Roger L. Martin, 2011-04-12 American capitalism is in dire straits caught in a perilous pattern of increasing volatility decreasing investor returns and ongoing bad behavior by executives And it's getting worse Since the turn of the twenty first century we've seen two massive value destroying market meltdowns and a string of ethics breaches including accounting scandals options backdating schemes and the subprime mortgage debacle Just what is going on here Is it the inevitable decline of the American economy Is it the new normal in a technology enabled global marketplace Or is it possible that the very theories we've embraced to underpin our capital markets are actually producing these crises In Fixing the Game Roger Martin reveals the culprit behind the sorry state of American capitalism our deep and abiding commitment to the idea that the purpose of the firm is to maximize shareholder value This theory has led to a massive growth in stock based compensation for executives and through this to a naive and wrongheaded linking of the real market the business of designing making and selling products and services with the expectations market the business of trading stocks options and complex derivatives Martin shows how this tight coupling has been engineered and lays out its results a single minded focus on the expectations market that will continue driving us from crisis to crisis unless we act now Using the National Football League as his primary example Martin illustrates that it is possible to take a much more thoughtful and effective approach than we now do to the intersection of the real and the expectations markets and to governance in general in the capital markets Martin shows how we can act to end the destructive cycle including Restructuring executive compensation to focus entirely on the real market not the expectations market Rethinking the meaning of board governance and role of board members Reining in the power of hedge funds and monopoly pension funds Concise hard hitting and entertaining Fixing the Game advocates seizing American capitalism from the jaws of the expectations market and planting it firmly in the real market and it presents the steps we must take now to do so The Electrical World and Engineer, 1903
