The Five Senses Rebecca Rissman, 2010-02-01 Simple text and photographs introduce readers to the five senses

[Five Senses](#) Sophie Carter, AI, 2025-03-06 Five Senses explores the fascinating world of sensory perception revealing how sight sound touch taste and smell shape our understanding of reality This book delves into the biological mechanisms and psychological processes behind how we perceive the world and how these senses protect us from danger For instance our senses aren't just passive receivers of information they actively interpret stimuli based on past experiences making us susceptible to sensory illusions The book traces the evolution of our understanding of the senses from philosophical inquiries to modern neuroscience emphasizing the brain's active role in shaping our perceptions Each sense is explored in detail starting with an overview of sensory perception and then diving into the anatomy physiology and neural pathways of each sense Sight explores the eye and visual cortex while sound investigates the mechanics of hearing Touch delves into pressure temperature and pain and taste and smell reveal how they create flavor and link to memory and emotion This approach integrates biological and psychological dimensions highlighting the adaptive functions of our senses and their vulnerability to distortion

The Five Senses Michel Serres, 2016-10-20 Marginalized by the scientific age the lessons of the senses have been overtaken by the dominance of language and the information revolution With *The Five Senses* Serres traces a topology of human perception writing against the Cartesian tradition and in praise of empiricism he demonstrates repeatedly and lyrically the sterility of systems of knowledge divorced from bodily experience The fragile empirical world long resistant to our attempts to contain and catalog it is disappearing beneath the relentless accumulations of late capitalist society and information technology Data has replaced sensory pleasure we are less interested in the taste of a fine wine than in the description on the bottle's label What are we and what do we really know when we have forgotten that our senses can describe a taste more accurately than language ever could The book won the inaugural Prix Médicis Essai in 1985 The Revelations edition includes an introduction by Steven Connor
