Flying Blind Peter Robison, 2021-11-30 NEW YORK TIMES BESTSELLER A suspenseful behind the scenes look at the dysfunction that contributed to one of the worst tragedies in modern aviation the 2018 and 2019 crashes of the Boeing 737 MAX An authoritative gripping and finely detailed narrative that charts the decline of one of the great American companies New York Times Book Review from the award winning reporter for Bloomberg Boeing is a century old titan of industry It played a major role in the early days of commercial flight World War II bombing missions and moon landings The planemaker remains a cornerstone of the U S economy as well as a linchpin in the awesome routine of modern air travel But in 2018 and 2019 two crashes of the Boeing 737 MAX 8 killed 346 people The crashes exposed a shocking pattern of malfeasance leading to the biggest crisis in the company s history and one of the costliest corporate scandals ever How did things go so horribly wrong at Boeing Flying Blind is the definitive expos of the disasters that transfixed the world Drawing from exclusive interviews with current and former employees of Boeing and the FAA industry executives and analysts and family members of the victims it reveals how a broken corporate culture paved the way for catastrophe It shows how in the race to beat the competition and reward top executives Boeing skimped on testing pressured employees to meet unrealistic deadlines and convinced regulators to put planes into service without properly equipping them or their pilots for flight It examines how the company once a treasured American innovator became obsessed with the bottom line putting shareholders over customers employees and communities By Bloomberg investigative journalist Peter Robison who covered Boeing as a beat reporter during the company s fateful merger with McDonnell Douglas in the late 90s this is the story of a business gone wildly off course At once riveting and disturbing it shows how an iconic company fell prey to a win at all costs mentality threatening an industry and endangering countless lives **U.S. Air Services** ,1932 The Dark Pattern Guido Palazzo,Ulrich Hoffrage,2025-06-03 From the creators of the theory of ethical blindness comes an investigation into how corporate scandals happen revealing the common pattern behind them and how your organization can avoid them Too often the stories of corporate scandals are narrated like Hollywood movies in which once celebrated CEOs are unmasked as sociopaths and ultimately convicted for their crimes What we fail to realize however is that most bad things are done by average people with honorable values and without bad intentions In The Dark Pattern two experts in business ethics and decision making challenge the conventional view that corporate misconduct happens because of a handful of bad actors Instead the book shows how entire organizations can fall off the moral cliff because good people become ethically blind Drawing on the latest insights from behavioral science the authors identify nine toxic elements that lead to corporate scandals and offer nine actionable lessons for building morally resilient organizations Essential reading for business leaders The Dark Pattern offers real world guidance for defending companies against the subtle dynamics of moral erosion *Flying Blind* Kenneth L. Flight Officer Service Pilot Roger Caron joined the army air force even though he was too old to be drafted. He simply couldn't pass up the opportunity to fly military aircraft. Like many men his age, he became hooked on aviation by Charles Lindbergh's 1927 solo transatlantic flight. Caron started out flying gliders and pulling weeds for flying lessons. He learned all he could about repairing and piloting airplanes; it was the focus of his life. Through a flying buddy, he met a young girl who worked her way into his heart. She had some health issues and was very young, only sixteen, but they ended up getting married anyway. His passion for aviation often kept them apart while he traveled from place to place, advancing his career. So after he joined the army air force and was sent to war in China, Burma, and India, the separation was just another of many. It was made bearable for Caron because he would be flying, and flying was in his blood. After spending many months enduring the hazards of war, life back home reached across the seas and grabbed him. The story begins with his landing in Calcutta near the end of September 1944. His treacherous assignment was to fly army cargo planes over the towering Himalayas, referred to as the Hump. As a member of the Army Air Force Air Transport Command, he would be supplying war materials and troops to China in support of the Allied effort against the Japanese invaders. Unfortunately, aircraft of that era were poorly suited for the dangerous weather of the cloud-enshrouded mountains, made worse by the region's lack of sophisticated navigational aids. An equally threatening hazard was the occasional but lethal Japanese fighter out hunting for unarmed Allied transports. Caron would need skill, tenacity, and a healthy dose of luck to survive his coming ordeal. After a quick turnaround in Calcutta, he found himself a passenger on a C-47 transport on his way to his first duty station in Myitkyina, Burma. This remote outpost had just recently been retaken from the Japanese at great cost by General Stilwell's army. While landing in Myitkyina, Caron's plane was strafed by a Japanese Zero and crash-landed. He and the rest of those onboard survived the ordeal, but it was an ominous welcome to his first duty station in the China-Burma-India CBI Theater of Operations. On his first flight over the Hump, Caron was copilot on a war-weary olive drab C-47 piloted by one of his tent mates, Bill Lackey, whom he had first met in Myitkyina. Like Caron, Lackey was from Los Angeles, and they'd quickly become friends. Their volatile cargo was high-octane gasoline carried in fifty-five gallon drums. On this passage through the towering mountains, ice formed on the wings, hailstones hammered the fuselage, and the plane lost altitude. When the crew was nearly ready to bail out, an updraft shot them up and over the dangerous peaks to safety. This trip foretold what most would be like: flying blind through the clouds on instruments only. On what later became known as Black Friday, Caron and his crew experienced a harrowing ride over the Hump. Upon arrival in Kunming, China, the plane captain tried to delay the return flight to Burma because of the extreme weather, and the multitude of maydays called in from other aircraft. Permission was denied, but they were able to stall until the Hump was declared closed. Many planes and crews were lost in the killer storm, and his tent mate and friend, Bill Lackey, was one of those missing. Caron's luck ran out following a promotion to plane captain. Sitting in the left-hand seat of the cockpit, he and his crew flew mules to China, where just before landing, one of the mules stuck its head through a window.

Despite concern of the effect on the plane's stability under minimum weather conditions Caron successfully landed the plane. However on the return leg of the *Flying Blind*, 1998 *Flying Magazine*, 1932-05 **Technical Manual** United States War Department, *Reflections on War* Thean Potgieter, Ian Liebenberg, 2012-10-01 *Reflections on War* is a comprehensive and objective investigation into the problems of war. The book explores the crucial link between theory, strategy and objectives in war, taking all the evidence and theory into account and should be of interest to military practitioners, specialists in defence studies and others interested in military history. Also notable about the work is its ability to draw insights together from international legal theory, management sciences, history, sociology and the political economy of war, showing due respect for the moral complexities involved in waging war. **The Rise of Unmanned Warfare** Jacquelyn Schneider, MacDonald, 2023-12-15 What explains the current US arsenal of unmanned systems? Why, for example, is the contemporary arsenal dominated by aerial unmanned systems versus the munitions that dominated earlier developments? This book challenges traditional explanations for the proliferation of unmanned systems which focus on capacity or structure. Instead, this book argues that beliefs and identities shape the structures and capacities we choose when we are investing in weapon systems. In particular, it traces beliefs about technological determinism and military revolutions, force protection and casualty aversion, and service identities to explain why the US has invested so heavily in remote controlled unmanned aerial platforms over the last three decades. In doing so, the book illustrates how ideas become influence and ultimately manifest in budget lines, detailing the policy entrepreneurs, critical junctures and path dependencies that shape the lifecycle of beliefs about unmanned weapon systems. The book begins by providing a historical overview of US unmanned systems investments, taking an expansive view of unmanned technologies from land mines to missiles and drones from the revolutionary war to contemporary investments. It then leans on theories of norms, ideas and influence to detail the role of the Office of Net Assessment, Vietnam 9/11 and armed service identity in building the US current unmanned arsenal. Finally, it concludes with what this case of unmanned technologies reveals about US support to Ukraine as well as contemporary weapons debates about cyber information technology, space and hypersonic missiles. **Flying Blind, Fly Safe** M Schiavo, 1998-04-01 Featuring new updated information, a paperback edition of a best seller by the outspoken former Inspector General of the US Department of Transportation offers readers the vital information they need to travel more safely by air. Reprint. **The Next Crash** Amy L. Fraher, 2014-05-13 If you are one of over 700 million passengers who will fly in America this year, you need to read this book. *The Next Crash* offers a shocking perspective on the aviation industry by a former United Airlines pilot. Weaving insider knowledge with hundreds of employee interviews, Amy L. Fraher uncovers the story airline executives and government regulators would rather not tell. While the FAA claims that this is the Golden Age of Safety and other aviation researchers assure us the chance of dying in an airline accident is infinitesimal, *The Next Crash* reports that 70 percent of commercial pilots believe a major airline accident will happen soon. Who should we believe? As one captain explained,

Everybody wants their 99 ticket but you don't get Captain Sully for ninety nine bucks Drawing parallels between the 2008 financial industry implosion and the post 9 11 airline industry *The Next Crash* explains how aviation industry risk management processes have not kept pace with a rapidly changing environment To stay safe the system increasingly relies on the experience and professionalism of airline employees who are already stressed fatigued and working more while earning less As one copilot reported employees are so distracted it's almost a miracle that there wasn't bent metal and dead people at his airline Although opinions like this are pervasive for reasons discussed in this book employees issues do not concern the right people namely airline executives aviation industry regulators politicians watchdog groups or even the flying public in the right way often enough In contrast to popular notions that airliner accidents are a thing of the past Fraher makes clear America is entering a period of unprecedented aviation risk **Flying Blind** Paul Stephen Dempsey,1990

Defense Transformation Kevin P. Reynolds,2006 **The Evolution of the US Air Force** Israel Guy,2024-08-05 This book looks at the history of the US Air Force through the lens of its lack of preparedness for major wars which is shown to be a result of its organizational culture The U S Air Force is probably the most powerful military force in history both in its destructive firepower and in its ability to project it globally Yet despite its unparalleled power the Air Force entered its first three pivotal conflicts World War II the Korean War and the Vietnam War unprepared But surprisingly it was remarkably well prepared for its fourth major war the Gulf War of 1991 Could there be an underlying trait or characteristic which influenced the Air Force between the wars that historically caused the US Air Force to be unprepared for war or prepared for the wrong type of war Surprisingly there is such a factor which was quite prominent in the Air Force's complex identity its organizational culture Besides providing a historical description of the Air Force this book demonstrates clearly how its organizational culture evolved and how it caused the US Air Force to be prepared for the wrong war It also shows that when the organizational culture changed the Air Force changed its focus and arrived prepared for the following war the 1991 Gulf War This book will be of interest to students of air power strategic studies US public policy and security studies in general
