Israel, Eugenia Eng, Amy J. Schulz, Edith A. Parker, 2005-08-19

Written by distinguished experts in the field, this book shows how researchers, practitioners, and community partners can work together to establish and maintain equitable partnerships using a Community-Based Participatory Research (CBPR) approach to increase knowledge and improve health and well-being of the communities involved. CBPR is a collaborative approach to research that draws on the full range of research designs, including case study, etiologic, longitudinal, experimental, and nonexperimental designs. CBPR data collection and analysis methods involve both quantitative and qualitative approaches. What distinguishes CBPR from other approaches to research is the active engagement of all partners in the process. This book provides a comprehensive and thorough presentation of CBPR study designs, specific data collection and analysis methods, and innovative partnership structures and process methods. This book informs students, practitioners, researchers, and community members about methods and applications needed to conduct CBPR in the widest range of research areas, including social determinants of health, health disparities, health promotion, community interventions, disease management, health services, and environmental health. Built to Win Leslie Heywood, Shari L. Dworkin, Annotation

The sculpted speed of Marion Jones. The grit and agility of Mia Hamm. The slam dunk style of Lisa Leslie. The skill and finesse of these sports figures are widely admired, no longer causing the puzzlement and discomfort directed toward earlier generations of athletic women. *Built to Win* explores this relatively recent phenomenon: the confident, empowered female athletes found everywhere in American popular culture. Leslie Heywood and Shari L. Dworkin examine the role of female athletes through interviews with elementary and high school age girls and boys, careful readings of ad campaigns by Nike, Reebok, and others, discussions of movies like *Fight Club* and *Girlfight*, and explorations of their own sports experiences. They ask: what if any dissonance is there between popular images and the actual experiences of these athletes? Do these images really redefine femininity and

contribute to a greater inclusion of all women in sport Are sexualized images of these women damaging their quest to betaken seriously Do they inspire young boys to respect and admire female athletes and will this ultimately make a difference in the ways gender and power are constructed and perceived Proposing a paradigm shift from second to third wave feminism Heywood and Dworkin argue that in the years since the passage of Title IX gender stereotypes have been destabilized in profound ways and they assert that female athletes and their imagery are doing important cultural work to that end Important refreshing and engrossing Built to Win examines sport in all its complexity Doing Qualitative Research Benjamin F. Crabtree,1999-08-24 Designed to stimulate interest in qualitative research methods related to primary clinical care and to prepare practitioners to engage in it Expands existing approaches ways of knowing and types of research relationships at levels from the global through community family individual organ and cell to genome also recognizes recursive interaction between and among the levels Distinguishes four dimensions of investigation what the numbers are what the words mean who benefits and what the consequences are Annotation copyrighted by Book News Inc Portland OR

Kjeldsen,2017-11-10 This book examines the reception of rhetoric and the rhetoric of reception By considering salient rhetorical traits of rhetorical utterances and texts seen in context and relating this to different kinds of reception and or audience use and negotiation the authors explore the connections between rhetoric and reception In our time new media and new forms of communication make it harder to distinguish between speaker and audience The active involvement of users and audiences is more important than ever before This project is based on the premise that rhetorical research should reconsider the understanding conceptualization and examination of the rhetorical audience From mostly understanding audiences as theoretical constructions that are examined textually and speculatively the contributors give more attention to

empirical explorations of actual audiences and users The book will provide readers with new knowledge on the workings of rhetoric as well as illustrative and guiding examples of new methods of rhetorical studies *Toward a Broader*
