Maloney,1995 This book presents a detailed picture of the complex and difficult process the U S Navy and its NATO allies faced in devising the NATO naval command structure and explores NATO s place today in the realignment of nations Ultimate Allied Fighters of the Second World War Justo Miranda,2024-01-07 During the five years of the Second World War the power of engines and speed of aircraft increased as much as it did during twenty years of peacetime Conventional aircraft and engines reached the limits marked in the original design and surpassed them very fast The basis for this huge achievement was exotic fuels short lived artificially overpowered engines propellers with four five and even six blades and thinner wings with special sections of laminar flow Then the faster Allied fighters began to be attacked by a demon that lived in the air scientists called it compressibility buffeting and different type of aircraft suffered it at different speeds and manifested itself in different ways The American and British designers never understood the true causes behind the aerodynamic phenomenon They were forced to adopt brute force solutions by increasing engine power on the turbojet powered fighters leaving in the background the research on the last projects of fighters driven by monster piston engines The purpose of this book is to present them to the public for its notable interest *American Aviation Daily* ,1955

Maloney,2021-02 2023 AFHF Air Power History Book Prize Winner Emergency War Plan examines the theory and practice of American nuclear deterrence and its evolution during the Cold War Previous examinations of nuclear strategy during this time have for the most part categorized American efforts as massive retaliation and mutually assured destruction blunt instruments to be casually dismissed in favor of more flexible approaches or summed up in inflammatory and judgmental terms like MAD These descriptors evolved into slogans and any nuanced discussion of the efficacy of the actual strategies withered due to a variety of political and social factors Drawing on newly released weapons effects information along with new information about Soviet capabilities as well as risky and covert espionage missions Emergency War Plan provides a completely new examination of American nuclear deterrence strategy during the first fifteen years of the Cold War the first such study since the 1980s Ultimately what emerges is a picture of a gargantuan and potentially devastating enterprise that was understood at the time by the public in only the vaguest terms

but that was not as out of control as has been alleged and was more nuanced than previously understood X-Planes: Pushing the Envelope of Flight Steve Pace,2003 **American Aviation Historical Society Journal** American Aviation Historical Society,1974 **The Cutting Edge** Mark A. Lorell,Hugh P. Levaux,1998 The proposition that innovation is critical in the cost effective design and development of successful military aircraft is still subject to some debate RAND research indicates that innovation is promoted by intense competition among three or more industry competitors Given the critical policy importance of this issue in the current environment of drastic consolidation of the aerospace defense industry the authors here examine the history of the major prime contractors in developing jet fighters since World War II They make use of an extensive RAND database that includes nearly all jet fighters fighter attack aircraft and bombers developed and flown by U S industry since 1945 as well as all related prototypes modifications upgrades etc The report concludes that 1 experience matters because of the tendency to specialize and thus to develop system specific expertise 2 yet the most dramatic innovations and breakthroughs came from secondary or marginal players trying to compete with the industry leaders and 3 dedicated military R D conducted or directly funded by the U S government has been critical in the development of new higher performance fighters and bombers *The Northeastern Reporter* ,1912 Cases argued and determined in the courts of Illinois Indiana Massachusetts New York Ohio with key number annotations varies Aviation Week ,1955
