Irreducible Mind Edward F. Kelly,Emily Williams Kelly,Adam Crabtree,Alan Gauld,Michael Grosso,Bruce Greyson,2006-12-07 Current mainstream opinion in psychology neuroscience and philosophy of mind holds that all aspects of human mind and consciousness are generated by physical processes occurring in brains Views of this sort have dominated recent scholarly publication The present volume however demonstrates_empirically_that this reductive materialism is not only incomplete but false The authors systematically marshal evidence for a variety of psychological phenomena that are extremely difficult and in some cases clearly impossible to account for in conventional physicalist terms Topics addressed include phenomena of extreme psychophysical influence memory psychological automatism and secondary personality near death experiences and allied phenomena genius level creativity and mystical states of consciousness both spontaneous and drug induced The authors further show that these rogue phenomena are more readily accommodated by an alternative transmission or filter theory of mind brain relations advanced over a century ago by a largely forgotten genius F W H Myers and developed further by his friend and colleague William James This theory moreover ratifies the commonsense conception of human beings as causally effective conscious agents and is fully compatible with leading edge physics and neuroscience The book should command the attention of all open minded persons concerned with the still unsolved mysteries of the mind

Emancipate Your Soul V. Ravi,2011-04-10 Spiritual realization is not that tough to pursue It only needs proper understanding of the psychic being and the making of it What is really needed is a thorough knowledge about the process of creation Unless one knows all the components of a machine a perfect machine cannot be made Unless one has total knowledge of the Spirit spiritual knowledge cannot be perfect An ill conceived spiritual knowledge will only be an erosion of time in one s precious life There are too many theories about spirituality and too many jargons are used thereby complicating the process of understanding spirituality Pursuing the spiritual path is easy for those who could understand the intricacies of the phenomena involved Once a proper spiritual life is pursued the result will be distinctly evident resulting in eternal happiness and joy This edition has simplified the process of realising the Self within The book has been divided into two parts The first one is the theoretical aspect and the second one is the practical aspect Theory deals with the process of acquiring knowledge and elucidates all about Soul and soul Technical terms have been avoided as far as possible and all that is necessary to understand spirituality have been explained to the extent that is required to understand them The first part deals with inner psychic organs maya karma Brahman individual soul Prakrti sensory organs creation and death sheaths of body The origin of worldly experience begins when inner psychic organs set out their interdependence with gross body The second part deals with the practice of uniting self with the Self A small portion also deals with endocrine glands situated in third eye Every effort has been taken to present this edition as simple as possible so that spirituality is understood in its true sense and practiced perfectly to attain final liberation
