sixteenth century are explored and revealed Of interest to scholars of humanist culture the Reformation and book history this ambitious work throws into relief previously overlooked aspects of the intellectual and religious culture of the time

Map Worlds Will C. van den Hoonaard, 2013-09-21 Map Worlds plots a journey of discovery through the world of women map makers from the golden age of cartography in the sixteenth century Low Countries to tactile maps in contemporary Brazil Author Will C van den Hoonaard examines the history of women in the profession sets out the situation of women in technical fields and cartography related organizations and outlines the challenges they face in their careers Map Worlds explores women as colourists in early times describes the major houses of cartographic production and delves into the economic function of intermarriages among cartographic houses and families It relates how in later centuries working from the margins women produced maps to record painful tribal memories or sought to remedy social injustices Much later one woman so changed the way we think about continents that the shift has been likened to the Copernican revolution Other women created order and wonder about the lunar landscape and still others turned the art and science of making maps inside out exposing the hidden unconscious and subliminal text of maps Shared by all these map makers are themes of social justice and making maps work for the betterment of humanity
