Focus On The Middle East

Focus On The Middle East:

Crisis in the Middle East François Massoulié, 1999 Examines how the post Great War colonial division of the Arab world stands at the root of many of today's conflicts The book also shows how the establishment of Israel and the expulsion of many Palestinian Arabs from their ancestral homes set the stage for a cycle of occupation and resistance **Seeing the World** Mitchell Stevens, Cynthia Miller-Idriss, Seteney Shami, 2020-04-28 An in depth look at why American universities continue to favor U S focused social science research despite efforts to make scholarship more cosmopolitan U S research universities have long endeavored to be cosmopolitan places yet the disciplines of economics political science and sociology have remained stubbornly parochial Despite decades of government and philanthropic investment in international scholarship the most prestigious academic departments still favor research and expertise on the United States Why Seeing the World answers this question by examining university research centers that focus on the Middle East and related regional area studies Drawing on candid interviews with scores of top scholars and university leaders to understand how international inquiry is perceived and valued inside the academy Seeing the World explains how intense competition for tenure line appointments encourages faculty to pursue American projects that are most likely to garner professional advancement At the same time constrained by tight budgets at home university leaders eagerly court patrons and clients worldwide but have a hard time getting departmental faculty to join the program Together these dynamics shape how scholarship about the rest of the world evolves At once a work and occupations study of scholarly disciplines an essay on the formal organization of knowledge and an inquiry into the fate of area studies Seeing the World is a must read for anyone who cares about the future of knowledge in a global era Coalition Defection Avi Kober, 2002-11-30 Since the creation of Israel during both wartime and peacetime many Arab coalitions have formed Every one of these anti Israel coalitions has failed to achieve its goals due to the defection of one or more major parties Kober explores the forces behind the dissemination of these alliances to determine why Arab states chose defection whether or not a distinction can be made between defection patterns in times of war and patterns related to peace processes and possible explanations for different behavior patterns The multi polar structure of the Arab subsystem the decisions of pivotal members and the negative reputations earned by such coalitions have always made defection an easy alternative The choice to defect was Kober contends nurtured by a sense of military weakness and by the priority that coalition members attached to their particular interests over general Arab concerns Kober finds that defection in time of war has arisen mainly through evasion passive avoidance of coalition obligations with the hope of escaping or minimizing expected losses Defection from military coalitions often deprived the defector of maximizing gains all the while weakening the remaining coalition members However defection during the peace process served not only to optimize the defector's utilities but eventually proved beneficial for the parties left behind Kober determines that the peace process mainly due to superpower involvement transformed the scenario from a zero sum to a non zero sum game by

rewarding the parties for signing treaties with Israel Also the first defectors such as Egypt established pay off precedents creating the foundation for future negotiations between the Arab players and Israel *Foreign Correspondence* John Maxwell Hamilton, Regina G. Lawrence, 2013-09-13 Despite the importance of foreign news its history transformation and indeed its future have not been much studied The scholarly community often calls attention to journalism s shortcomings covering the world yet the topic has not been systematically examined across countries or over time The need to redress this neglect and the desire to assess the impact of new media technologies on the future of journalism including foreign correspondence provide the motivation for this stimulating exciting and thought provoking book While the old economic models supporting news have crumbled in the wake of new media technologies these changes have the potential to bring new and improved ways to inform people of foreign news In an increasingly globalized era journalism is being transformed by the effortlessly quick sharing of information across national boundaries As such we need to reconsider foreign correspondence and explore where such reporting is headed This book discusses the current state and future prospects for foreign correspondence across the full range of media platforms and assesses developments in the reporting of overseas news for audiences governments and foreign policy in both contemporary and historical settings around the globe As Emmy Award and Pulitzer Prize winning correspondent Serge Schmemmann reminds us in this book quality journalism and unbiased reporting are as valid and necessary today as they ever were one of the primary tasks of journalists and scholars as they follow the changes taking place must be to ensure that the new international information order now imposed by the Internet remains true to the ideals and traditions that define our journalism This book was originally published as a special issue of *Journalism Studies* **Reporting Islam** Suad Joseph, 2022-12-29 Reporting Islam examines the coverage of Muslim women in the New York Times from 1979 2011 The analysis addresses the nature of the coverage whether there are parallels in the depiction of Muslim women from the Middle East and South Asia and with the US government policies toward these countries and the relationship between feminism in the US and the representation of Muslim women in the US At a time when women often become the iconic representatives of their nations their cultures and their religions this book offers unique insight into how a dramatic period of contemporary history for the Middle East and South Asia was depicted by the leading print newspaper in the world The coverage captures the Islamic Revolution in Iran the rise of Islamist movements across the Middle East South Asia and Africa the first Gulf War the 9 11 events the second Gulf War the War on Terror and the Arab uprisings The book asks critical questions about the wider implications of the misrepresentation of Muslim women in the media and the links between print news US foreign policy and women Recasting NATO's Strategic Concept Christopher S. Chivvis, 2009 The revision of the North Atlantic Treaty Organization s strategic concept offers an excellent opportunity to build an alliance capable of addressing the shared problems that its member states face To spur debate over concrete problems this paper examines five possible future directions for the alliance **Revolutionary Egypt** Reem

Abou-El-Fadl,2015-06-05 In 2011 the world watched as Egyptians rose up against a dictator Observers marveled at this sudden rupture and honed in on the heroes of Tahrir Square Revolutionary Egypt analyzes this tumultuous period from multiple perspectives bringing together experts on the Middle East from disciplines as diverse as political economy comparative politics and social anthropology Drawing on primary research conducted in Egypt and across the world this book analyzes the foundations and future of Egypt's revolution Considering the revolution as a process it looks back over decades of popular resistance to state practices and predicts the waves still to come It also confidently places Egypt's revolutionary process in its regional and international contexts considering popular contestation of foreign policy trends as well as the reactions of external actors It draws connections between Egyptians struggles against domestic despotism and their reactions to regional and international processes such as economic liberalization Euro American interventionism and similar struggles further afield Revolutionary Egypt is an essential resource for scholars and students of social movements and revolution comparative politics and Middle East politics in particular Middle East foreign policy and international relations

Islamic Law and International Law Emilia Justyna Powell,2019-10-18 There are twenty nine Islamic law states ILS in the world today and their Muslim population is over 900 million Muslims in these countries and to some extent all Muslims are ethically morally doctrinally or politically committed to the Islamic legal tradition a unique logic and culture of justice based on nonconfrontational dispute resolution In Islamic Law and International Law Emilia Justyna Powell examines the differences and similarities between the Islamic legal tradition and international law focusing in particular on the issue of conflict management and resolution In many Islamic Law States Islamic law displaces secular law in state governance and shapes these countries international dealings Powell considers why some of Islamic Law States accept international courts while others avoid them stressing throughout that we cannot make blanket claims about such states Each relationship is context specific hinging on the nature of the domestic legal system Moreover not all of these states are Islamic to the same degree or in the same way Secular law and religious law fuse in different ways in different domestic legal systems Often the Islamic legal tradition points in one direction while the Western based secularized international law points in another However Powell argues that Islamic legal tradition contains elements that are compatible with modern international law She marshals original data on the legal systems structures in thirty Islamic Law States over the entire course of the post World War Two era and she draws from in depth interviews with Islamic law scholars and leading practitioners of international law including judges of the International Court of Justice Rich in empirical evidence this book will reshape how we think about the relationship between ILS and the international system
