new book she has no idea that she is stepping into an ancient mystery so secret so revolutionary that thousands of people have killed and died for it She becomes deeply immersed in the mystical cultures of southwest France as the eerie prophecy of The Expected One casts a shadow over her life and work and a long buried family secret comes to light Ultimately she comes face to face with Jesus Christ Mary Magdalene John the Baptist Judas and Salome in the pages of a deeply moving and powerful new gospel the life of Jesus as told by Mary Magdalene CONTAINS NEW UNPUBLISHED MATERIAL FROM THE ARQUES GOSPEL Catalog of Copyright Entries. Third Series Library of Congress. Copyright Office, 1977 **Airways**, 2006 **Cadence** Bob Rusch, 1992 **Black Newspapers Index**, 2007 *The Future of Life: Meta-Evolution* David Hunter Tow, 2006-10 The Future of Life Meta Evolution represents the first comprehensive formulation of the hypothesis that evolution is the unifying force underlying the dynamics of all processes in the universe both organic and inorganic These include all facets of human existence and civilisation the sciences technology arts humanities and religion In essence by applying quantum information network and decision theory it is demonstrated that an overarching evolutionary process shapes the spectrum of life and phenomena in the universe as a generic paradigm beyond Darwin s original biology based theory The Theory of Evolution is undoubtedly the most powerful paradigm ever conceived by humans to explain their own existence Since Darwin s epoch making treatise *Origin of Species* published in 1859 evolution has been centre stage universally recognised as the driving force in the emergence of modern humans from the genesis of life on this planet almost 4 billion years ago However despite its ubiquitous brilliance as the jewel in the crown of human intellectual achievement the notion of evolution has never been developed to its full potential It remains instead constrained within its biological cradle often reduced in everyday connotation to its lowest common denominator of survival of the fittest The intention of this book to re evaluate and expand the Darwinian model of evolution to demonstrate that its current application is only the tip of the intellectual iceberg and that by combining its formidable biological principles with those of decision complexity network quantum and information theory it emerges as an incalculably deeper and richer model than previously contemplated It will be demonstrated that the evolutionary engine which drives biological development also drives all other dynamic adaptive processes the physical social cognitive economic political and technological and is in fact the major dynamic governing the Universe past present and future It is further proposed to demonstrate that recent developments in artificial intelligence and ubiquitous computing through the Internet mark the next crucial stage in life s evolution involving the inevitable symbiosis of vast computational intelligence with the human mind The major hypothesis developed in this book of a global all encompassing Theory of Evolution coupled with its potential for realising the emancipation of human intelligence and potential provides a vastly more powerful paradigm for exploring the Future of Life than current scientific scenarios The resulting Omega state of infinite knowledge and wisdom which is proposed has been actively championed by a number of eminent 19th and 20th century philosophers such as Teilhard de Chardin Henri Bergson Schelling Alfred Whitehead Samuel

Alexander and more recently by the leading physicist and futurist Professor Frank Tipler However to date no equivalent scientific framework for supporting such a hypothesis has been provided In conclusion The Future of Life Meta Evolution has been written not as an academic text but as primarily a non technical review of the evidence to support such a hypothesis in much the same vein as other recent publications in the popular science philosophy genre It is hoped that this approach will therefore provide a window into the wider evolutionary debate for the general reader interested in one of the most critical emerging paradigm shifts of the 21st century **AAHS Journal** American Aviation Historical Society,2006
