

Focus Groups

Janet Smithson

INTRODUCTION

This chapter sets out some of the main issues, both practical and theoretical, of using focus groups in social research, together with suggestions on how to use and analyse the groups most effectively. First the history and reasons for using focus groups in social research are considered, taking note of some of the different epistemological and theoretical positions underpinning focus group research. Then, design and procedure are considered, including sampling and selecting participants, the logistics of recording and managing the data, and ethical considerations. Third, the role of the moderator, including strategies for moderating focus groups, and acknowledgement of the impact of the moderator, is discussed. In the section entitled 'Analysing focus group data', some of the specific issues which arise in analysis of focus groups are highlighted, with particular reference to the importance of the group context. Finally, the section entitled 'Using focus groups in specific contexts' looks at the use of focus groups in specific contexts: within feminist research, organisational research, in cross-cultural and cross-national research, in

action research, and the growing use of online focus groups.

THE HISTORY OF FOCUS GROUPS IN SOCIAL SCIENCE RESEARCH

Focus groups originated in sociology in the 1920s (Merton and Kendall 1946), but were primarily used by market researchers for several decades (Templeton 1987), before regaining popularity in the social sciences in the 1990s (Wilkinson 1998), as well as becoming widely used as a marketing and political tool for gathering 'opinions'. They are increasingly being used as a research tool throughout the social sciences, as well as in a wide range of other academic fields – for example health studies, education, political science and geography.

Even though focus groups comprise face-to-face interaction of crucial interest to social scientists, and are increasingly being used as a research tool (Wilkinson 1998), there is a significant lack of literature on the analysis of the conversational processes and structures involved in them, although various researchers have called attention to this lack
