Flying Boats Seaplanes

Stéphane Nicolaou

Flying Boats Seaplanes:

Flying Boats & Seaplanes Stéphane Nicolaou, 1998 Beginning with races that were staged at elegant French resorts in the early part of the century flying boats and seaplanes have played an integral part in aviation history World War I spurred the development of these machines and by the 1930s flying boats and seaplanes had become pioneers in transcontinental flight This photo filled history recalls the role of flying boats and seaplanes in civil and military aviation history and the enthusiasm of the engineers and pilots who are associated with their development In addition to the golden years of hydraviation prior to World War II author Nicolaou examines the decline of the seaplane and its subsequent renaissance in nations that are today considered seaplane paradises The saga is illustrated by more than 200 rare photographs uncovered in archives around the globe

An Illustrated History of Seaplanes & Flying Boats Maurice Allward, 1988 For a brief period of forty years the flying boat and its smaller counterpart the float plane were a familiar part of the flying scene Inside jacket

Operational History of the Flying Boat: Open Sea and Seadrome Aspects: Selected campaigns, World War II Michael G. Kammen, 1959

Float Planes and Flying Boats Capt Robert B. Workman USCG (Ret), 2017-02-15 Float Planes and Flying Boats is the first and only written history describing the Coast Guard's contribution to early Naval Aviation's development There is a Naval Aviator bond between Navy Coast Guard and Marine Corps aviators that was initiated when the three service aviation communities joined in a major Joint Operation from 1914 to 1938 to develop and grow Naval Aviation That bond drives each service to cooperate and support each other For example Coast Guard and Marine Corps aviators receive flight training at the Navy Training Command in Pensacola and the Navy loaned the Coast Guard many of their first aircraft and gave land and facilities that became early Coast Guard air stations The Coast Guard contributed to Navy activities that established Navy war fighting capabilities and provided engineering design and tests for seaplanes and aircraft carrier powder catapults and arresting gear The only difference on the Naval Aviator Roster is USN USCG and USMC after their names For example Lieutenant Stone was Naval Aviator number 38 and 20 years later was also assigned Coast Guard Aviator number 1

Float Planes and Flying Boats Robert B. Workman, 2012-05-15 A visual and written history that will come alive for the reader who will learn that enormous creativity was involved in the birth development and advancement of Navy Marine Corps and Coast Guard air forces and their aircrew's capabilities

The American Flying Boat

Richard C. Knott, 1979 First published in 1979 this fully illustrated study includes complete data on all of the Navy's flying boats since 1912

Catapult Aircraft Leo Marriott, 2020-01-24 A concise history of this specialty aircraft used during World Wars I and II During World War I the navies of the opposing forces discovered the value of aerial reconnaissance and many experiments were made to allow larger warships to carry one or sometimes two aircraft aboard In the early days these were float planes that were lowered by crane into the sea and then lifted back aboard upon their return This was a lengthy affair and when a speedy departure was necessary time was of the essence A new system was devised so that a powerful catapult system and a short ramp could with the added speed of the ship get an aircraft airborne in a fraction of the time previously required Thus was born a highly specialised type of aircraft This book includes all the major designs that went to war in the First and Second World Wars and includes aircraft used by all the combatants It looks at how the aircraft evolved and how the warships were modified to accommodate the aircraft and the catapult system The use of these fixed wing aircraft was abandoned when the invention of the helicopter was made in the early post WWII years

Float Planes & Flying Boats Robert B. Workman, 2012 Most often when Joint Operations are conducted by a larger service individual Armed Service Historians tell the story of events ignoring sometimes even trivialising participation of the other Armed Services Sometimes Navy historians inferred Navy credit for a naval event conducted by a Coast Guard individual or the Coast Guard by documenting the event but ignoring Coast Guard presence Documentation of history resulting from both similar and diverse contributions and authorities from a different sea service is lost by this historian approach For example Navy historian Roy A Grossnick in his June 2001 book *United States Naval Aviation 1910-1995* only mentions Coast Guard participation in early Naval Aviation and the World War once when The secretary of Navy was advised LT E F Stone USCG was ordered to NAS Pensacola for aviation training As this book documents Coast Guard individuals and the Coast Guard service gave many contributions to the World War and to development and growth of Naval Aviation during that period *Float Planes And Flying Boats The Coast Guard And Early Naval Aviation* is a single comprehensive volume telling the history of early Naval Aviation the Navy the Marine Corps and the Coast Guard A unified history of all naval aviators it describes interrelationship and mutual support In years leading to 1920 the Marine Corps and Coast Guard did not own aircraft The three sea service's aviators flew Navy aircraft on Navy missions from Navy ships and Navy Air Stations commanded by Navy and Coast Guard aviators The bond between them was born It was a unique time The book is documented with 427 endnotes and features 281 vintage aviation photographic images and a nautical chart of historical note embedded within its text This balance of photographs and endnote documentation provides both visual and written history that will come alive for the reader
