Geary's warships must escort a diplomatic and scientific mission across the dangerous disintegrating remnants of the Syndicate Worlds empire. But even if he can make it to Midway Star System, the gateway to alien-controlled space, Geary will face former Syndicate officials who have rebelled and regard the Alliance with deep suspicion. And that will be the easy part.

The Admirals Walter R. Borneman, 2012-05-01 How history's only five star admirals triumphed in World War II and made the United States the world's dominant sea power. Only four men in American history have been promoted to the five star rank of Admiral of the Fleet: William Leahy, Ernest King, Chester Nimitz, and William Halsey. These four men were the best and the brightest the navy produced and together they led the U.S. navy to victory in World War II, establishing the United States as the world's greatest fleet. In *The Admirals*, award-winning historian Walter R. Borneman tells their story in full detail for the first time. Drawing upon journals, ship logs, and other primary sources, he brings an incredible historical moment to life, showing us how the four admirals revolutionized naval warfare forever with submarines and aircraft carriers, and how these men, who were both friends and rivals, worked together to ensure that the Axis fleets lay destroyed on the ocean floor at the end of World War II.

The Bibliographer Henry Benjamin Wheatley, 1883 **The World Review**, 1928 Newsletter, 1996 *Typeset in the Future* Dave Addey, 2018-12-11 A designer's deep dive into seven science fiction films filled with gloriously esoteric nerdery and observations as witty as they are keen. *Wired In* Typeset in the Future blogger and designer Dave Addey invites sci-fi movie fans on a journey through seven genre-defining classics, discovering how they create compelling visions of the future through typography and design. The book delves deep into 2001: A Space Odyssey, Star Trek: The Motion Picture, Alien, Blade Runner, Total Recall, WALL-E, and Moon, studying the design tricks and inspirations that make each film transcend mere celluloid and become a believable reality. These studies are illustrated by film stills, concept art, type specimens, and ephemera, plus original interviews with Mike Okuda (Star Trek), Paul Verhoeven (Total Recall), and Ralph Eggleston and Craig Foster (Pixar). *Typeset in the Future* is an obsessively geeky study of how classic sci-fi movies draw us in to their imagined worlds.
