Everything in Between Christopher Bryan Harmon,2017-10-16 A young African American girl moves from the inner city of Newport News Virginia to the neighboring town of Williamsburg where she meets a white boy with a troubled home life The two find a bond while learning to deal with the world around them during the early 90 s This book contains mature content *Mammals of the Eastern United States* John O. Whitaker,William J. Hamilton,2019-05-15 The authors have done a superb job of distilling a vast amount of information on the biology of the terrestrial mammals of the eastern United States in a style that will not only satisfy the expert s need for accurate data but will also appeal to students and others interested in natural history James N Layne Archbold Biological Station In their definitive work on eastern mammals John O Whitaker Jr and W J Hamilton Jr vividly convey their sheer delight at the variety and abundance of mammalian life They have brought together a wealth of biological information and applied a biological subspecies concept to the mammals of the eastern United States Their research extends from the high reaches of Mount Katahdin in northern Maine where water shrews and moose hold company to the unglaciated hills of southern Indiana where pygmy shrews each weighing less than a dime lived undetected until 1981 From there they reach to the cypress swamps of lower Florida where the spoor of the mountain lion may be seen Describes the animals their behavior and dispersion in all 27 states east of the Mississippi River Almost entirely rewritten this edition provides an abundance of scientific information in combination with anecdotes field notes and an underlying reverence for the fragile diversity of animal life Illustrations include 110 range maps 167 black and white photographs and 92 color images Covers 121 species 17 more than in the previous edition Uses a biological subspecies concept showing the results of evolution through differentiation Provides keys to orders and genera anatomical line drawings Summarizes information on endangered and threatened species for each of the eastern states Lists state mammal books in the literature section **Listening to Fear** Steven Marans,2013-05-21 Learn how to read the behavioral language of fear and talk through your child s anxieties Adults often have trouble understanding and addressing the sources of their children s fears In *Listening to Fear* Dr Steven Marans shares the techniques for easing distress that he has developed for children of all ages in his work as the director of the National Center for Children Exposed to Violence at Yale University His advice is based on three steps parents must take before they can talk effectively with their children First adults must begin to work through their own fears Second parents need to set aside their ideas about what their children are feeling and learn from the children themselves Third Marans s experience has shown that children and adolescents communicate their unease in actions more than in words so adults must learn to interpret this behavioral language *Listening to Fear* also offers specific

pragmatic tactics for actually speaking with kids organized by age group and proven in Marans's research. These methods include ways to ask about the concerns and worries of your child's friends, think through the messages behind your child's questions before answering, reassure your child with facts but not too many. *Listening to Fear* is an indispensable guide for parents and for children anxious about an ever-threatening world. *Living Night* Sophia Kimmig, 2025-06-24. Natural darkness isn't merely a time of day. For countless extraordinary species, it's home. An entertaining and illuminating love letter to the mysterious and often misunderstood creatures that come alive when we go to bed and a call to preserve our precious shared world. Robin Bicknell, award-winning documentary filmmaker. *Ice and Fire and Nature's Cleanup Crew*. When the sun sets, things start to get interesting among wild animals. Wherever we live, whether in the city or suburbs or country, darkness conjures a hidden world of wildlife that most of us rarely glimpse. Foxes, wolves, and bears prowl, while skunks, opossums, and porcupines lurk. Fireflies send flashing signals to potential mates, raccoons rummage for food, owls and bats fly overhead. Wildlife biologist Sophia Kimmig is our guide to the startling behaviors of these and many more nocturnal creatures. Introducing us to night's wild inhabitants, she reveals what life for them is like in this parallel world, how it looks, feels, and smells, and the ingenious ways some creatures thrive after sunset. *Living Night* helps us appreciate how essential darkness is, not just a time but a diverse habitat all to itself, one that we still know too little about and that we must urgently protect for the benefit of the world's flora and fauna that depend on the day-night cycle. *I Learned It through the Grapevine* Todd Soltysiak, 2019-11-15. When city boy turned country gent Todd Soltysiak planted a vineyard on his new rural property, he began to learn the secrets of how to care for vines. Over the course of fifteen growing seasons, he gradually came to understand the meaning of Jesus Christ's final lesson to the disciples: "I am the vine, and you are the branches." With a deep love for Jesus and through personal observations and often humorous stories, this simple grape farmer has shared the truths he's unearthed to help us better understand how God works in the world, for God is crafting us into kingdom fruit bearers in preparation for the spiritual harvest to come. In *I Learned It through the Grapevine*, Todd draws parallels between his real-world experience in the vineyard and the truths of Scripture. The story is actually three books in one, with in-depth discussions of Jesus's final parable, a study guide to help readers uncover their role as Christians in the world, and practical tips for building and maintaining a fruitful vineyard. *Round-about Rambles in Lands of Fact and Fancy* Frank Richard Stockton, 2022-11-21. In *Round about Rambles in Lands of Fact and Fancy*, Frank Richard Stockton presents an enchanting collection of illustrated stories for children that walk the liminal space between reality and imagination. Stockton's prose is suffused with a playful wit and a narrative style that brings each tale to life in a manner distinctly his own. His work exists at an intersection of 19th-century literary traditions, drawing from the fables and parables of yesteryear while pioneering an approach to children's literature that emphasizes entertainment infused with educational value. The vivid imagery and fantastical plots serve not merely to amuse but to spark curiosity about the natural world and the bounds of human creativity.

Frank Richard Stockton 1834 1902 known for his unique blend of humor and storytelling was a prolific author whose works often challenged the prevailing norms of his time A humorist by nature Stockton crafted stories that engaged the intellect of both children and adults The vivacity found in the passage from Round about Rambles exemplifies Stockton s gift for elevating animals and objects into characters rich with personality and depth This literary approach may stem from Stockton s own fascination with the animal kingdom and a philosophical inclination to question societal hierarchies portrayed symbolically through the animal reign Reserved for readers who treasure the halcyon days of youth Round about Rambles in Lands of Fact and Fancy is recommended for those who seek to immerse themselves in a world where the line between the actual and the imagined is delightfully blurred Stockton s work promises to engage youthful audiences and adults alike with its intricate illustrations and narrative charm serving as a reminder of the enduring power of storytelling in nurturing the minds of young readers It is indeed a quintessential addition to the canon of classic children s literature deserving of rediscovery and continued admiration
