Triumphs of Experience George E. Vaillant, 2012-10-30 At a time when people are living into their tenth decade the longest longitudinal study of human development ever undertaken offers welcome news for old age our lives evolve in our later years and often become more fulfilling Among the surprising findings people who do well in old age did not necessarily do so well in midlife and vice versa

Worst Cases Lee Clarke, 2021-04-02 Al Qaeda detonates a nuclear weapon in Times Square during rush hour wiping out half of Manhattan and killing 500 000 people A virulent strain of bird flu jumps to humans in Thailand sweeps across Asia and claims more than fifty million lives A single freight car of chlorine derails on the outskirts of Los Angeles spilling its contents and killing seven million An asteroid ten kilometers wide slams into the Atlantic Ocean unleashing a tsunami that renders life on the planet as we know it extinct We consider the few who live in fear of such scenarios to be alarmist or even paranoid But Worst Cases shows that such individuals like Cassandra foreseeing the fall of Troy are more reasonable and prescient than you might think In this book Lee Clarke surveys the full range of possible catastrophes that animate and dominate the popular imagination from toxic spills and terrorism to plane crashes and pandemics Along the way he explores how the ubiquity of worst cases in everyday life has rendered them ordinary and mundane Fear and dread Clarke argues have actually become too rare only when the public has more substantial information and more credible warnings will it take worst cases as seriously as it should A timely and necessary look into how we think about the unthinkable Worst Cases will be must reading for anyone attuned to our current climate of threat and fear

**Weak Links** Stewart Patrick, 2011 Conventional wisdom holds that weak and failing states are the source of the world's most pressing security threats After all the 9/11 attacks originated in an impoverished war ravaged country and transnational crime appears to flourish in weakly governed states However our assumptions about

the threats posed by failing states are based on anecdotal arguments not on a systematic analysis of the connections between state failure and transnational security threats Analyzing terrorism transnational crime WMDs pandemic diseases and energy insecurity Stewart Patrick shows that while some global threats do emerge in fragile states most of their weaknesses create misery only for their own citizenry Moreover many threats originate farther up the chain in wealthier and more stable countries like Russia and Venezuela Weak Links will force policymakers to rethink what they assume about state failure and transnational insecurity **Gillette's Social Redemption** ,1907 **Evergreen** Noah Fleming,Alan Weiss,2015-01-07 An invaluable resource that helps anyone merge high tech tools with the personal touch to forge lasting bonds and steady profits Loyal customers are the beating heart of every great business Why do so many companies act like adrenalin junkies chasing after new customers at the expense of creating deeper more profitable relationships with the ones they already have Evergreen exposes the mad pursuit for what it is a brief spike in metrics and an ongoing revenue drain as one time customers fail to return The book s entertaining stories and action steps reveal how you can Cultivate the 3Cs of evergreen companies character community and content Build loyalty programs that turn satisfied customers into enthusiastic advocates Nurture profitable customers while pruning those who sap time and money Inject authenticity into social media communications Invert the expectations gap that can drive customers away From Internet startups and mom and pop businesses to multinational giants strong companies are rooted in customer retention The perfect solution is to shift resources from attracting new customers to engaging the base the path to stable growth season after season
