The China Crisis James R. Gorrie, 2013-05-08 A controversial look at the impending Chinese economic collapse the history behind it its contemporary causes and its dire implications for the global economy All the experts agree the 21st century belongs to China Given America's looming insolvency and the possibility of the collapse of the U S dollar who can doubt that China is poised to take over the role of economic superpower Written by political economist and leading financial journalist James Gorrie this book offers a highly controversial contrarian view of contemporary China Drawing upon a wealth of historical and up to the minute data Gorrie makes a strong case that China itself is on the verge of an economic crisis of epic proportions He explains how caught in a recurrent boom bust cycle that has played itself out several times over the past sixty years China is again approaching total economic and social collapse But with one important difference this time they may very well take the entire global economy down with them Explores the Chinese communist party's unfortunate history of making costly and very bloody mistakes on an enormous scale One by one Gorrie analyzes those critical mistakes and explains how they may lead to economic collapse in China and global depression Describes Chinese cannibal capitalism and where its massive abuse of the country's environment people and arable lands is leading that country and the world economy Chronicles China's history of recurring economic crisis and explains why all the evidence suggests that history is about to repeat itself

China in Africa Sabella O. Abidde, Tokunbo A. Ayoola, 2021-02-03 This book examines Sino African relations and their impact on Africa It argues that Africa's relationship with China has had a profound impact on key sectors in Africa economic and political development the media infrastructural development foreign direct investments loans debt peonage and international relations The authors also analyze the imperialist and neo colonialist implications of this relationship and discuss the degree to which the relationship is beneficial to Africa

Global China Tarun Chhabra, Rush Doshi, Ryan Hass, 2021-06-22 The global implications of China's rise as a global actor In 2005 a senior official in the George W Bush administration expressed the hope that China would emerge as a responsible stakeholder on the world stage A dozen years later the Trump administration dramatically shifted course instead calling China a strategic competitor whose actions routinely threaten U S interests Both assessments reflected an underlying truth China is no longer just a rising power It has emerged as a truly global actor both economically and militarily Every day its actions affect nearly every region and every major issue from climate change to trade from conflict in troubled lands to competition over rules that will govern the uses of emerging technologies To better address the implications of China's new status both for American policy and for the broader international order Brookings scholars conducted research over the past two years culminating in a project Global China Assessing China's Growing Role in the World The project is intended to furnish policy makers and the public with hard facts and deep insights for understanding China's regional and global ambitions The initiative draws not only on Brookings's deep bench of China and East Asia experts but also on the tremendous breadth of the institution's security strategy regional

studies technological and economic development experts Areas of focus include the evolution of China's domestic institutions great power relations the emergence of critical technologies Asian security China's influence in key regions beyond Asia and China's impact on global governance and norms Global China Assessing China's Growing Role in the World provides the most current broad scope and fact based assessment of the implications of China's rise for the United States and the rest of the world *China-Russia Relations in the Arctic* Iselin Stensdal, Gørild Heggelund, 2024-08-21 The Arctic has been characterized by international cooperation but has recently emerged as a possible arena for great power rivalry A key question affecting development among most dimensions is the relationship between the largest Arctic state Russia and China with global ambitions also including the Arctic This edited volume provides an in depth analysis of the many aspects of Sino Russian relations in the Arctic From the geopolitical implications including consequences of the war in Ukraine to infrastructure cooperation to environmental aspects analyses are provided by top experts in their respective fields The edited volume aspires to give a realistic picture of the Sino Russian relationship shared as well as conflicting interests what is actually happening on the ground what are driving forces and obstacles for cooperation and importantly how can the bilateral relationship in the Arctic possibly impact international relations **Defense White Paper**, 1989 Protests, Pandemic, and Security Predicaments Wei-chin Lee, 2023-06-27 This book examines how Asian countries have responded to urgent challenges against a backdrop of climactic political developments as well as the effects of issue linkage in policy making Chapters are arranged according to localities but interlinked through their thematic and critical analyses The section on Hong Kong focuses on the theme of protests highlighting its intersection with identity and generational shifts in addition to legal political and economic changes before and after the adoption of Hong Kong National Security Law The section examining Taiwan's policies discusses electoral calculations identity reconstruction cross Strait stalemate and alliance maneuvers within USA China Taiwan triangular international relations providing an overview of its domestic and external policies Through their analysis the authors here determine that China has emphasized the prerogatives of history culture and territorial sovereignty in its dealings with the Hong Kong protests and Taiwan and that cross Strait analysis must be deliberated and ultimately determined within the USA China Taiwan triangular framework In the final section authors examine the USA's role and policy in dealing with both sides of the Taiwan Strait Hegemonic power transition has been a primary concern in both countries with the USA's hegemonic status facing daunting challenges from China increasingly perceived as an ascending revisionist power waiting to overtake the USA in the future **The United States and China** Narayani Basu, 2015-10-05 With its long history of internal divisiveness and its intersecting cultural and linguistic cleavages East Asia is undoubtedly a complex area However the idea of East Asia as a regional entity is one that is relatively recent a concept that gained momentum after the financial crisis that rocked the region in the 1990s In recent years East Asia has become considerably more interdependent connected and cohesive This increased cohesiveness has been driven by a dense

network of trade and investments technology sharing and communication among many other variables and has been reflected in the increasing institutionalisation of regional mechanisms like the ASEAN Regionalism is not however entirely about economic interdependence In today s day and age it means not only overarching social networks and a regional identity but also strategic thinking that recognises common security interests This book takes into account the regional discourses of two of East Asia s biggest players the United States and China While the former has been a power to reckon with albeit externally deeply entrenched in the region since the end of the Second World War the rise of China in the 21st century and its emergence as the largest power in East Asia has brought a new perspective to East Asian regionalism In 2010 the United States began reasserting itself in East Asia bringing into sharp focus the ideological differences between itself and China as each vied to shape the architecture of East Asian security There is no doubt that heightened American interest comes at a time when China s own views of regionalism have become noticeably less cooperative While balance of power politics is one way to look at the geopolitical tug of war in East Asia there are questions that have not yet been answered How do the two countries look at a region that is so important for them How has that perception influenced their foreign policy within the same arena More importantly how do they define East Asia This book studies American and Chinese regional discourses from the end of the Cold War to the present day in order to highlight the rationale behind the natural balance of power politics between an established power and a rising one and its subsequent effects on security regionalism in East Asia

FAR Horizons ,1975 **Preparing and Training for the Full Spectrum of Military Challenges** David Eugene Johnson,2009 The difficult and continually evolving operations in Iraq and Afghanistan show the complexities of what is now termed irregular warfare and highlight the need for new approaches to the security challenges with which the United States is now contending and will likely confront in the future The research reported in this monograph focused on answering a rather straightforward but thus far largely unanswered question What can the U S military learn from other militaries about how better to prepare for full spectrum operations and deployments To this end RAND was asked by the OSD for Personnel and Readiness to examine the militaries of China France the UK India and Israel P xiii China 2030 The World Bank,2013-03-26 This report examines whether China s economy can continue to grow to become the world s largest economy even if its current growth rate slows and whether it can maintain rapid growth with little disruption to the world the environment and its own culture

FAR Horizons National Security Council (U.S.). Subcommittee on Foreign Affairs Research,1977 **China and ASEAN** Zhao Hong,2016-04-29 This book examines the energy resource relations between China and ASEAN countries It addresses the following issues as the world energy demand shifts East because of the rise of China ASEAN community and other emerging Asian economies and as the Greater Indian Ocean and the South China Sea become the world s energy interstates will geopolitical tensions over energy resources spark conflicts in the region especially in the South China Sea Against the background of China s rise and its growing influence in Southeast Asia will China s quest

for energy resource cooperation be viewed as a threat or opportunity by its neighbouring countries Since the United States Japan and India are important players in Southeast Asia does the shifting geopolitics of energy give these big powers a new strategic tool in an intensifying rivalry with China Or does the changing geopolitics of energy resources create more areas of shared interests and opportunities for cooperation between these big powers to balance rather than increase tensions in Southeast Asia This book will be of interest to anyone who is keen to learn how the world especially the United States can accommodate and adapt to the new global energy dynamics and how China and ASEAN operate as new players in global and regional energy markets Taiwan During the First Administration of Tsai Ing-wen Gunter Schubert, Chun-yi

Lee, 2021-10-21 This book offers a substantive assessment of the first Tsai Ing wen administration investigating different policy fields and issues from 2016 to 2020 prior to Tsai s election for a second term Providing a balanced account of government performance under Tsai s Ing wen s reign chapters in this edited volume combine theory and extensive empirical data to highlight both achievements and shortfalls of her administration Chapters range comprehensively from topics of the implementation of same sex marriage curriculum reform transitional justice industrial policy and pension reform which have been celebrated by domestic Tsai Ing wen supporters but have also met with considerable opposition from within Taiwanese society Externally cross strait relations the New Southbound Policy and the triangular relationship with China and the USA which embodied major challenges for Tsai s first administration are also analysed as key reference points throughout Featuring contributions from twenty six internationally renowned Taiwan scholars Taiwan During the First Administration of Tsai Ing wen is an essential resource for students and scholars of Taiwanese politics and society cross strait relations and international relations China's Security Dilemma Thomas Oeljeklaus, 2009-09 Essay from the year 2008 in the subject Politics International Politics Topic Peace and Conflict Studies Security grade 1.3 University of Münster Institut für Politikwissenschaft course Theater Missile Defense in Europe and Asia A Comparison language English abstract Strengthening a country s defences should neither alarm its neighbours nor lead to an arms race Despite this theoretical cognition of political sciences the People s Republic of China sees Ballistic Missile Defence as a threat to its national security The aim of this essay is to explain why the BMD systems of the USA are threatening China s national security I will show that it is mainly a psychological discourse Although or precisely therefore it is very important for the understanding of China s position and assumptions We will understand that China faces a security dilemma which is threatening the national security and ultimately lead to an arms race I will show that the technical aspects here are not as important as the psychological implications Missile Defence hints at the psychological side of international politics The US s BMD systems may not work well enough to be technically a real threat to any country but the development and instalment causes China s threat perceptions BM is used as a saber rattling show of force for intimidation in order to reach a political goal or simply as deterrence against a perceived outside threat or imminent attack For the People s Republic of China there are two main

issues First a period of strategic transition between the United States of America and the People s Republic of China and second the US transfer of advanced PAC 3 Systems to Taiwan The negative impact of missile defense deployments on Sino US relations could potentially be reduced by offsetting them with political and economic measures to reassure China Chinas concerns about missile defence focus mainly on political questions Thoughts fears and percep *Africas Growing Role in World Politics* Tatiana Deych,Alexander Zhukov,2016-06-13 This volume titled Africas Growing Role in World Politics includes a selection of papers dedicated to the problems of the contemporary international relations and foreign policies of the African states Most of these papers were presented at the panels held within the framework of the 13th International Conference of Africanists Society and Politics in Africa Traditional Transitional and New Moscow Russia May 27-30 2014 The book contains many articles devoted to the Western countries policies in Africa On the background of the ongoing competition between Washington and Beijing the US Administration has recently increased the amount of attention it pays to the continent European Union is also actively developing its strategic partnership with Africa The authors analyze thoroughly the ongoing cooperation between African states and a great emerging donor and investor China They particularly address the question about possible implications of Chinas African policy for the countries of the continent Major attention is given to Sudan and South Sudan One of the urgent problems addressed by this book is the situation with African IDPs and refugees their life conditions in camps and the measures for their transition to normal life
