lie can travel halfway around the world before the truth gets its boots on. Actually that's been attributed to about a half dozen different people in various publications but still the point remains. In *Alternative Facts* author Alex Palmer's *Weird Wikipedia* collects 200 of the oddest stories he could find ranging from history to pop culture and science which have been disseminated over the years whether true or not. You'll have to flip to the back of the book to find out which ones were real and which were not but you couldn't be fooled that easily, right? Actually just one of those things is really, really true. Can you guess which one?
